A Philosophical Defense of Affirmative Action Engelbert Ssekasozi,1999 Ssekasozi provides an ontological ethical foundation for the legal analysis on affirmative action arguing that there is a fine ethical distinction between human rights and civil rights in practice and that where discrimination is categorical in nature a categorical solution is required Chapters include a review of the literature a summary of relevant legal documents a detailed philosophical explication of the problem and discussion of types of discrimination with conclusions and directions for future research Double spaced text Annotation copyrighted by Book News Inc Portland OR

Computer-Based Testing Craig N. Mills,Maria T. Potenza,John J. Fremer,William C. Ward,2005-04-11

Although computer based tests CBT have been administered for many years improvements in the speed and power of computers coupled with reductions in their cost have made large scale computer delivery of tests increasingly feasible CBT is now a common form of test delivery for licensure certification and admissions tests Many large scale high stakes testing programs have introduced CBT either as an option or as the sole means of test delivery Although this movement to CBT has to a great extent been successful it has not been without problems Advances in psychometrics are required to ensure that those who rely on test results can have at least the same confidence in CBTs as they have in traditional forms of assessment This volume stems from an ETS sponsored colloquium in which more than 200 measurement professionals from eight countries and 29 states convened to assess the current and future status of CBT The formal agenda for the colloquium was divided into three major segments Test Models Test Administration and Test Analysis and Scoring Each segment consisted of several presentations followed by comments from noted psychometricians and a break out session in which presenters and discussants identified important issues and established priorities for a CBT research agenda This volume contains the papers

presented at the colloquium the discussant remarks based on those papers and the research agenda that was generated from the break out sessions Computer Based Testing Building the Foundation for Future Assessments is must reading for professionals scholars and advanced students working in the testing field as well as people in the information technology field who have an interest in testing **The Wiley Blackwell Handbook of the Psychology of the Internet at Work**
