On the Origin of Societies by Natural Selection Jonathan H. Turner, Alexandra Maryanski, 2015-11-17 Kinship religion and economy were not natural to humans nor to species of apes that had to survive on the African savanna Society from its very beginnings involved an uneasy necessity that often stood in conflict with humans ape ancestry these tensions only grew along with later more complex eventually colossal sociocultural systems. The ape in us was not extinguished nor obviated by culture indeed our ancestry continues to place pressures on individuals and their sociocultural creations Not just an exercise in history this pathbreaking book dispels many myths about the beginning of society to gain new understandings of the many pressures on societies today Sociophysiology W.M. Waid, 2012-12-06 Research on the interactions of social psychological and physiological processes has become a major focus of interest among psychologists in the past two decades The study of these interactions deserves a central role in psychology because bi ological determinants of complex behavior are often postulated or even assumed and conversely pathophysiological processes are often vaguely attributed to psy chological or social processes such as stress Sociophysiology was designed to bring together in one volume a representative sample of the broad range of work currently being done in the area of social psychophysiology Some of the chapters provide a review of the literature while others focus more specifically on current programs of research All provide new insights into basic relationships and several provide broad integrative schemes Sociophysiology can serve as a text for both graduate and higher level under graduate courses in psychophysiology or social psychology The authors represented provide an extensive

overview of the discipline and are in the forefront of stimulating further theoretical and empirical development The Archaeology of Human Ancestry Stephen Shennan, James Steele, 2005-08-15 Human social life is constrained and defined by our cognitive and emotional dispositions which are the legacy of our foraging ancestors But how difficult is it to reconstruct the social systems and cultural traditions of those ancestors The Archaeology of Human Ancestry provides a stimulating and provocative answer in which archaeologists and biological anthropologists set out and demonstrate their reconstructive methods Contributors use observations of primates and modern hunter gatherers to illuminate the fossil and artefactual records Thematic treatment covers the evolution of group size group composition and the emotional structure of social bonds sexual dimorphism and the sexual division of labour and the origins of human cultural traditions The Archaeology of Human Ancestry is an essential introduction to the subject for advanced undergraduates and researchers in archaeology and biological anthropology It will also be used by workers in psychology sociology and feminist studies as a resource for understanding human social origins Catalog of Copyright Entries. Eastern tribes indicating that the growth status of the social environment is improving Child health is an important topic in developing countries and as such the book features an overview of the growth and nutritional status of children aged 5 to 18 in India Characterization of Extended Uniform Distribution and its applications for quality control in industrial production and in yield data of tuber crops among others are discussed Characterizations of distribution in terms of performance rate are also proved There is also a contribution examining the past and present status of mangroves in Sunderban region of the Indian state of West Bengal from an ecological viewpoint using a growth curve model set up Lastly it includes a chapter on a statistical study of platelet size decomposition and related growth model Highlighting the importance of growth curve modelling as it applies to actual field data and encouraging more theoretically inclined statisticians to look into theoretical issues that need investigation the book disseminates applications of the growth curve model to real world problems and addresses related theoretical issues for the attention of theoreticians and practitioners Flintknapping John C. Whittaker, 2010-03-01 Flintknapping is an ancient craft enjoying a resurgence of interest among both amateur and professional students of prehistoric cultures John C Whitaker's bestselling guide is a detailed handbook on flintknapping written from the archaeological perspective of interpreting stone tools as well as making them Flintknapping contains detailed practical information on making stone tools Whittaker starts at the beginner level and progresses to discussion of a wide range of techniques He includes information on necessary tools and materials as well as step by step instructions for making several basic stone tool types Numerous diagrams allow the reader to visualize the flintknapping process and drawings of many stone tools illustrate the discussions and serve as models for beginning knappers Written for a wide amateur and professional audience Flintknapping will be essential for practicing knappers as well as for teachers of the history of technology experimental archaeology and stone tool analysis **Energopolitics** Dominic Boyer, 2019-05-09 Dominic Boyer examines the politics of wind power and how it is shaped by myriad factors from the legacies of settler colonialism and indigenous resistance to state bureaucracy and corporate investment while outlining the fundamental impact of energy and fuel on political power The Emergence of Civilization Charles Keith Maisels, 2003-12-16 The Emergence of Civilisation is a major contribution to our understanding of the development of urban culture and social stratification in the Near Eastern region Charles Maisels argues that our present assumptions about state formation based on nineteenth century speculations are wrong His investigation illuminates the changes in scale complexity and hierarchy which accompany the development of civilisation The book draws conclusions about the dynamics of social change and the processes of social evolution in general applying those concepts to the rise of Greece and Rome and to the collapse of the classical Mediterranean world Shaping Science with Rhetoric Leah Ceccarelli, 2010-11-15 How do scientists persuade colleagues from diverse fields to cross the disciplinary divide risking their careers in new interdisciplinary research programs Why do some attempts to inspire such research win widespread acclaim and support while others do not In Shaping Science with

Rhetoric Leah Ceccarelli addresses such questions through close readings of three scientific monographs in their historical contexts Theodosius Dobzhansky s Genetics and the Origin of Species 1937 which inspired the modern synthesis of evolutionary biology Erwin Schr dinger s What Is Life 1944 which catalyzed the field of molecular biology and Edward O Wilson s Consilience 1998 a so far not entirely successful attempt to unite the social and biological sciences She examines the rhetorical strategies used in each book and evaluates which worked best based on the reviews and scientific papers that followed in their wake Ceccarelli s work will be important for anyone interested in how interdisciplinary fields are formed from historians and rhetoricians of science to scientists themselves
