Creating and Understanding Drawings Gene A. Mittler,1989 **Creating & Understanding Drawings: Teacher resource binder** Gene A. Mittler,James D. Howze,2006 **Creating & Understanding Drawings** McGraw Hill,2000-02-29

Creating and Understanding Drawings helps your students build the visual competencies critical to any art related field This comprehensive discipline based program provides an outstanding introduction to studio art art criticism and art history As students learn to understand and appreciate the drawings of others they ll also gain the knowledge and confidence to improve their own work The full color layout highlights culturally diverse drawings and exceptional student artwork that motivate your students A new organization of the text combines the studio experience your students want with the strong philosophical base they need New material on animation and an emphasis on careers in art make this program more relevant than ever before *Creating and understanding drawings* G.A. Mittler,1989 *Arts-Fine Arts* ,2006 Designing Learning Environments for Developing Understanding of Geometry and Space Richard Lehrer,Daniel Chazan,2012-11-12

This volume reflects an appreciation of the interactive roles of subject matter teacher student and technologies in designing classrooms that promote understanding of geometry and space Although these elements of geometry education are mutually constituted the book is organized to highlight first the editors vision of a general geometry education second the development of student thinking in everyday and classroom contexts and third the role of technologies Rather than looking to high school geometry as the locus and all too often the apex of geometric reasoning the contributors to this volume suggest that reasoning about space can and should be successfully integrated with other forms of mathematics starting at the elementary level and continuing through high school Reintegrating spatial reasoning into the mathematical mainstream indeed placing it at the core of K 12 mathematics environments that promote learning with understanding will mean increased attention to problems in modeling structure and design and reinvigoration of traditional topics such as measure dimension and form Further the editors position is that the teaching of geometry and spatial visualization in school should not be compressed into a characterization of Greek geometry but should include attention to contributions to the mathematics of space that developed subsequent to those of the Greeks This volume is essential reading for those involved in mathematics education at all levels including university faculty researchers and graduate students *Mathematics Classrooms That Promote Understanding* Elizabeth Fennema,Thomas A. Romberg,1999-04-01 Mathematics Classrooms That Promote Understanding synthesizes the implications of research done by the National Center for Research in Mathematical Sciences on integrating two somewhat diverse bodies of scholarly inquiry the study of teaching and the study of learning mathematics This research was organized around content domains and or continuing issues of education such as equity and assessment of learning and was guided by two common goals defining the mathematics content of the K 12 curriculum in light of the changing mathematical needs of citizens for the 21st century and identifying common components of classrooms

that enable students to learn the redefined mathematics with understanding To accomplish these goals classrooms in which instruction facilitated the growth of understanding were established and or studied This volume reports and discusses the findings which grew out of this research and subsequent papers and discussions among the scholars engaged in the endeavor Section I Setting the Stage focuses on three major threads What mathematics should be taught how we should define and increase students understanding of that mathematics and how learning with understanding can be facilitated for all students Section II Classrooms That Promote Understanding includes vignettes from diverse classrooms that illustrate classroom discourse student work and student engagement in the mathematics described in Chapter 1 as well as the mental activities described in Chapter 2 These chapters also illustrate how teachers deal with the equity concerns described in Chapter 3 Section III addresses Developing Classrooms That Promote Understanding The knowledge of the teaching learning process gained from the research reported in this volume is a necessary prerequisite for implementing the revisions called for in the current reform movement The classrooms described show that innovative reform in teaching and learning mathematics is possible Unlike many volumes reporting research this book is written at a level appropriate for master s degree students Very few references are included in the chapters themselves instead each chapter includes a short annotated list of articles for expanded reading which provides the scholarly basis and research substantiation for this volume

Children Making Meaning Josephine Deguara,Cathy Nutbrown,2024-12-31 This ground breaking text highlights the value of drawing as a meaningful way for children to communicate demonstrating how it is inextricably linked with children s everyday experiences thinking processes imagination emotions and learning By exploring what intrigues and concerns children Children Making Meaning Exploring Drawings Narratives and Identities demonstrates how drawing is so much more than an insignificant pastime Illustrated throughout this book includes examples of children s drawings to explore and explain the processes relationships and modes they use as well as the themes and meanings that emerge from them Practical case study material illuminates the complexity of children s thinking intentions and knowledge as they find creative and individual ways to convey their thoughts fears excitements contentments and fascinations This book also explores the relationship between drawing and talk and how children s ongoing drawing narratives help them to develop and change their meanings as they draw Accessibly combining relevant theories with numerous original examples this essential resource is a must read for educators and other professionals who use children s drawings in their work It will also be useful for parents who wish to support their children s drawing activities and extend such opportunities at home

Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our

philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas

Children's Images of Identity Jill Brown,Nicola F. Johnson,2015-06-25 The understandings which children have of Indigenous identity provide means by which to explore the ways in which Indigenous identity is both projected and constructed in society These understandings play a powerful part in the ways in which Indigenous peoples are positioned in the mainstream society with which they are connected The research presented in this edited collection uses children s drawings to illuminate and explore the images children both mainstream and Indigenous have of Indigenous peoples The data generated by this process allows exploration of the ways in which Indigenous identity is understood globally through a series of locally focussed studies connected by theme and approach The data serves to illuminate both the space made available by mainstream groups and aspects of modernity accommodated within the Indigenous sense of self Our aim within this project has been to analyse and discuss the ways in which children construct identity both their own and that of others Children were asked to share their thoughts through drawings which were then used as the basis for conversation with the researchers In this way the interaction between mainstream modernity and traditional Indigenous identity is made available for discussion and the connection between children s lived experiences of identity and the wider global discussion is both immediately enacted and located within broader international understandings of Indigenous cultures and their place in the world
