**Biodiversity and Agriculture** Jitendra Srivastava, Nigel J. H. Smith, 1996-01-01 Agriculture's vital role in biodiversity conservation and management Definition of biodiversity Biodiversity's links to agriculture Biodiversity and agriculture on a collision course Rationale for the World Bank's involvement in biodiversity management Biodiversity in the Bank's agricultural and environmental portfolios Towards a strategy for biodiversity conservation in harmony with agricultural development Using the Agricultural, Environmental, and Food Literature Barbara S. Hutchinson, Antoinette Paris-Greider, 2002-07-17 This reference provides the groundwork tools and terminology required when conducting specialized searches for information and resources pertaining to traditional and emerging fields of agriculture The editors present 16 contributions from librarians and other information workers that offer information on research resources across the academic a **The Economics of Managing Crop Diversity On-farm** Edilegnaw Wale, 2012-06-25 The purpose of this book is to assess a variety of economic issues as they relate to agro biodiversity and show how addressing these issues can assist in agro biodiversity policy making This is illustrated using empirical data from some of the countries Ethiopia Nepal and Zambia which are part of the Genetic Resources Policy Initiative The empirical chapters apply the relevant economic methods including regression analysis choice experiments hedonic pricing contingent valuation and farm business income analysis The authors discuss the economics of managing crop diversity on farm in the context of crop variety attribute preferences farmers perception of agro biodiversity loss and value addition and marketing of the products of traditional crop varieties The case studies include detailed analysis of traditional varieties of groundnut maize rice sorghum and teff The results are relevant not only to GRPI countries but also to other countries concerned with the sustainable utilization of these resources Overall the studies illustrate how genetic resources issues can be integrated into rural development interventions

**Review and Planning Workshop of Systems Analysis and Impact Assessment Research , Integrating Biodiversity in Agricultural Intensification** Jitendra Srivastava, 1999 Southeastern Nigeria has some of the highest population densities in Sub Saharan Africa and one of the most threatened ecosystems on the continent the rainforests of West Africa As population pressure has mounted fallow periods have declined Instead of doggedly pursuing old strategies farmers shifted their agricultural practices in the face of mounting population pressures Farmers have intensified their traditional bush fallow cultivation system by adopting several strategies What agrobiodiversity is what it does and its importance to the environment and agriculture form the bases of discussion in this volume Agrobiodiversity is defined as biological resources that directly and indirectly contribute to crop and livestock production With the need to increase food production and to concurrently protect the environment a worldwide priority agrobiodiversity is arguably the single most important natural resource It is key to transforming agricultural systems that are currently wreaking havoc on wildlife and human health This report highlights case studies in which modern and traditional agriculture has successfully transformed to

enhance biodiversity without sacrificing yield Lessons learned from this review help to identify sound practices for designing and monitoring agricultural projects so that they improve rural incomes while safeguarding environmental assets particularly biodiversity Suggestions for sound practices include modifications of the policy environment and ways to strengthen research institutions and extension services so that agriculture can be intensified while better protecting and managing biological resources

**The Global Environmental Benefits of Land Degradation Control on Agricultural Land** Stefano Pagiola, 1999-01-01 This book focuses on the global effects of land degradation but emphasizes other important levels of land degradation at the field level it may result in reduced productivity at the national level it may cause flooding and sedimentation and at the global level it can contribute to climate changes damaging bio diversity and international waters The effects on climate changes are explored and the report questions the extent to which land degradation on agricultural land affects climate change Does it increase emissions of greenhouse gases Does it affect land s capacity to serve as a carbon sink Can appropriate management enhance both land s productivity and its capacity to store carbon The carbon cycle in soils is analyzed indicating land degradation is likely to reduce the ability of soils to serve as carbon sink and release stored carbon into the atmosphere and bio diversity effects are likely to be adverse Global benefits of land degradation control include afforestation to allow increased carbon sequestration and provide adequate bio diversity habitats and community based wildlife management can provide alternatives to some marginal areas Although integrating global dimensions into land degradation control projects may reverse the field level or national problems it is causing difficulties and constraints will likely contribute to the failure of these projects

Damania, 2002-10-29 One of the critical issues of our time is the dwindling capacity of the planet to provide life support for a large and growing human population Based on a symposium on ecosystem health Managing for Healthy Ecosystems identifies key issues that must be resolved if there is to be progress in this complex area such as Evolving methods for regional ecosystem health assessment employing complex adaptive systems coupled with adaptive technologies to permit accurate determination of changes in regional and global environments Issues and methods for assessing monitoring and managing diversity and its impact on human health in the context of climate change agroecosystems restoration of forests politics culture and tradition Leading thinkers in the field provide a coherent synthesis and a benchmark for the practice of this emerging field worldwide The more than 100 peer reviewed papers are grouped into three major parts The first Emerging Concepts explores the diverse meanings of ecosystem health within ecological socio economic and human health perspectives and the linkages to related concepts such as ecological integrity sustainable development and ecological

footprints The second part Issues and Methods introduces methods for assessing and monitoring ecosystem health including strategies for gaining political and stakeholder input and support for science based ecosystem management The final part Case Studies reports experiences of interdisciplinary teams grappling with specific issues in a variety of aquatic and terrestrial ecosystems      Multifunctional Rural Land Management Floor Brouwer,2012 The increasing demand for rural land and its natural resources is creating competition and conflicts Many interested parties including farmers nature conservationists rural residents and tourists compete for the same space Especially in densely populated areas agriculture recreation urban and suburban growth and infrastructure development exert a constant pressure on rural areas Because land is a finite resource spatial policies which are formulated and implemented to increase the area allocated to one use imply a decrease in land available for other uses As a result at many locations multi purpose land use is becoming increasingly important This notion of multi purpose land use is reflected in the term multifunctionality This volume provides insights into viable strategies of sustainable management practices allowing multiple functions sustained by agriculture and natural resources in rural areas It shows how the rural economy and policies can balance and cope with these competing demands and includes numerous case studies from Europe North America and developing countries      Experiences with Integrated-conservation Development Projects in Asia Malcolm Jansen,Susan Shen,1997-01-01 China is in the throes of two transitions from a command economy to a market based one and from a rural agricultural society to an urban industrial one So far both transitions have been spectacularly successful China is the fastest growing economy in the world with per capita incomes more than quadrupling since 1978 achieving in two generations what took other countries centuries Although swift growth and structural change have resolved many problems they also have created new challenges employment insecurity growing inequality stubborn poverty mounting environmental pressures rising costs of food self sufficiency and periods of macroeconomic instability stemming from incomplete reforms Unmet these challenges could undermine the sustainability of growth and China s promise could fade China 2020 a seven volume set examines China s recent history where it is today and the path it should follow during the first two decades of the 21st century The volume in the set entitled At Chinas Table Food Security Options focuses on how China will avoid national chronic food insecurity The report evaluates solutions such as food storage and other alternatives for addressing the problems of transitory food insecurity from drought or other seasonal calamity It discusses national food security constraints and the investments required to maintain total factor productivity of 1 0 percent per year The study also models and projects food supply and demand for 2020      **Labor Markets in Transition in Central and Eastern Europe, 1989-1995** Christine Allison,Dena Ringold,1996-01-01 Content Description Includes bibliographical references p      The Role of Government and the Private Sector in Fighting Poverty George Psacharopoulos,Xuan Nguyen Nguyen,1997-01-01 Annotation World Bank Technical Paper No 346 Although private sector expansion may relieve governments from certain tasks it also imposes new responsibilities This paper examines the relative

roles of the private and public sectors in the implementation of a two track strategy for poverty reduction The first track requires sustained broad based economic growth that makes efficient use of labor the main asset owned by the poor The second promotes investment in people or human resources by ensuring basic social services that are accessible to the poor Individual chapters examine social safety nets and issues in education health population and nutrition *New Dimensions in Agroecology* Anil Shrestha, David Clements, 2004-11-11 Reduce the environmentally negative aspects of industrial agriculture with an ecologically sound philosophy *New Dimensions in Agroecology* explores the latest developments in the emerging science of agroecology focusing on how these new concepts and cutting edge tools will help minimize the impact of agriculture on the environment and foster *Agricultural Biodiversity and Biotechnology in Economic Development* Joseph Cooper, Leslie Lipper, David Zilberman, 2006-05-27 The topics addressed in this book are of vital importance to the survival of humankind Agricultural biodiversity encompassing genetic diversity as well as human knowledge is the base upon which agricultural production has been built and protecting this resource is critical to ensuring the capacity of current and future generations to adapt to unforeseen challenges Agricultural biodiversity underpins the productivity of all agricultural systems and is particularly important for poor and food insecure farmers who maintain highly diverse production systems in response to the marginal and risky production conditions they operate under Understanding the importance of agricultural biodiversity in the livelihoods of the food insecure and enhancing its performance through the use of a variety of tools including biotechnology is a critically important issue in the world today where over 800 million people have insufficient food to meet minimum needs A strong theme that runs throughout the book is the importance of good public policy interventions to promote the provision of public goods associated with agricultural biodiversity conservation and directing biotechnology development to meet the needs of the poor The book's primary innovation is that it describes the relationship between biotechnology and plant genetic diversity and puts these in the context of agricultural development Both the conservation of plant genetic diversity and agricultural biotechnology have received extensive examination but the linkages between the two have not despite the apparently obvious relationship between the two **Thai Agriculture** Lindsay Falvey, 2000 The history science and social aspects of today's Thai agriculture is traced from hunters and gatherers through agro cities through State religious Empires and immigrating Tai to produce a sustainable agriculture The wet glutinous rice culture determined administrative structures in a pragmatic society which regularly produced a saleable surplus Continuing today these systems consolidated the importance of rice agriculture to national security and economic well being as Chinese and European influence benefited agribusiness and initiated the demand which would expand agriculture through population increase until accessible land was expended As agriculture declined in relative financial importance it continued to provide the benefits of employment crisis resilience self sufficiency rural social support and cultural custody Agricultural institutions evolved from a taxation and dispute resolution base to provide research education and technology transfer at levels below potential as they

supported commercial agriculture funded by credit Agribusiness expanded from the 1960s and small holders were partly viewed as a past relic which agribusiness could modernise Unique elements of Thai agriculture include irrigation technologies administrative structures based on water control global leadership in many agricultural commodities multinational agribusiness negotiating approaches potential for further increases from known technologies and an open culture which has embraced new ideas One of the world s few major agricultural exporters Thailand leads the world in rice rubber canned pineapple and black tiger prawn production and export the region in chicken meat export and several other commodities and feeds more the four times its own population from less intensive agriculture than its neighbours Poised to benefit from expansion in livestock demand poverty reduction and improved education research and legal and social systems evident in the recent Asian financial crisis will be considered with popular concern for socially sensitive alternatives for small holder farmers to co exist with commercial agriculture Thailand will likely remain one of the world s major agricultural countries in social environmental and economic terms for the foreseeable future as it addresses the continuing rural issues of poverty and inequity
