Biomedical Ethics Reviews 1983 Biomedical Ethics Reviews:

Biomedical Ethics Reviews · 1983 James M. Humber, Robert F. Almeder, 1983-08-01 In the past decade the body of literature in the area of biomedical ethics has expanded at an astounding rate. Indeed on every major topic the literature in this area has multiplied and continues to do so so rapidly that one can easily fall behind important advances in our thinking about and understanding of the problems of contemporary bioethics. Awareness of this need to keep abreast of developments in the area prompted a recent reviewer of our earlier collection *Biomedical Ethics and the Law* Plenum 2nd edition 1979 to suggest that somebody ought to offer the service of providing a biennial review or update of the literature on the various central topics in bioethics. Thomas Lanigan of The Humana Press agreed with this last suggestion and so asked us to edit a series of texts consisting of previously unpublished essays on selected topics, a series that would seek to review and update recent literature on the central topics while also striving to advance distinctive solutions to the problems on the topics under discussion. Accordingly this first collection of previously unpublished essays focuses on the selected topics and the authors commissioned were charged with addressing the basic problems assigned while also bringing the reader either directly or indirectly up to date on the relevant literature. *Biomedical Ethics Reviews · 1984* James M. Humber, Robert F.

Almeder, 1984-11-25 This is the second volume of *Biomedical Ethics Reviews*, a series of texts designed to review and update the literature on issues of central importance in bioethics today. Five topics are discussed in the present volume. Section I, Public Policy and Research with Human Subjects, reviews the history of the moral issues involved in the history of research with human subjects and confronts most of the major legal and moral problems involving research on human subjects. Questions addressed in this section range from those concerning informed and proxy consent to those dealing with the adequacy of monitoring human research via institutional review boards (IRBs). Section II deals with a second broad topic in bioethics: The Right to Health Care in a Democratic Society. Here the concern is not merely that of determining whether there is a right to health care but also if there is such a right how it ought best be understood and implemented. To answer questions such as these we learn that one must distinguish legal from moral rights, assess the merits of various theories of rights, clarify the relationship between rights and duties, and attempt to determine a just method for the distribution of health care. Advances in medical technology often pose new legal and moral problems for legislators and health care practitioners.

Biomedical Ethics Reviews · 1987 James M. Humber, Robert F. Almeder, 1988-03-31 *Biomedical Ethics Reviews 1987* is the fifth volume in a series of texts designed to review and update the literature on issues of central importance in bioethics today. Three topics are discussed in the present volume: 1. Prescribing Drugs for the Aged and Dying, 2. Animals as a Source of Human Transplant Organs, and 3. The Nurse's Role, Rights and Responsibilities. Each topic constitutes a separate section in our text; introductory essays briefly summarize the contents of each section. Bioethics is by its nature interdisciplinary in character. Recognizing this fact the authors represented in the present volume have made every effort to minimize the use of

technical jargon At the same time we believe the purpose of providing a review of the recent literature as well as of advancing bioethical discussion is admirably served by the pieces collected herein We look forward to the next volume in our series and very much hope the reader will also *Biomedical Ethics Reviews* · 1988 James M. Humber, Robert F.

Almeder, 1989-04-06 *Biomedical Ethics Reviews* is an annual publication designed to review and update the literature on issues of central importance in bioethics today Ordinarily more than one topic is discussed in each volume of *Biomedical Ethics Reviews* This year however we have decided to devote the entire volume of *Biomedical Ethics Reviews* 1988 to discussion of one topic namely AIDS The rationale for this decision should be clear AIDS is arguably the most serious public health threat facing our nation today and the character of the disease is such that it creates special problems for ethicists philosophers theologians educators jurists health care professionals and politicians Indeed the questions that AIDS gives rise to are so numerous and complex that no one text could hope to treat them exhaustively Still if it is impossible in anyone text to deal with all of the perplexing difficulties that AIDS generates it nevertheless remains true that each addition to the AIDS literature contributes to our collective knowledge and in so doing brings us one step closer to resolving at least some of the problems associated with the disease We believe that the articles included in the present volume of *Biomedical Ethics Reviews* serve this purpose admirably and we hope the reader will agree James M Humber Robert F Almeder vii Contributors Ronald Carson Medical Humanities Institute University of Texas Medical Branch Galveston Texas David J Principles of Biomedical Ethics Tom L.
