Writing about Lives in Science Paola Govoni, Zelda Alice Franceschi, 2014-05-14 Following discussions on scientific biography carried out over the past few decades this book proposes a kaleidoscopic survey of the uses of biography as a tool to understand science and its context It offers food for thought on the role played by the gender of the biographer and the biographee in the process of writing To provide orientation in such a challenging field some of the authors have accepted to write about their own professional experience while reflecting on the case studies they have been working on Focusing on auto biography may help us to build bridges between different approaches to men and women s lives in science The authors belong to a variety of academic and professional fields including the history of science anthropology literary studies and science journalism The period covered spans from 1732 when Laura Bassi was the first woman to get a tenured professorship of physics to 2009 when Elizabeth H Blackburn and Carol W Greider were the first women s team to have won a Nobel Prize Women in Science Marilyn Bailey Ogilvie, 1986 From the ancient Greek physician Agamede to physicist and in science chemist Marie Curie in descriptions ranging from a single paragraph to several pages Women in Science profiles 186 women who as patronesses translators popularizers collectors illustrators inventors and active researchers made significant contributions to science before 1910 It adds a new dimension to the history of science by rescuing from obscurity the many women who overcame significant cultural barriers to pursue scientific objectives Was Marie Curie the only woman in science This question asked by a college student trying to write an essay on women in science planted a seed that grew over a decade of research into this informative and accessible biographical dictionary and bibliography At the heart of this

biographical dictionary are profiles of 186 women whose work is representative of the participation of women in the science of their time and culture Despite the increasing attention devoted to women s history in recent years our knowledge of many of these women is still meager and the book will serve as much as a guide to future research as a resource for historians librarians students and the general public The book opens with a substantial essay relating the general state of science and philosophical ideas about the role of women in society to the actual participation of women in science over the past two and a half millennia The classified annotated bibliography that completes the book can be used as a general research tool as well as a source of information about the particular women whose lives are sketched in this work The entries provide basic information on their subjects are referenced to primary sources and other materials in the bibliography and share an easily flowing narrative style Beyond that the length approach and focus of the entries have been allowed to vary within an appropriate range to suit the particular women whose lives they recount and whose achievements they evaluate The Cambridge History of Science: Volume 5, The Modern Physical and Mathematical Sciences David C. Lindberg, Mary Jo Nye, Roy Porter, Ronald L. Numbers, 2003 A new and comprehensive examination of the history of the modern physical and mathematical sciences
