Current Ornithology Richard Johnston, 2012-12-06 If it is still true that more than 80% of the ornithologists in North America are primarily interested or engaged in ecological studies on birds J R King and W J Bock Final Report of the Workshop on a National Plan For Ornithology 1978 then Volume 3 of Current Ornithology is preadapted for their consideration All but one article in this volume are somehow concerned with the ecological aspects of the biology of birds Variation in the scope of topical coverage is relatively broad and includes conservation reproduction behavior community structure and evolutionary ecology Three reviews concern the pervasive effects of man and industry on various bird populations of the world Risebrough provides a detailed description of the relationships between pesticides and bird populations Morrison assesses aspects of bird population numbers as indicators of environmental change and Temple outlines current research on endangered species The broad spectrum of reproductive ecology of birds is variously treated in this volume Jehl and Murray explore sexual selection and some of the resulting complexities in the evolution of sexual size dimorphism primarily in shorebirds Lawton and Lawton are concerned with the relationships between social behavior and breeding systems in which variation is found in the age at which reproduction is first undertaken Oring examines the wide ranging variation in polyandrous breeding systems in birds while Rohwer is concerned with adoption versus infanticide in birds and their relationships to reproductive fitness

Wisconsin Birdlife Samuel D. Robbins, 1991 As initially planned in 1939 by Owen J Gromme then curator of birds at the Milwaukee Public Museum Wisconsin Birdlife would not only describe and document every species of bird known to have visited this state but would also depict each species with his own original paintings During the next two decades Gromme concentrated primarily on the latter resulting in the separate publication in 1963 of his now classic Birds of Wisconsin Work on the present volume was assumed in the late 1960s by Samuel D Robbins whose labors of more than 20 years give us a veritable encyclopedia of the state's ornithological knowledge A complement and supplement to field guides picture books and recordings the book is designed to enlarge the reader's understanding and appreciation of statewide history abundance and habitat preference of every species reliably recorded in Wisconsin The volume opens with a summary of the ornithological history of the state and an exposition of its ecological setting The heart of Wisconsin Birdlife ensues detailed accounts of nearly 400 species with information on status population and distribution habitat migration dates breeding data and wintering presence followed by extensive discussion and commentary Dr James Hall Zimmerman Senior Lecturer in Landscape Architecture at the University of Wisconsin Madison provides a special discussion of bird habitats for the book In addition Wisconsin Birdlife features a comprehensive status and seasonal distribution chart a detailed habitat preference chart and an exhaustive bibliography The ultimate resource Wisconsin Birdlife belongs within easy reach of everyone from armchair appreciators and casual birdwatchers to ardent birders and professional ornithologists
