Bioethics And Medical Issues In Literature:

Bioethics and Medical Issues in Literature Mahala Yates Stripling, 2013-08-22 Many of the bioethical and medical issues challenging society today have been anticipated and addressed in literature ranging from Mary Shelley's Frankenstein Albert Camus s The Plague to Margaret Edson s Wit The ten works of fiction explored in this book stimulate lively dialogue on topics like bioterrorism cloning organ transplants obesity and heart disease sexually transmitted diseases and civil and human rights This interdisciplinary and multicultural approach introducing literature across the curricula helps students master medical and bioethical concepts brought about by advances in science and technology bringing philosophy into the **Bioethics and Biolaw through Literature** Daniela Carpi,2011-10-27 In recent years the well world of science established field of human anthropology has been put under scrutiny by the new data offered by science and technology Scientific intervention into human life through organ transplants euthanasia genetic engineering experiments connected to the genetic code and the genome and varied other biotechnologies have placed ethical beliefs into question and created ethical dilemmas These scientific inventions influence our views on birth and death on the construction of the body and its technical reproducibility and have problematized the concept of the human persona The purpose of bioethics the science of life is to find new values and norms which will be valid for a multicultural society Bioethics is today a well respected topic of research that has brought together philosophers and experts to discuss the limits of science and medicine The aim of this book is to merge the two fields of bioethics and law or biolaw through the literary text by taking into consideration the transformations of the concept of persona at which we have nowadays arrived The new meaning of the term persona represents in fact the final point of a long standing quest for man's sense of his own being and human dignity and of his capacity to live in social interrelations. The volume presents a wide range of perspectives comprising methodological approaches legal and literary aspects The Inner World of Medical Students Johanna Shapiro, 2016-07-06 This is a practical and comprehensive guide to communication in family medicine for doctors nurses and staff in the primary healthcare team It brings together all facets of communication in healthcare including involvement of patients staff and external workers It shows how to address all aspects of communication in relation to one to one situations teaching and groups and encourages the reader to reflect on their own clinical and work experience Using think boxes exercises and references this is an accessible quide relevant to all members of the practice team The Drama of DNA Karen H. Rothenberg, Lynn W. Bush, 2014 Through the use of dramatic narratives The Drama of DNA brings to life the complexities raised by the application of genomic technologies to health care and diagnosis This creative pedagogical approach shines a unique light on the ethical psychosocial and policy challenges that emerge as comprehensive sequencing of the human genome transitions from research to clinical medicine Narrative genomics aims to enhance understanding of how we evaluate process and share genomic information and to cultivate a deeper appreciation for difficult decisions encountered by

health care professionals bioethicists families and society as this technology reaches the bedside This innovative book includes both original genomic plays and theatrical excerpts that illuminate the implications of genomic information and emerging technologies for physicians scientists counselors patients blood relatives and society In addition to the plays the authors provide an analytical foundation to frame the many challenges that often arise Bioethics Education in a Global Perspective Henk A.M.J. ten Have, 2014-09-25 This book critically analyses experiences with bioethics education in various countries across the world and identifies common challenges and interests It presents ethics teaching experiences in nine different countries and the basic question of the goals of bioethics education It addresses bioethics education in resource poor countries as the conditions and facilities are widely different and set limits and provide challenges to bioethics educators Further the question of how bioethics education can be improved is explored by the contributors Despite the volume of journal publications agreement on bioethics education is rather limited. There are only few examples of core curricula demonstrating consensus on the contents goals methods and assessment of teaching programs We need ask How can agreement on the best modalities of bioethics education be promoted Contemporary Bioethics Mohammed Ali Al-Bar, Hassan Chamsi-Pasha, 2015-05-27 This book discusses the common principles of morality and ethics derived from divinely endowed intuitive reason through the creation of al fitr a nature and human intellect al agl Biomedical topics are presented and ethical issues related to topics such as genetic testing assisted reproduction and organ transplantation are discussed Whereas these natural sources are God's special gifts to human beings God's revelation as given to the prophets is the supernatural source of divine guidance through which human communities have been guided at all times through history The second part of the book concentrates on the objectives of Islamic religious practice the maga sid which include Preservation of Faith Preservation of Life Preservation of Mind intellect and reason Preservation of Progeny al nasl and Preservation of Property Lastly the third part of the book discusses selected topical issues including abortion assisted reproduction devices genetics organ transplantation brain death and end of life aspects For each topic the current medical evidence is followed by a detailed discussion of the ethical issues involved Essays in Medical Sociology Renée Claire Fox, This outstanding collection of essays by Renee C Fox encompasses almost thirty years of original pioneering research in the sociology of medicine Based on fieldwork in a variety of medical settings in the United States Belgium and Zaire these ethnographic essays examine chronic and terminal illness medical research therapeutic innovation medical education and socialization and bio ethics Within this framework three empirical cases have been singled out for special scrutiny the process of becoming a physician the development of the artificial kidney machine and organ transplantation and the evolution of medical research in Belgium Without ignoring social structural or psychodynamic factors Dr Fox has explored basic cultural phenomena and questions associated with health illness and medicine values beliefs symbols rites and the nuances of language ethical and existential dilemmas and dualities and the complex interrelationships between medicine
