Biology and Conservation of Freshwater Cetaceans in Asia Randall R. Reeves, Brian D. Smith, Toshio Kasuya, 2000
This compilation brings together current information on the status of Asian freshwater cetacean populations the factors that have caused their recent declines and what can be done to improve their chances for survival Includes papers on water development issues the Yangtze River Dolphin Baiji the Ganges River Dolphin Susu and porpoises In the final section five papers address methods of studying freshwater cetaceans Threatened Freshwater Animals of Tropical East Asia David Dudgeon, 2002-08-04 This book offers a comprehensive account of the current state of inland waters in tropical and subtropical East Asia exploring a series of case studies of freshwater fish reptiles amphibians birds mammals and water bodies at particular risk The book highlights the rich freshwater biodiversity of tropical East Asia and draws attention to the various threats it faces due to human activities and rapid environmental change It addresses the question of whether the contributions of these animals and habitats or biodiversity in general to ecosystem functioning and service provision provide sufficient basis for arguments supporting nature conservation Drawing on instances from the rivers and lakes of tropical East Asia the book also asks whether the benefits accruing from intact ecosystems are likely to be enough to ensure their preservation If the answer to either or both these questions is no then what are the prospects for freshwater biodiversity in rapidly changing tropical East Asia This book will be of interest to students and scholars of biodiversity conservation freshwater ecology ecosystem services and Asian Studies An Introduction to Marine Mammal Biology and Conservation Simmonds, M.P., Bauer, A., Parsons, E.C.M., Wright, A.J., McCafferty, D., 2013 The charismatic mammals that live in the ocean are a constant source of interest both for scientists and our society at large Their biology behavior and conservation are of utmost importance as a vast number of species are currently threatened Intended for the upper level undergraduate or graduate student within biology marine biology or conservation environmental science An Introduction to Marine Mammal Biology and Conservation provides a broad introduction to marine mammal biology using cutting edge information and student friendly learning tools The text begins with chapters on the evolution and classification of marine mammals and their general biology It moves on to discuss the behavior and ecology of different groups of marine mammals such as polar bears otters and cetaceans Part 3 dives into many different conservation issues facing marine mammals as well as discussions on how they can be addressed Closing chapters provide information on how scientists study marine mammals how society can enjoy observing the animals while making sure they are preserved and a word to students looking to pursue a career with marine mammals Helpful Sidebars are included throughout to refresh basic biological information Includes hot topic discussion boxes written by top researchers in the field Point Counterpoints on controversial issues make for great in class discussion Intended for the upper level undergraduate or graduate course within biology marine biology or conservation environmental science 2013 350 pages *Biological Resources of Water* Sajal Ray, 2018-04-25 The book is divided into two sections and

represents the current trend of research in aquatic bioresource. In the section Biology Ecology and Physiological Chemistry high impact articles are contributed on reproduction population genetics evolution biodiversity biology and ecology of different aquatic faunas. Physiological chemistry of lipid bioactive pharmaceuticals and chemical ecological aspects of aquatic organisms were discussed. In the section entitled Conservation and Sustainable Management authors highlighted conservation and management related issues of various bioresources in different regions of the earth. The book mentions the biological ecological physiological and genetic significance of aquatic organisms with resource potential. The authors stressed on rational utilisation and management of bioresource ensuring minimal damage of the aquatic ecosystem. This book would provide a direction towards sustainable ecological management of bioresource.

The status and distribution of freshwater biodiversity in Indo-Burma, 2012. *Contingent Valuation of Yangtze Finless Porpoises in Poyang Lake, China* Yanyan Dong, 2012-08-11. This book presents the findings of the study and offers analysis of both its methodological and policy related implications. On the methodology side it assesses and validates the valuation workshop approach appraises the effect of distance on willingness to pay and the influence of the respondents ability to pay. From a policy perspective the book examines the attitudes and preference of respondents on trade offs between economic growth and ecological use.

Handbook of Himalayan Ecosystems and Sustainability, Volume 2 Bikash Ranjan Parida, Arvind Chandra Pandey, Mukunda Dev Behera, Navneet Kumar, 2022-11-22. Volume 2 Handbook of Spatio Temporal Monitoring of Water Resources and Climate is aimed to describe the current state of knowledge and developments of geospatial technologies Remote Sensing and Geographic Information Systems for assessing and managing water resources under climate change. It is a collective achievement of renowned researchers and academicians working in the Hindu Kush Himalayan HKH mountain range. The HKH region is a part of the Third Pole outside the polar regions due to its largest permanent snow cover. Importantly the Himalayan belt is geologically fragile and vulnerable to geohazards e.g. landslides land subsidence rockfalls debris flow avalanches and earthquakes. Therefore critical assessment and geospatial solutions are indispensable to safeguard the natural resources and human beings in the Himalayas using space borne satellite datasets. This book also showcases various remote sensing techniques and algorithms in the field of urban sprawling urban microclimate and air pollution. The potential impacts of climate change on the cryosphere and water resources are also highlighted. This comprehensive Handbook is highly interdisciplinary and explains the role of geospatial technologies in studying the water resources of the Himalayas considering climate change. Key Features: This book is unique as it focuses on the utility of satellite data for monitoring snow cover variability snowmelt runoff glacier lakes avalanche susceptibility and flood modeling. Explain how Remote Sensing techniques are useful for mapping and managing the morphology and ecology of the Himalayan River. Addresses how geospatial technologies are valuable for understanding climate change impact on hydrological extremes the potential impact of land use land cover change LULC on hydrology and water resources management. It highlights the

impact of LULC changes on land surface temperature groundwater and air pollution in urban areas Includes contributions from global professionals working in the HKH region Readership The Handbook serves as a valuable reference for students researchers scientists Hydrologists hydro ecologists meteorologists geologists decision makers and all others who wish to advance their knowledge on monitoring and managing water resources and urban ecosystem using remote sensing in the HKH region considering climate change **WILDLIFE BIOLOGY : AN INDIAN PERSPECTIVE** GOUTAM KUMAR SAHA,SUBHENDU MAZUMDAR,2017-07-01 his book attempts to cover the whole gamut of wildlife in India portraying its different dimensions and conservation Comprising thirteen chapters the book is enriched with principles theories methods and tools of wildlife study latest findings in Indian perspective including supportive data and photographs of wildlife species in their natural habitat inclusive of colour plates The chapters on Wildlife tools and techniques Special wildlife management programmes and Wildlife legislations and initiatives will certainly attract special attention of the readers The students who wish to pursue career in wildlife biology will be benefited with the book as it provides comprehensive understanding of the common field methods in wildlife research The present text is a pioneer effort of the authors to fulfill the course requirement of undergraduate and postgraduate students of wildlife biology and zoology The book will be equally valuable for the wildlife conservationists academicians and those who are actively engaged in wildlife research **Marine Mammal Biology** A. Rus Hoelzel,2009-04-01 This book provides a general introduction to the biology of marine mammals and an overview of the adaptations that have permitted mammals to succeed in the marine environment Each chapter written by experts in their field will provide an up to date review and present the major discoveries and innovations in the field Important technical advances such as satellite telemetry and time depth recorders will be described in boxes **Annual Report of the Marine Mammal Commission** United States. Marine Mammal Commission,2007 **Small Cetacean Conservation: Current Challenges and Opportunities** Randall William Davis,Jeremy Kiszka,Rob Harcourt,Mark Meekan,Lars Bejder,Diego Horacio Rodriguez,Karen A. Stockin,2022-09-23 **Marine Protected Areas for Whales, Dolphins, and Porpoises** Erich Hoyt,2012 Erich Hoyt s handbook is an admirable timely and highly welcome contribution Michael Stachowitsch Marine EcologyWhat does it mean to save the whales if their habitat is left unprotected Marine Protected Areas for Whales Dolphins and Porpoises is the definitive handbook on this pressing issue and the first to bridge the gap between the disciplines of marine protected areas and cetacean conservation It launches a new chapter in cetacean conservation with its investigation into the crucial habitat needs and protection requirements of some 84 species The author one of the world s foremost experts in this field takes you around the world to investigate the promising results of the latest conservation research and the strategies for obtaining marine protected areas in coastal waters and on the high seas using national legislation and regional and international conventions This is an essential introduction guide and reference work for those working to ensure a future for whales and dolphins **Elasmobranch Biodiversity, Conservation and Management** Sarah L. Fowler,Tim M.

Reed, Frances Dipper, 2002 The Darwin Elasmobranch Biodiversity Conservation and Management project in Sabah held a three day international seminar that included a one day workshop in order to highlight freshwater and coastal elasmobranch conservation issues in the region and worldwide to disseminate the result of the project to other Malaysian states and countries and to raise awareness of the importance of considering aspects of elasmobranch biodiversity in the context of nature conservation commercial fisheries management and for subsistence fishing communities These proceedings contain numerous peer reviewed papers originally presented at the seminar which cover a wide range of topics with particular reference to species from freshwater and estuarine habitats The workshop served to develop recommendations concerning the future prospects of elasmobranch fisheries biodiversity conservation and management This paper records those conclusions which highlight the importance of elasmobranchs as top marine predators and keystone species noting that permanent damage to shark and ray populations are likely to have serious and unexpected negative consequences for commercial and subsistence yields of other important fish stocks Marine Mammals Peter G.H. Evans, Juan Antonio Raga, 2012-12-06 Interest in marine mammals has increased dramatically in the last few decades as evidenced by the number of books scientific papers and conferences devoted to these animals Nowadays a conference on marine mammals can attract between one and two thousand scientists from around the world This upsurge of interest has resulted in a body of knowledge which in many cases has identified major conservation problems facing particular species At the same time this knowledge and the associated activities of environmental organisations have served to introduce marine mammals to a receptive public to the extent that they are now perceived by many as the living icons of biodiversity conservation Much of the impetus for the current interest in marine mammal conservation comes from Save the Whale campaigns started in the 1960s by environmental groups around the world in response to declining whale populations after over exploitation by humans This public pressure led to an international moratorium on whaling recommended in 1972 by the United Nations Conference on the Human Environment in Stockholm Sweden and eventually adopted by the International Whaling Commission ten years later This moratorium largely holds sway to this day and further protective measures have included the delimitation of extensive areas of the Indian Ocean 1979 and Southern Ocean 1994 as whale sanctuaries **An IUCN situation analysis of terrestrial and freshwater fauna in West and Central Africa**, 2015-06-01 This situation analysis was undertaken to inform responses to several resolutions made at the 5th World Conservation Congress in 2012 about the plight of large vertebrates in West and Central Africa It draws on a wide range of information to provide information on the status of these species important sites pressures legislation the effectiveness of protected areas and both community based incentives for conservation and institutional responses The overriding conclusion is of substantial wildlife declines and inadequate responses to either long standing pressures or rapidly escalating threats that have emerged in recent years **Rivers for life** Benazir Ahmed ,R. K. (Ravindra Kumar) Sinha, 2014-11-18 This publication includes papers that were part of thirty five

oral and nine poster presentations on various themes presented by eminent researchers practitioners at the international symposium on River Biodiversity Ganges Brahmaputra Meghna River System facilitated and supported by IUCN
