

Bird Atlas of Botswana

Of all the atlases on the birds of southern Africa, none will be more welcome than this one by **Huw Penry** on the birds of Botswana—a region of vast and hitherto ornithologically unexplored places, most notably the central Kalahari. It is thanks to the unstinting efforts of a small team of workers in Botswana, and to the meticulous keeping and analysis of records by the author, who also initiated and designed the project, that ornithologists, birders and conservationists now have a work which will serve as a baseline of bird distribution for years to come.

The *Bird Atlas of Botswana* summarizes records collected over the ten-year period from 1980 to 1990. The information is introduced by an extensive and well-researched introductory set of chapters covering the ornithology, geology, botany and geomorphology of Botswana. This sets the scene for the distribution maps which follow. These maps show not only the distribution in

Botswana but also seasonal abundance and movements there, as well as the distribution of each species throughout Africa. Rare or unconfirmed species are listed at the end and their actual or probable status mentioned.

The *Bird Atlas of Botswana* is a book for everyone interested in the birds of Africa, whether tourist, zoogeographer, ecologist or unconditional 'twitcher' mapping out a route which will turn up the greatest number of new species.
