Meaningful Places Rachel McLean Sailor,2014-03-01 The early history of photography in America coincided with the Euro American settlement of the West This thoughtful book argues that the rich history of western photography cannot be understood by focusing solely on the handful of well known photographers whose work has come to define the era Art historian Rachel Sailor points out that most photographers in the West were engaged in producing images for their local communities These pictures didn't just entertain the settlers but gave them a way to understand their new home Photographs could help the settlers adjust to their new circumstances by recording the development of a place revealing domestication alteration and improvement The book explores the cultural complexity of regional landscape photography western places and local sociopolitical concerns Photographic imagery like western paintings from the same era enabled Euro Americans to see the new landscape through their own cultural lenses shaping the idea of the frontier for the people who lived there

History of Blue Earth County and biographies of its leading citizens Thomas Hughes,1901-01-01

Yellowstone and the Great West Marlene Deahl Merrill,2003-09-01 Here for the first time in paperback is a fascinating daily record of Ferdinand Hayden's historic 1871 scientific expedition through Utah Idaho and Montana Territories to the Yellowstone Basin The expedition's findings quickly led Congress to establish Yellowstone as the world's first national park In addition to its scientific discoveries the expedition is famous for producing the earliest on site images of Yellowstone by its photographer William Henry Jackson and its guest artist Thomas Moran Marlene Deahl Merrill has woven together a compelling daily narrative from the field writings of three expedition members unpublished journals kept by mineralogist Albert Peale and geologist George Allen periodic reports by Peale to his hometown newspaper and letters from Hayden to his friend and mentor Spencer Baird at the Smithsonian Institution Enriching this narrative are Jackson's photographs of camp scenes and landscapes rare panoramic drawings by the party's topographical artist Henry Elliott maps an introduction and extensive annotations

Pictorial Photography and the American West, 1900-1950 Rachel Sailor,2022-10-04 This book is an investigation of the widely overlooked photographic style of pictorialism in the American West between 1900 and

1950 and argues that western pictorialist photographers were regionalists that had their roots in the formidable photographic heritage of the nineteenth century West. Driven by a wealth of textual and visual primary sources, the book addresses the West's relationship with the eastern centers of art in the early century, the diversity of practitioners such as women, Japanese Americans, Indigenous Americans, western rural workers, etc., and the style's final demise as it related to the modernism of Group F/64. Couched in the rhetoric of regionalism, it is a refreshing and innovative approach to an overlooked wealth of American cultural production. Carleton Watkins, Carleton E. Watkins, Weston J. Naef, Christine Hult-Lewis, 2011.
