Current Mammalogy H.H. Genoways, 2013-06-29 When I first proposed a series entitled Current Mammalogy to the publishers they were reluctant to undertake such a project because they viewed the field of mammalogy as overly fragmented At first I found this idea to be difficult to accept however upon reflection I came near to agreeing with it Although many of us work on mammals we generally feel more allegiance to our specialties such as systematics genetics cytogenetics ecology behavior pest control paleontology wildlife management primatology and marine mammalogy than we do to the general field of mammalogy However rather than becoming discouraged from pursuing this project I became more certain than ever that a series such as Current Mammalogy was needed We hope to make this series a place where specialists can present their ideas not only to other members of their specialty but to those outside the area as well Hopefully this exchange of ideas will be a mutually beneficial exercise The Editorial Board of Current Mammalogy has decided to keep the range of subjects in each volume as broad as possible rather than concentrating on one or two topics in the hope that this will keep the series as useful as possible to the broadest range of readers
Advances in the Study of Behavior, 1998-05-14 Advances in the Study of Behavior continues to serve scientists across a wide spectrum of disciplines Focusing on new theories and research developments with respect to behavioral ecology evolutionary biology and comparative psychology these volumes foster cooperation and communication in these diverse fields
The Wolves of Denali L. David Mech, 2003-05-01 For more than nine years the wolves in Alaska's Denali National Park were the subject of intense research by a group of renowned scientists led by L David Mech The result of their work is the most comprehensive study of a population of wolves and their prey ever available This accessible fascinating and extensively illustrated book will appeal to researchers general readers and wolf enthusiasts across the world
Amazonian Indians from Prehistory to the Present Anna Roosevelt, 1994 Amazonia has long been a focus of debate about the impact of the tropical rain forest environment on indigenous cultural development This edited volume draws on the subdisciplines of anthropology to present an integrated perspective of Amazonian studies The contributors address transformations of native societies as a result of their interaction with Western civilization from initial contact to the present day demonstrating that the pre and postcontact characteristics of these societies display differences that until now have been little recognized

Agricultural Intensification and Prehistoric Health in the Valley of Oaxaca, Mexico Denise C. Hodges, 1989-01-01 Author Denise C Hodges examines the osteological remains from 14 archaeological sites in the Valley of Oaxaca Mexico in an attempt to address the relationship between the intensification of agriculture and the health status of the prehistoric population Volume 9 of the subseries Prehistory and Human Ecology of the Valley of Oaxaca

The Ecology of the Ancient Greek World Robert Sallares, 1991 A pioneering study in historical population biology this book offers the first comprehensive ecological history of the ancient Greek world It proposes a new model for treating the relationship between the population and the land centering on the distribution and abundance of living organisms

The Sociology-philosophy Connection Mario Bunge, 2017-07-12 Most social scientists and philosophers claim that sociology and philosophy are disjoint fields of inquiry Some have wondered how to trace the precise boundary between them Mario Bunge argues that the two fields are so entangled with one another that no demarcation is possible or indeed desirable In fact sociological research has demonstrably philosophical pre suppositions In turn some findings of sociology are bound to correct or enrich the philosophical theories that deal with the world our knowledge of it or the ways of acting upon it While Bunge s thesis would hardly have shocked Mill Marx Durkheim or Weber it is alien to the current sociological mainstream and dominant philosophical schools Bunge demonstrates that philosophical problematics arise in social science research A fertile philosophy of social science unearths critical presuppositions analyzes key concepts refines effective research strategies crafts coherent and realistic syntheses and identifies important new problems Bunge examines Marx s and Durkheim s thesis that social facts are as objective as physical facts the so called Thomas theorem that refutes the behaviorist thesis that social agents react to social stimuli rather than to the way we perceive them and Merton s thesis on the ethos of basic science which shows that science and morality are intertwined He considers selected philosophical

problems raised by contemporary social studies and argues forcefully against tolerance of shabby work in academic social science and philosophy alike

Social Behavior of Female Vertebrates Samuel Wasser, 2012-12-02 Social Behavior of Female Vertebrates focuses on the evolution of reproductive behavior in female vertebrates ranging from fish to birds and humans including issues of mate choice and other factors underlying female attitudes toward males It also looks at the evolution of mating systems the co evolution of the sexes sex role reversal reproductive competition between females maternal behavior and how females enhance the investment received by their offspring from others It also considers other social behaviors that influence the nature of affiliative associations between females Organized into three parts

encompassing 13 chapters this volume begins with an overview of behavioral biology and sources of variation in female reproductive success It then discusses the establishment and maintenance of sex biases sex differences mediated by sexual selection constraints on female choice in the mottled sculpin mate choice by females in sexual selection of bird song and female manipulation of male avoidance of cuckoldry behavior in the ring dove The reader is also introduced to the evolution of polyandry in shorebirds reproductive strategies in human females social and health seeking behaviors of Taiwanese women female roles in cooperatively breeding acorn woodpeckers altruism in coati bands cooperation and reproductive competition among female African elephants mate choice in matrilineal macaque groups and reproductive competition and cooperation among female yellow baboons This book is a valuable resource for scientists and behavioral biologists as well as lay people whose interests span a variety of fields Wolf-moose Interaction in Isle Royale National Park Rolf Olin

Peterson,1985 **Social and Behavioral Foundations of Public Health** Jeannine Coreil,2010 This book is intended as a core textbook for courses in public health that examines current issues in health from a social and behavioral science perspective It is a cross disciplinary course public health medical sociology health psychology medical anthropology and thus there are many ways to teach the course based on a particular instructor s perspective The authors wrote the book because they were dissatisfied with the way other texts apply social science to public health and found that many texts being used were from related fields such as medicine nursing or general health The authors are planning to do a major revision based on reviews they have collected and the reviews we have collected We believe the revised edition will essentially be a new text based on rich feedback They will include new theory new cases new research and a rich ancillary package They will also reduce the frameworks presented to make the book more readable to students **Companion Encyclopedia of the**

History of Medicine W. F. Bynum,Roy Porter,2013-06-20 This is a comprehensive work of reference which covers all aspects of medical history and reflects the complementary approaches to the discipline 72 essays are written by internationally respected scholars from many different areas of expertise **Arctic Adaptations** Igor Krupnik,2014-05-20

The common view of indigenous Arctic cultures even among scholarly observers has long been one of communities continually in ecological harmony with their natural environment In Arctic Adaptations Igor Krupnik dismisses the textbook notion of traditional societies as static Using information from years of field research interviews with native Siberians and archaeological site visits Krupnik demonstrates that these societies are characterized not by stability but by dynamism and significant evolutionary breaks Their apparent state of ecological harmony is in fact a conscious survival strategy resulting from a prolonged and therefore successful process of human adaptation in one of the most extreme inhabited environments in the world As their physical and cultural environment has changed fluctuating reindeer and caribou herds unpredictable weather patterns introduction of firearms and better seacraft Arctic communities have adapted by developing distinctive subsistence practices social structures and ethics regarding utilization of natural resources Krupnik s pioneering work

represents a dynamic marriage of ethnography and ecology and makes accessible to Western scholars crucial findings and archival data previously unavailable because of political and language barriers *Animal Dispersal* N.C. Stenseth, W.Z. Lidicker, 2012-12-06 4 1 1 Demographic significance Confined populations grow more rapidly than populations from which dispersal is permitted Lidicker 1975 Krebs 1979 Tamarin et al 1984 and demography in island populations where dispersal is restricted differs greatly from nearby mainland populations Lidicker 1973 Tamarin 1977 1978 Gliwicz 1980 clearly demonstrating the demographic significance of dispersal The prevalence of dispersal in rapidly expanding populations is held to be the best evidence for presaturation dispersal Because dispersal reduces the growth rate of source populations it is generally believed that emigration is not balanced by immigration and that mortality of emigrants occurs as a result of movement into a sink of unfavourable habitat If such dispersal is age or sex biased the demography of the population is markedly affected as a consequence of differences in mortality in the dispersive sex or age class Habitat heterogeneity consequently underlies this interpretation of dispersal and its demographic consequences although the spatial variability of environments is rarely assessed in dispersal studies **Carnivore Behavior, Ecology, and Evolution** John L. Gittleman, 2019-05-15 Because carnivores are at the top of the food chain their status is an important indicator of the health of the world ecosystem They are intensely interesting to zoologists and uniquely intriguing to the general public Devoted primarily to terrestrial carnivores this volume focuses on such themes as carnivore reintroduction programs and the ethics of studying carnivores drawing examples from a variety of species The need to evaluate new conceptual ideas and empirical data inspired this volume of *Carnivore Behavior Ecology and Evolution* a complement to the original book In the eight years since publication of the first volume conservation has emerged as a thematic imperative The study of carnivores has become even more important in raising and resolving crucial biological problems Differential rates of mortality in the giant panda and other endangered carnivores are now known to influence dispersal and life history patterns basic to these species survival Reintroduction efforts of the black footed ferret and the red wolf are establishing essential guidelines for preservation and management of endangered species Studies of the African lion and the dwarf mongoose illustrate the power of new genetic techniques of DNA fingerprinting for understanding the evolution of social behavior
