

Biographical

- Biographical studies are undertaken for many reasons, depending not only on the people being studied, but also on those doing the studying.

Each biographical study here consists of a brief summary of the person's life and work, including, as may be appropriate and available, a photographic or other image, list of publications, and links.

Biographical Studies

**Anna Juliane Heinrich, Séverine
Marguin, Angela Million, Jörg Stollmann**

Biographical Studies:

British Sport: Biographical studies of British sportsmen, sportswomen, and animals Richard William Cox, 2003 Volume three of a bibliography documenting all that has been written in the English language on the history of sport and physical education in Britain It lists all secondary source material including reference works in a classified order to meet the needs of the sports historian

Biographical Research Ana Caetano, Magda Nico, 2022-03-30 Studying people's lives requires acknowledging the multiple entanglements between individual singularity and processes of social patterning This book testifies how challenging and creative the study of these connections can be It gathers international contributions that show in imaginative ways how a person's life or specific domains of existence can be observed tackled and analysed across time This volume reveals the potential of biographical research in the production of social theory in the development of methodological innovation in giving voice and protagonism to people and in the understanding of the social unfolding of their lives It is a testimony of a vibrant and youthful field with a long tradition in social sciences and with numerous connections with other study areas namely the life course approach The different chapters illustrate how the challenges posed by this type of research focused on the individual level of analysis are particular and what creative responses are required to continue analysing the link between biography and society The chapters in this book were originally published as a special issue of the journal *Contemporary Social Science*

Biographical Life Course Research Ann Nilsen, 2023-12-13 This open access book explores an approach that connects individual and societal processes throughout history and shifting trends in sociological perspectives influenced by C Wright Mills theories of time and temporality It traces its origins from American pragmatist thought and Chicago qualitative sociology in the early 20th century to the revival of biographical research in European and American sociology during the 1970s The book shows empirical studies from this vibrant research approach can bridge methodological gaps between qualitative and quantitative biographical studies applicable to various topics like class gender ethnicity and intergenerational dimensions

Biographical Research and New Social Architectures Lyudmila Nurse, Maggie O'Neill, Lisa Moran, 2024-04-23 What are the building blocks of the new societal architectures after COVID 19 What are the evolving lifestyle patterns social connections and relationality and what can biographical research bring to explore these unprecedented societal circumstances This first book in the new series *Advances in Biographical Research* focuses on the place of biographical research in analysing and shaping social futures characterised by physical distancing and isolation social fragmentation trauma and vulnerability including breaks in biographical trajectories Written by experienced and early career researchers it demonstrates how biographical research responds to new societal architectures theoretically and empirically

Biographical Research and the Meanings of Mothering Lyudmila Nurse, Lisa Moran, Kateřina Sidiropulu-Janků, 2023-09-14 What does mothering mean in different cultures and societies This book extensively applies biographical and narrative research methods to mothering from international perspectives This edited

collection engages with changing attitudes and approaches to mothering from women's individual biographical experiences illuminating how socially anticipated tasks of mothering shaped through interlinking state media religious beliefs and broader society are reflected in their identities and individual life choices Considering trust rapport reflexivity and self care this collection advances methodological practice in the study of mothers carers and childless women's lives **"Through Their Eyes..." - Biographical Research in the Digital Age** Björn Siegel, Andrea Sinn, Jay Howard Geller, Margarete Myers Feinstein, Nils Roemer, Sylwia Papier, Tabea Henn, Gerald Lamprecht, Marco Jandl, Andreas Heusler, Maximilian Strnad, Renate Evers, Seth Bernstein, Richard I. Cohen, Elena Hoffenberg, Morgan Morales, Avner Ofrath, Thomas Varkonyi, Anastasiia Strakhova, 2025-05-06 PaRDeS Journal of the Association for Jewish Studies in Germany 30 Biographical studies have always been central to the field of history but the relevance of biographical research seems to have increased in recent years calling for a deeper analytical study and a critical re evaluation of the newly developing biographical turn Especially in an increasingly digitized world including in academia life stories seem to offer new perspectives through which personal narratives cultural phenomena or literary works can be examined understood and presented Furthermore these sources raise new questions about the interests and perspectives of the author's the reliability and subjectivity of the individual as well as the constructiveness and authenticity of associated texts and sources While these questions might be universal they are inherent in Jewish history and culture The worldwide spread of digitization offers answers to some of these questions but also leads to new demands and difficulties in the study of biographies Therefore in the digital age biographical research is a complex but promising method for expanding knowledge about phenomena such as Jewish forced migration the Holocaust the development of diasporas exiles and transnational networks but also questions of acculturation representation remembrance and the formation of memory **The Biographical Turn** Hans Renders, Binne de Haan, Jonne Harmsma, 2016-09-13 The Biographical Turn showcases the latest research through which the field of biography is being explored Fifteen leading scholars in the field present the biographical perspective as a scholarly research methodology investigating the consequences of this bottom up approach and illuminating its value for different disciplines While biography has been on the rise in academia since the 1980s this volume highlights the theoretical implications of the biographical turn that is changing the humanities Chapters cover subjects such as gender religion race new media and microhistory presenting biography as as a research methodology suited not only for historians but also for explorations in areas including literature studies sociology economics and politics By emphasizing agency the use of primary sources and the critical analysis of context and historiography this book demonstrates how biography can function as a scholarly methodology for a wide range of topics and fields of research International in scope The Biographical Turn emphasizes that the individual can have a lasting impact on the past and that lives that are now forgotten can be as important for the historical narrative as the biographies of kings and presidents It is a valuable resource for all students of biography history and historical theory

Library of the World's Best Literature: Biographical dictionary Charles Dudley Warner, Hamilton Wright Mabie, Charles Henry Warner, Lucia Isabella Gilbert Runkle, 1897

Around of seniors' memories. The biographical research on the educational paths of European seniors Aleksandra Marcinkiewicz, 2014-12-20 Nic nie wpisano

Encyclopedia of Curriculum Studies Craig Kridel, 2010-02-16 The Encyclopedia of Curriculum Studies provides a comprehensive introduction to the academic field of curriculum studies for the scholar student teacher and administrator The study of curriculum beginning in the early 20th century served primarily the areas of school administration and teaching and was seen as a method to design and develop programs of study The field subsequently expanded to draw upon disciplines from the arts humanities and social sciences and to examine larger educational forces and their effects upon the individual society and conceptions of knowledge Curriculum studies has now emerged to embrace an expansive and contested conception of academic scholarship while focusing upon a diverse and complex dynamic among educational experiences practices settings actions and theories in relation to personal and institutional needs and interests The Encyclopedia of Curriculum Studies serves to inform and to introduce terms events documents biographies and concepts to assist the reader in understanding aspects of this rapidly changing field of study Representative topics include Origins definitions dimensions and variations on Curriculum Studies Curriculum development and design for schools Curricular purpose implementation and evaluation Contemporary issues e g standards tests and accountability Curricular dimensions of teaching and teacher education Interdisciplinary perspectives on institutionalized curriculum Informal curricula of homes mass media workplaces organizations and relationships Impact of race class gender health belief appearance place ethnicity language Relationships of curriculum and poverty wealth and related factors Modes of curriculum inquiry and research Curriculum as cultural studies exploring the formation of identities and possibilities Corporate state church and military influence as curriculum Global and international perspectives on curriculum Curriculum organizations journals and resources Summaries of books and articles on curriculum studies Biographic vignettes of key persons in curriculum studies Relevant photographs

Biography and Education Michael Erben, 2005-08-12 Over recent years biographical studies have gained an increasingly

important place in academic study The two are inextricably linked Education uses biography in teaching and in biography education features strongly as a formative stage in personal development This book elaborates on the analytical work that has drawn attention to biography and education and seeks to expand the understanding of lives in educational contexts Mainstream sociology has been quick to embrace this treatment of individuals as biographical appearances but it is even more relevant in the field of education

Personal Agency at the Swedish Age of Greatness 1560-1720 Petri

Karonen,Marko Hakanen,2017-12-08 Internationally the case of early modern Sweden is noteworthy because the state building process transformed a locally dispersed and sparsely populated area into a strongly centralized absolute monarchy and European empire at the beginning of the 17th century This anthology provides fresh insights into the state building process in Sweden During this transitional period many far reaching administrative reforms were carried out and the Swedish state developed into a prime example of the early modern powerstate The contributors approach Sweden s rise to greatness from the point of view of personal agency In early modern studies agency has long remained in the shadow of the study of structures and institutions This novel approach enables us to expose the difficulties setbacks and false steps that the administration had to deal with State building was a more diversified and personalized process than has previously been assumed Numerous individuals were also crucially important actors in the process and that development itself was not straightforward progression at the macro level but was intertwined with lower level actors Each chapter in this volume employs partially different methods depending on the source material and subject This means that both qualitative and quantitative material is combined different ways of making sense of it i e research traditions are brought together and a multi method design is used in analyzing source material One of the central methods is the systematic use of previous biographical research We want to give the individuals and their actions under discussion a background that reflects the contemporary structures of individual life cycles With the existing biographical research it is possible to create a comprehensive set of data that provides the general outlines of individual lives or the career tracks of various estates or social groups and even to construct collective biographies of certain groups

Interpretive Social Research Gabriele Rosenthal,2018 This volume is a clear introduction to methods of data collection and analysis in the social sciences with a special focus on interpretive methods based on a logic of discovering hypotheses and grounded theories The chief methods presented are participant observation open interviews and biographical case reconstruction The special advantages of interpretive methods as against other qualitative methods are revealed by comparing them to content analysis Empirical examples show how the methods presented can be implemented in practice and concrete problems connected with conducting empirical research are discussed By presenting individual case studies the author shows how to apply the principle of openness when collecting empirical data whether through interviews or observations and she offers rules for analysis based on the principles of reconstruction and sequentiality

The Biographical Treasury; a Dictionary of Universal

Biography Samuel Maunder,1882 **Biography and Turning Points in Europe and America** Karla B. Hackstaff,Feiwei Kupferberg,Catherine Négroni,2012 This sociological collection advances the argument that the concept of a turning point expands our understanding of life experiences from a descriptive to a deeper and more abstract level of analysis It addresses the conceptual issue of what distinguishes turning points from life transitions in general and raises crucial questions about the application of turning points as a biographical research method Biography and turning points in Europe and America is all the more distinctive and significant due to its broad empirical database The anthology includes authors from ten different countries providing a number of contexts for thinking about how turning points relate to constructions of meaning shaped by globalization and by cultural and structural meanings unique to each country The book will be useful across a wide range of social sciences and particularly valuable for researchers needing a stronger theoretical base for biographical work

Library of the World's Best Literature, Ancient and Modern: Biographical dictionary Charles Dudley Warner,1898 Handbook of Qualitative and Visual Methods in Spatial Research Anna Juliane Heinrich,Séverine Marguin,Angela Million,Jörg Stollmann,2024-07-08 Listening experiencing drawing or interpreting spaces narratives experiences visualizations and discourses can be helpful for the empirical investigation of spaces This interdisciplinary handbook presents a broad spectrum of established methods and innovative method development to capture and understand different facets of spaces Instructive explanations and concrete examples make the varied qualitative methods of spatial research understandable and applicable across disciplines The theoretical and methodological aspects of qualitative spatial research form the framework of this handbook **SAGE Handbook of Mixed Methods in Social & Behavioral Research** Abbas Tashakkori,Charles Teddlie,2021-06-17 Surveying the differing viewpoints and disciplinary approaches to using mixed methods this volume helps readers explore the answers to a wide range of key questions in the field including Can using mixed methods offset the disadvantages that certain methods have by themselves What criteria can a researcher use to select the best mixed methods design for his or her project and What are the points of agreement and controversy regarding design issues in mixed methods research This breakthrough Second Edition containing all new chapters examines all aspects of mixed methods research across a variety of disciplines Key Features Covers all aspects of inquiry from conceptualizing research to selecting methods analyzing and interpreting data and reporting findings Draws on the work of a mix of internationally recognized researchers as well as new and emerging researchers to provide a diversity of perspectives Gives specific examples from a wide range of disciplines to help readers understand the issues and controversies in this evolving area Presents rich material for discussion and new ideas for implementing mixed methods research to provide readers with a cutting edge resource Provides pedagogical tools such as learning objectives discussion questions and exercises and extensive cross referencing *Biography* Nigel Hamilton,2009-06-30 For what purpose and for whom has biographical pursuit endured and how does it play such a contested popular role in contemporary Western culture from biopics to blogs

memoirs to docudramas Award winning biographer Hamilton addresses these questions in an incisive and vivid narrative that will appeal to students of human nature and self representation across the arts and sciences

Yeah, reviewing a books **Biographical Studies** could ensue your near associates listings. This is just one of the solutions for you to be successful. As understood, exploit does not suggest that you have astonishing points.

Comprehending as without difficulty as treaty even more than further will allow each success. adjacent to, the statement as capably as insight of this Biographical Studies can be taken as skillfully as picked to act.
