The Inhabitable Flesh of Architecture Marcos Cruz, 2017-03-02 Today's architecture has failed the body with its long heritage of purity of form and aesthetic of cleanliness. A resurgence of interest in flesh especially in art has led to a politics of abjection completely changing traditional aesthetics and is now giving light to an alternative discussion about the body in architecture. This book is dedicated to a future vision of the body in architecture questioning the contemporary relationship between our Human Flesh and the changing Architectural Flesh. Through the analysis and design of a variety of buildings and projects, Flesh is proposed as a concept that extends the meaning of skin, one of architecture's most fundamental metaphors. It seeks to challenge a common misunderstanding of skin as a flat and thin surface. In a time when a pervasive discourse about the impact of digital technologies risks turning the architectural skin ever more disembodied, this book argues for a thick embodied flesh by exploring architectural interfaces that are truly inhabitable. Different concepts of Flesh are investigated not only concerning the architectural and aesthetic but also the biological aspects. The latter is materialised in form of Synthetic Neoplasms which are proposed as new semi-living entities rather than more commonly derived from scaled-up analogies between biological systems and larger-scale architectural constructs. These neoplastic creations are identified as partly designed object and partly living material in which the line between the natural and the artificial is progressively blurred. Hybrid technologies and interdisciplinary work methodologies are thus required and lead to a revision of our current architectural practice.

The New Paradigm in Architecture Charles Jencks, 2002-01-01 This book explores the broad issue of Postmodernism and tells the story of the movement that has changed the face of architecture over the last forty years. In this completely rewritten edition of his seminal work, Charles Jencks brings the history of architecture up to date and shows how demands for a new and complex architecture aided by computer design have led to more convivial, sensuous and articulate buildings around the world.

Non-Plan: Essays on Freedom, Participation and Change in Modern Architecture and Urbanism Jonathan Hughes, Simon Sadler, 2013-01-11 Non Plan explores ways of involving people in the design of their environments a goal which transgresses political categories of right and left Attempts to circumvent planning bureaucracy and architectural inertia have ranged from free market enterprise zones to self build housing and from squatting to sophisticated technologies of prefabrication Yet all have shared in a desire to let people shape the built environment they want to live and work in How can buildings better reflect the needs of their inhabitants How can cities better facilitate the work and recreation of their many populations Modernism had promised a functionalist approach to resolving the architectural needs of the twentieth century yet the design of cities and buildings often appears to confound the needs of those who use them their design and layout being highly regulated by restrictive legislation planning controls and bureaucracy Non Plan considers the theoretical and conceptual frameworks within which architecture and urbanism have

Building for Life Stephen R. Kellert,2012-09-26 Sustainable design has made great strides in recent years unfortunately it still falls short of fully integrating nature into our built environment Through a groundbreaking new paradigm of restorative environmental design award winning author Stephen R Kellert proposes a new architectural model of sustainability In *Building For Life* Kellert examines the fundamental interconnectedness of people and nature and how the loss of this connection results in a

diminished quality of life This thoughtful new work illustrates how architects and designers can use simple methods to address our innate needs for contact with nature Through the use of natural lighting ventilation and materials as well as more unexpected methodologies the use of metaphor perspective enticement and symbol architects can greatly enhance our daily lives These design techniques foster intellectual development relaxation and physical and emotional well being In the works of architects like Frank Lloyd Wright Eero Saarinen Cesar Pelli Norman Foster and Michael Hopkins Kellert sees the success of these strategies and presents models for moving forward Ultimately Kellert views our fractured relationship with nature as a design problem rather than an unavoidable aspect of modern life and he proposes many practical and creative solutions for cultivating a more rewarding experience of nature in our built environment Architects, Sustainability and the Climate Emergency Peter Raisbeck, 2022-11-16 Architects Sustainability and the Climate Emergency A Political Ecology chronicles how architects have shaped their ideas of the city and sustainability as knowledge of the climate emergency has unfolded Have architects responded to the climate crisis too slowly
