*Biodiversity, Ecosystems and Conservation in Northern Mexico* Jean-Luc E. Cartron, Gerardo Ceballos, Richard Stephen Felger, 2023 This text describes the biodiversity and biogeography of northern Mexico and documents the biological importance of regional ecosystems and the impacts of human land use on the conservation status of plants and wildlife

Political Ecologies of Cattle Ranching in Northern Mexico Eric P. Perramond, 2010-04-15 Private ranchers survived the Mexican Revolution and the era of agrarian reforms and they continue to play key roles in the ecology and economy of northern Mexico In this study of the Rio Sonora region of northern Mexico where ranchers own anywhere from several hundred to tens of thousands of acres Eric Perramond evaluates management techniques labor expenditures gender roles and decision making on private ranches of varying size By examining the economic and ecological dimensions of daily decisions made on and off the ranch he shows that contrary to prevailing notions ranchers rarely collude as a class unless land titles are at issue and that their decision making is as varied as the landscapes they oversee Through first hand observation field measurements and intimate ethnographies Perramond sheds light on a complex set of decisions made avoided and confronted by these land managers and their families He particularly shows that ranching has endured because of its extended kinship network its reliance on all household members and its close ties to local politics Perramond follows ranchers caught between debt drought and declining returns to demonstrate the novel approaches they have developed to adapt to changing economies and ecologies alike such as strategically marketing the ranches for wild game hunting or establishing small businesses that subsidize their lifestyles and livelihoods Even more importantly he reveals the false dichotomy between private and communal ranching *Political Ecologies of Cattle Ranching in Northern Mexico* is essential reading for anyone interested in the future of ranching in western North America

*Marine Ecoregions of North America* Tara A. C. Wilkinson, Commission for Environmental Cooperation (Montréal, Québec), 2009 Describes and maps the North American oceanic and coastal waters classifying them into 24 marine ecoregions according to oceanographic features and geographically distinct assemblages of species Descriptive profiles of the ecoregions describe their key features in terms of physical oceanographic and biological characteristics as well as human impacts The book is intended to provide a framework for collecting and organizing information on these regions and to encourage a sense of joint responsibility and a collaborative strategic approach to dealing with the challenges of conserving the regions shared oceans

**Encyclopedia of Biodiversity**, 2013-02-05 The 7 volume Encyclopedia of Biodiversity Second Edition maintains the reputation of the highly regarded original presenting the most current information available in this globally crucial area of research and study It brings together the dimensions of biodiversity and examines both the services it provides and the measures to protect it Major themes of the work include the evolution of biodiversity systems for classifying and defining biodiversity ecological patterns and theories of biodiversity and an assessment of contemporary patterns and trends in biodiversity The science of

biodiversity has become the science of our future It is an interdisciplinary field spanning areas of both physical and life sciences Our awareness of the loss of biodiversity has brought a long overdue appreciation of the magnitude of this loss and a determination to develop the tools to protect our future Second edition includes over 100 new articles and 226 updated articles covering this multidisciplinary field from evolution to habits to economics in 7 volumes The editors of this edition are all well respected instantly recognizable academics operating at the top of their respective fields in biodiversity research readers can be assured that they are reading material that has been meticulously checked and reviewed by experts Approximately 1 800 figures and 350 tables complement the text and more than 3 000 glossary entries explain key terms

Plant Diversity and Ecology in the Chihuahuan Desert Maria C. Mandujano,Irene Pisanty,Luis E. Eguiarte,2020-07-18 Environmental and specific diversity in the Chihuahuan desert in general and in the Cuatro Ci negas Basin in particular has long been recognized as outstanding This book provides a global ecological overview together with in depth studies of specific processes The Chihuahuan desert is the warmest in North America and has a complex geologic climatic and biogeographical history which affects today s distribution of vegetation and plants and generates complex phylogeographic patterns The high number of endemic species reflects this complex set of traits The modern distribution of environments including aquatic and subaquatic systems riparian environments gypsum dunes and gypsum rich soils low levels of phosphorous and organic matter and high salinity combined with an extreme climate call for a range of adaptations Plants are distributed in a patchy pattern based on punctual variations and many of them respond to different resources and conditions with considerable morphological plasticity In terms of physiological morphological and ecological variability cacti were identified as the most important group in specific environments like bajadas characterized by high diversity values while gypsophytes and gypsovagues of different phylogenies including species with restricted distribution and endemics

**Immigration, Environment, and Security on the U.S.-Mexico Border** Lisa Meierotto,2019-12-05 This book examines the convergence of conservation and security efforts along the U S Mexico border in Arizona The author presents a unique analysis of the history of Cabeza Prieta National Wildlife Refuge a federally protected border wilderness area Beginning in the early 1990s changes to U S immigration policy dramatically altered the political and natural landscape in and around Cabeza Prieta In particular the increasing presence of Border Patrol has contributed to environmental degradation in wilderness Complicated human rights concerns are also explored in the book Protecting wildlife in an area with high rates of undocumented border crossing and smuggling results in complex and sometimes controversial conservation policies Ultimately the observations and analysis presented in this book illustrate ways in which the politics of race and nationalism are subtly but significantly interwoven into border environmental and security policies

**Ecology and Management of Black-tailed and Mule Deer of North America** James R. Heffelfinger,Paul R. Krausman,2023-04-27 Choice Outstanding Academic Title 2024 Black tailed and mule deer represent one of the largest distributions of mammals in North America and

are symbols of the wide open American West Each chapter in this book was authored by the world's leading experts on that topic Both editors James R Heffelfinger and Paul R Krausman are widely published in the popular and scientific press and recipients of the O C Wallmo Award given every two years to a leading black tailed and mule deer expert who has made significant contributions to the conservation of this species In addition Heffelfinger has chaired the Mule Deer Working Group sponsored by the Western Association of Fish and Wildlife Agencies for more than 15 years This working group consists of the leading black tailed and mule deer experts from each of 24 states provinces and territories in western North America putting them at the forefront of all conservation and much of the research on this species The book represents all current knowledge available on these deer including how changing conditions such as fires habitat alteration and loss disease climate change socio economic forces energy development and other aspects are influencing their distribution and abundance now and into the future It takes a completely fresh look at all chapter topics The revisions of distribution taxonomy evolution behavior and new and exciting work being done in deer nutrition migration and movements diseases predation and human dimensions are all assembled in this volume This book will instantly become the foundation for the latest information and management strategies to be implemented on the ground by practitioners and to inform the public Although this book is about deer the topics discussed influence most terrestrial wildlife worldwide and the basic concepts in many of the chapters are applicable to other species

**ENVIRONMENTAL POLICY IN MEXICO** Jorge Alejandro Silva Rodríguez de San Miguel, 2017-09-18

**Pacific Deep-Sea Discoveries: Geological and Biological Exploration, Patterns, and Processes** Randi D. Rotjan, Diva Amon, William W. Chadwick, Stephen Hammond, 2021-04-16

*Global Environmental Forest Policies* Constance McDermott, Benjamin Cashore, Peter Kanowski, 2010-08-12

Market globalization and the globalization of environmental concerns have spurred demand for greater international accountability for forest stewardship In response a range of multi lateral governmental and non governmental initiatives have emerged to redefine the rules of global trade and demand verification of the legality and or sustainability of forest products originating from within and outside national boundaries At the same time there is a lack of transparency and shared understanding about the environmental forest policies that already exist within the world's leading forest producing and consuming countries The result is that many stakeholders have developed perceptions about a country's regulatory environment that are not consistent with what is actually taking place This book provides a uniquely detailed and systematic comparison of environmental forest policies and enforcement in twenty countries worldwide covering developed transition and developing economies The goal is to enhance global policy learning and promote well informed and precisely tuned policy solutions

**Mexican Fauna in the Anthropocene** Robert W. Jones, C. Patricia Ornelas-García, Rubén Pineda-López, Fernando Álvarez, 2023-01-30

This contributed volume presents an analysis of the current conservation status of major faunal groups in Mexico The chapters describe a prognosis of future challenges and also explore the expanding threats inherent in the

Anthropocene within the context of the unique physical biological and cultural aspects of the nation Covering 27 chapters and written by Mexican and international authors this book analyzes a wide range of vertebrate and invertebrate animal taxa their ecosystems and the critical processes related to their present conservation status This volume is an important reference material for researchers conservationists and students interested in the biological and ecological processes shaping the Mexican fauna

**Ethnobiology of Corals and Coral Reefs** Nemer Narchi, Lisa Leimar Price, 2015-12-24 This book explores the ethnobiology of corals by examining the various ways in which humans past and present have exploited and taken care of coral and coralline habitats This book will bring the educated general audience closer to corals by exploring the various circumstances of human coral coexistence by providing scientifically sound and jargon free perspectives and experiences from across the globe Corals are a vital part of the marine environment since they promote and sustain marine and global biodiversity while providing numerous other environmental and cultural services Countless valuable coral conservation efforts are published in academic and general audience venues on a daily basis However relevant few of these reports show a direct deeper understanding of the intimate relationship between people and corals throughout the world's societies Ethnobiology of Corals and Coral Reefs establishes an intimate bond between the audience and the wonder of corals and their importance to humankind

**Coastal Foragers of the Gran Desierto** Douglas R. Mitchell, Jonathan B. Mabry, Gary Huckleberry, Natalia Martínez Tagüeña, 2024-03-19 The result of nearly twenty years of interdisciplinary research this volume contributes to the archaeological and paleoenvironmental knowledge of an important but lightly investigated hyperarid coastline at the heart of the Sonoran Desert Focused on the coast near Puerto Peasco Sonora Mexico Coastal Foragers of the Gran Desierto examines the diverse groups occupying the coast for salt abundant food sources and shells for ornament manufacturing The archaeological patterns demonstrated by the data gathered lead to the conclusion that since ancient times this coastal landscape was not a marginal zone but rather an important source of food and trade goods and a pilgrimage destination that influenced broad and diverse communities across the Sonoran Desert and beyond Contributors Jenny L Adams Karen R Adams Thomas Bowen Tessa L Branyan Bill Broyles Richard C Brusca David L Dettman Michael S Foster Gary Huckleberry Jonathan B Mabry Natalia Martínez Tagüeña Richard J Martyne Douglas R Mitchell Kirsten Rowell Melissa R Schwan M Steven Shackley R J Sliva Kayla B Worthey

**Human-Animal Relations in Tourism, Leisure and Development** Carlos Monterrubio, Xavier López-Medellín, Katherine Dashper, Helen Wadham, 2025-04-17 Humans and animals have developed multiple and complex interactions in the fields of tourism leisure and development However much of the existing research on how humans and animals interact in these fields has emerged from within the context of developed countries As a result little has been documented about human animal interactions in the socioeconomic cultural and environmental contexts of countries in the Global South Specifically the diversity and complexity of interspecies relationships in tourism leisure and local development in Latin America have been largely ignored in Anglo Saxon literature

This has resulted in a limited partial and hegemonic understanding and debate about human animal relationships globally dominated by certain regions of the world This book addresses this gap by documenting multiple and complex relationships between humans and animals in the fields of tourism leisure and local development in countries in Latin America *Wildlife Ecology and Management in Mexico* Raul Valdez, José Alfonso Ortega-Santos, 2019-01-23 Mexico is the fourteenth largest country in the world and ranks fifth in biodiversity Located in the transition zone between the temperate and tropical regions of North and South America Mexico is an important migratory corridor for wildlife and also provides wintering habitat for several species of bats monarch butterflies and temperate North American nesting birds Mexico faces several challenges to wildlife management and conservation efforts While there is increased public education and acknowledgment of the valuable benefits wildlife provides there is still much work to do to incentivize conservation efforts Fortunately there is growing recognition that Mexico's wildlife resources can be a critical component in the rural economic development of the country Bringing together an international team of wildlife experts across North America *Wildlife Ecology and Management in Mexico* provides information on the status distribution ecological relationships and habitat requirements and management of the most important game birds and mammals in Mexico It also reviews current threats and challenges facing wildlife conservation as well as strategies for resolving these issues This reference is a valuable tool for wildlife biologists wildlife management professionals and anyone interested in conserving Mexico's wealth of natural resources By laying out the challenges to conservation research editors Raul Valdez and J Alfonso Ortega S hope to encourage interdisciplinary communication and collaboration across borders

**CowCalf Beef Production in Mexico** , Ecosystem-Based Management for the Oceans Karen McLeod, Heather Leslie, 2012-09-26 Conventional management approaches cannot meet the challenges faced by ocean and coastal ecosystems today Consequently national and international bodies have called for a shift toward more comprehensive ecosystem based marine management Synthesizing a vast amount of current knowledge *Ecosystem Based Management for the Oceans* is a comprehensive guide to utilizing this promising new approach At its core ecosystem based management EBM is about acknowledging connections Instead of focusing on the impacts of single activities on the delivery of individual ecosystem services EBM focuses on the array of services that we receive from marine systems the interactive and cumulative effects of multiple human activities on these coupled ecological and social systems and the importance of working towards common goals across sectors *Ecosystem Based Management for the Oceans* provides a conceptual framework for students and professionals who want to understand and utilize this powerful approach And it employs case studies that draw on the experiences of EBM practitioners to demonstrate how EBM principles can be applied to real world problems The book emphasizes the importance of understanding the factors that contribute to social and ecological resilience the extent to which a system can maintain its structure function and identity in the face of disturbance Utilizing the resilience framework professionals can better predict how systems will respond to a variety of disturbances as

well as to a range of management alternatives Ecosystem Based Management for the Oceans presents the latest science of resilience while it provides tools for the design and implementation of responsive EBM solutions *Rivers of North America* Michael D. DeLong, Timothy D. Jardine, Arthur C. Benke, Colbert E. Cushing, 2023-04-20 *Rivers of North America* Second Edition features new updates on rivers included in the first edition as well as brand new information on additional rivers This new edition expands the knowledge base providing readers with a broader comparative approach to understand both the common and distinct attributes of river networks The first edition addressed the three primary disciplines of river science hydrology geomorphology and ecology This new edition expands upon the interactive nature of these disciplines showing how they define the organization of a riverine landscape and its processes An essential resource for river scientists working in ecology hydrology and geomorphology Provides a single source of information on North America s major rivers Features authoritative information on more than 200 rivers from regional specialists Includes full color photographs and topographical maps to illustrate the beauty major features and uniqueness of each river system Offers one page summaries help readers quickly find key statistics and make comparisons among rivers *The Prehispanic Ethnobotany of Paquimé and Its Neighbors* Paul E. Minnis, Michael E. Whalen, 2020-11-17 Paquim also known as Casas Grandes and its antecedents are important and interesting parts of the prehispanic history in northwestern Mexico and the U S Southwest Not only is there a long history of human occupation but Paquim is one of the better examples of centralized influence Unfortunately it is also an understudied region compared to the U S Southwest and other places in Mesoamerica This volume is the first large scale investigation of the prehispanic ethnobotany of this important ancient site and its neighbors The authors examine ethnobotanical relationships during Medio Period AD 1200 1450 when Paquim was at its most influential Based on two decades of archaeological research this book examines uses of plants for food farming strategies wood use and anthropogenic ecology The authors show that the relationships between plants and people are complex interdependent and reciprocal This volume documents ethnobotanical relationships and shows their importance to the development of the Paquim polity How ancient farmers made a living in an arid to semi arid region and the effects their livelihood had on the local biota their relations with plants and their connection with other peoples is worthy of serious study The story of the Casas Grandes tradition holds valuable lessons for humanity *Wild Again* David Jachowski, 2014-03-28 This engaging personal account of one of America s most contested wildlife conservation campaigns has as its central character the black footed ferret Once feared extinct and still one of North America s rarest mammals the black footed ferret exemplifies the ecological social and political challenges of conservation in the West including the risks involved with intensive captive breeding and reintroduction to natural habitat David Jachowski draws on more than a decade of experience working to save the ferret His unique perspective and informative anecdotes reveal the scientific and human aspects of conservation as well as the immense dedication required to protect a species on the edge of extinction By telling one story of conservation biology

in practice its routine work triumphs challenges and inevitable conflicts this book gives readers a greater understanding of the conservation ethic that emerged on the Great Plains as part of one of the most remarkable recovery efforts in the history of the Endangered Species Act
