Creating Interdisciplinarity Interdisciplinary Research And Teaching Among College And University Faculty:

Creating Interdisciplinarity Lisa R. Lattuca, 2001 Interdisciplinarity a favorite buzzword of faculty and administrators has been appropriated to describe so many academic pursuits that it is virtually meaningless With a writing style that is accessible fluid and engaging Lisa Lattuca remedies this confusion with an original conceptualization of interdisciplinarity based on interviews with faculty who are engaged in its practice Whether exploring the connections between apparently related disciplines such as English and women s studies or such seemingly disparate fields as economics and theology Lattuca moves away from previous definitions based on the degrees of integration across disciplines and instead focuses on the nature of the inquiry behind the work She organizes her findings around the processes through which faculty pursue interdisciplinarity the contexts institutional departmental and disciplinary in which faculty are working and the ways in which those contexts relate to and affect the interdisciplinary work Her findings result in useful suggestions for individuals concerned with the meaning of faculty work the role and impact of disciplines in academe today and the kinds of issues that should guide the evaluation of faculty scholarship

Creating Interdisciplinarity Lisa R. Lattuca, 2001 Answers the perennial question among college educators What is interdisciplinarity [Handbook of Interdisciplinary Teaching and Administration](#) Rick Szostak, 2024-09-06 Championing an emerging global community of scholars this Handbook provides a detailed examination on how to successfully integrate interdisciplinarity into education programs A comprehensive look into the current landscape of the field it emphasises the importance of interdisciplinary teaching and administration in the development of creativity citizenship and information literacy This title contains one or more Open Access chapters

A Christian Approach to Interdisciplinary Studies William Dennison, 2007-05-01 In an academic world that has rejected a Christian ontology metaphysic and epistemology as well as the secular foundationalism of modernity one is hard pressed to find any secular academician in the field of interdisciplinary studies IDS advocating a definitive starting point and methodology for IDS In A Christian Approach to Interdisciplinary Studies William D Dennison asks is such a study truly integrative that does not have an ontological integrative starting point and the constitutive component of method To put the question another way without the God of the Bible as the author of integration within creation can there truly be IDS Indeed Dennison calls for the integration of approach and method integration provided and modeled by the triune God of Scripture Adapted from the Preface

policymakers administrators and researchers interested in higher education management **Rethinking Women's and Gender Studies** Catherine M. Orr, Ann Braithwaite, 2012-03-22 Rethinking Women's and Gender Studies re-examines the field's foundational assumptions by identifying and critically analyzing eighteen of its key terms. Each essay investigates a single term, e.g. feminism, interdisciplinarity, intersectionality, by asking how it has come to be understood and mobilized in Women's and Gender Studies and then explicates the roles it plays in both producing and shutting down possible versions of the field. The goal of the book is to trace and expose critical paradoxes, ironies, and contradictions embedded in the language of Women's and Gender Studies from its high theory to its casual conversations that relies on these key terms. Rethinking Women's and Gender Studies offers a fresh approach to structuring Feminist Theory Senior Capstone and introductory graduate level courses in Women's and Gender Studies.

The Field Guide to Mixing Social and Biophysical Methods in Environmental Research Rebecca Lave, Stuart Lane, 2025-02-25 Despite ongoing debates about its origins, the Anthropocene, a new epoch characterized by significant human impact on the Earth's geology and ecosystems, is widely acknowledged. Our environment is increasingly a product of interacting biophysical and social forces shaped by climate change, colonial legacies, gender norms, hydrological processes, and more. Understanding these intricate interactions requires a mixed methods approach that combines qualitative and quantitative biophysical and social research. However, mixed methods environmental research remains rare, hindered by academic boundaries, limited training, and the challenges of interdisciplinary collaboration. Time, funding, and the integration of diverse data further complicate this research, whilst the dynamics and ethics of interdisciplinary teams add another layer of complexity. Despite these challenges, mixed methods research offers a more robust and ultimately transformative understanding of environmental questions. This Field Guide aims to inspire and equip researchers to undertake such studies. Organized like a recipe book, it assists researchers in the preparation of their field work as well as offering entry points to key methods and providing examples of successful mixed methods projects. This book will be of interest to scholars wishing to tackle environmental research in a more holistic manner, spanning sister disciplines such as anthropology, statistics, political science, public health, archaeology, geography, history, ecology, and Earth science.

Conundrums in Practical Theology Joyce Ann Mercer, Bonnie Miller-McLemore, 2016-09-19 In this landmark volume, internationally recognized scholars address key intellectual and practical conundrums that not only trouble practical theology but also reflect biases and breakdowns in the construction of theological knowledge in academy and religious communities at large. With critical facility and unheralded honesty that includes reflexivity about their own lives in the academy, the authors tackle complex issues that refuse easy solutions: racism, hierarchy of theory over practice, devaluation of small case studies, risks of interdisciplinarity to scholarly identity, inequities between Christian traditions, unreflective Christian centrism, and tensions between the production of scholarship and public service. Outcomes of these issues will have serious implications for the discipline and the study of theology for years to come. Contributors include Tom
