Biology Of Memory Symposium Bernried Ger:

The Biology of Memory Larry R. Squire, E. Lindenlaub, 1990 **Deutsche Nationalbibliographie und Bibliographie der im Ausland erschienenen deutschsprachigen Veröffentlichungen**, 1991 *Index Medicus*, 2002
Vols for 1963 include as pt 2 of the Jan issue Medical subject headings *Biology of Memory* G. Adam, 1969 **Biology of Memory** G. Adam, 1971-05-15 This international Symposium on the biology of memory was held in the Biological Research Institute at Tihany Lake Balaton in September 1969 The meeting covered nearly all biological aspects of recent research on elementary learning and memory storage This complex approach proved to be fruitful the lectures discussions as well as the the chairmen s concluding remarks reflected the main problems of this most exciting but rather controversial field of interdisciplinary research The volume contains the thirty papers read at the Symposium arranged in a different sequence than they had been presented during the four day meeting These changes made by the Editor were necessary in order to follow the logical succession of the different topics rather than the chronology of the lectures which was inevitably influenced by the itineraries of some of the participants from abroad Consequently the sequence of the concluding remarks had to be altered too The division of the book into six parts according to the different topics is tentative because of the multiple overlappings The discussions of the lectures had to be digested since the presentation of a complete record would have been difficult **Biology of Memory** György Ádám, 1973 **Biology of Memory** G. Ádám, 1973 *Biology of memory: proceedings of the symposium held at the Biological Research Institute in Tihany, 11 to 4 September, 1969, ed ,* *Biology of Memory* György Ádám, 1971 *Biology of Memory*, 1971 *Biology of Memory: Proceedings of The symposium Held at the Biological Research Institute in Tihany, 1 to 4 September, 1969, Organized by the Department of Comparative Physiology of Eotvos Lorand University, Budapest, Edited by G. Biology of Memory investigates the biological basis of memory and covers topics ranging from short and long term post perceptual memory to memory storage processes memory microstructures chemical transfer and neuronal plasticity The activity of neuronal networks in the thalamus of the monkey is also examined along with integrative functions of the thalamocortical visual system of the cat Comprised of 20 chapters this book begins with an overview of the mechanisms that inhibit or interfere with short and long term memory followed by a discussion on different retrieval mechanisms for short and long term memory The reader is then introduced to the role of short and long term memory in the formation retention and utilization of associations together with the link between memory and the medial temporal regions of the brain Subsequent chapters focus on anatomical and chemical changes in the brain during primary learning cellular models of learning and cellular mechanisms of plasticity in *Aplysia* trace phenomena in single neurons of hippocampus and mammillary bodies and plasticity in single units in the mammalian brain The book concludes with a description of Occam Omnium Gatherum Core Content Addressable Memory a computer program for a content addressable memory in the central nervous system This
