Class and Other Identities Lex Heerma van Voss, Marcel van der Linden, 2002 With the onset of a more conservative political climate in the 1980s social and especially labour history saw a decline in the popularity that they had enjoyed throughout the 1960s and 1970s This led to much debate on its future and function within the historical discipline as a whole Some critics declared it dead altogether Others have proposed a change of direction and a more or less exclusive focus on images and texts The most constructive proposals have suggested that labour history in the past concentrated too much on class and that other identities of working people should be taken into account to a larger extent than they had been previously such as gender religion and ethnicity Although class as a social category is still as valid as it has been before the questions now to be asked are to what extent non class identities shape working people's lives and mentalities and how these are linked with the class system In this volume some of the leading European historians of labour and the working classes address these questions Two non European scholars comment on their findings from an Indian resp American point of view The volume is rounded off by a most useful bibliography of recent studies in European labour history class gender religion and ethnicity

annotated bibliography **Routledge Handbook of International Organization** Bob Reinalda, Marieke Louis, 2024-12-09

This completely revised and rewritten handbook gives an overview of international organization IO as a dynamic field of research that adds to our understanding of global and regional relations and related domestic politics. Bringing together international scholars from a range of disciplines, it considers both IO as a process and multilateral organizations as institutions. This handbook is divided into five parts: I Documentation, sources and perspectives; II International secretariats as bureaucracies; III Actors within and beyond international bureaucracies; IV Processes within and beyond international bureaucracies; V Challenges to international organizations. Containing new chapters on topics such as the anthropological perspective, IO secretariats in several continents outside of Europe, feminization, the digital turn, and challenges to IO legitimacy, the contributors reflect on the progression of IO studies from a burgeoning field to a well-established subfield of international relations and the move away from scholarship based mainly in North Western Europe and the United States. This book will be of particular interest to scholars and students of IOs, global governance, diplomacy, and foreign policy, as well as practitioners of multilateral cooperation.
