**Biological Micro- and Nanotribology** Matthias Scherge, Stanislav S. N. Gorb, 2013-11-11 Ever since the genesis of life and throughout the course its further evolution Nature has constantly been called upon to act as an engineer in solving technical problems Organisms have evolved a variety of well defined shapes and structures Although often intricate and fragile they can nonetheless deal with extreme mechanical loads Some organisms live attached to a substrate others can also move fly swim and dive These abilities and many more are based on a variety of ingenious structural solutions Understanding these is of major scientific interest since it can give insights into the workings of Nature in evolutionary processes Beyond

that we can discover the detailed chemical and physical properties of the materials which have evolved can learn about their use as structural elements and their biological role and function This knowledge is also highly relevant for technical applications by humans Many of the greatest challenges for today s engineering science involve miniaturization Insects and other small living creatures have solved many of the same problems during their evolution Zoologists and morphologists have collected an immense amount of information about the structure of such living micromechanical systems We have now reached a sophistication beyond the pure descriptive level Today advances in physics and chemistry enable us to measure the adhesion friction stress and wear of biological structures on the micro and nanonewton scale Furthermore the chemical composition and properties of natural adhesives and lubricants are accessible to chemical analysis Pattern Formation in Morphogenesis Vincenzo Capasso,Misha Gromov,Annick Harel-Bellan,Nadya Morozova,Linda Louise Pritchard,2012-10-02 Pattern Formation in Morphogenesis is a rich source of interesting and challenging mathematical problems The volume aims at showing how a combination of new discoveries in developmental biology and associated modelling and computational techniques has stimulated or may stimulate relevant advances in the field Finally it aims at facilitating the process of unfolding a mutual recognition between Biologists and Mathematicians of their complementary skills to the point where the resulting synergy generates new and novel discoveries It offers an interdisciplinary interaction space between biologists from embryology genetics and molecular biology who present their own work in the perspective of the advancement of their specific fields and mathematicians who propose solutions based on the knowledge grasped from biologists Security Protocols XVI Bruce Christianson,James Malcolm,Vashek Matyas,Michael Roe,2011-07-01 This book constitutes the thoroughly refereed post proceedings of the 16th International Workshop on Security Protocols SP 2008 held in Cambridge UK in April 2008 The 17 revised full papers presented together with edited transcriptions of some of the discussions following the presentations have gone through multiple rounds of reviewing revision and selection The theme of this workshop was Remodelling the Attacker with the intention to tell the students at the start of a security course that it is very important to model the attacker but like most advice to the young this is an oversimplification Shouldn t the attacker s capability be an output of the design process as well as an input The papers and discussions in this volume examine the theme from the standpoint of various different applications and adversaries **Plastic Green** Pia Ednie Brown,2009 Summary This book gathers a series of design research projects produced in 2007 that investigate alternative ways of constructing our relations with our environment Environment is a nebulous term that often implies nature It is implied here too but only in the sense of the nature of complex dynamic relations This includes that other called culture where we are embedded in environment we as complex sub entities both distinguishable and inseparable from an encompassing complex dynamic entity called environment If green has become another word for environmental or of the environment then we are part of its hue Provided by publisher
