Addcon World, 2004 Addcon World is the leading Additives Modifiers and Compounding Conference It has run for the last nine years The conference focused on the technical advances and issues facing the plastics additives and modifiers industry Papers at this year's event discussed the latest developments and the future of the additives business Addcon conferences are two day meetings for people who are interested in knowing something about all the major ingredients of a modern plastics product and not just the one they currently research manufacture or sell In this respect they are different from meetings where the focus is on a single type of additive and where recent developments in related fields can easily be overlooked Since additives can interact with each other and even neutralise each other's effects as anyone

combining certain light stabilisers with certain flame retardants knows a conference that updates your appreciation of the wider technical scene is well worth considering Additives today play an essential role in enabling plastics to continue to compete with other materials such as wood metals paper and glass several years and there is still scope for further expansion especially in Central and Eastern Europe but this trend cannot simply be taken for granted The industry faces challenging problems including a steady increase in European regulatory directives and the need to compete with low cost manufacturers in Asia and elsewhere Several large producers in Western Europe have been struggling to maintain their position in the face of difficult market conditions Improved additives will be needed to produce end products economically so that they comply with present and future regulations and in sufficiently high quality to satisfy increasingly demanding customers **Plastic**
