*Treatment* Frances Sommer Anderson, 2013-03 Bodies in Treatment is a challenging volume that brings into conceptual focus an unspoken dimension of clinical work the body and nonverbal communication that has long occupied the shadowy realm of tacit knowledge By bringing visceral sensory and imagistic modes of emotional processing to the forefront Editor Frances

Sommer Anderson and the contributors to this original collection expand the domain of psychodynamic engagement Working at the leading edge of psychoanalytic theory and practice and in the forefront of the integrative psychotherapy movement

Anderson has created a collaborative project that stimulates interdisciplinary dialogue on the developmental neurobiology of attachment the micro processing of interchanges between the infant and caregiver the neuroscience of emotional processing

and trauma body focused talking treatments for trauma and research in cognitive science Enlightened by experiencing body based treatments for thirty years Anderson reflects on the powerful impact of these interventions recounting attempts to

integrate her somatically informed discoveries into the talking frame Reaching further her contributors present richly informative accounts of how experiences in body based modalities can be creatively integrated into a psychoanalytic

framework of treatment Readers are introduced to specialized modalities such as craniosacral therapy and polarity therapy as well as to the adjunctive use of yoga the effectiveness of which can be grounded neurophysiologically Somatic

interventions are discussed in terms of the extent to which they can promote depth psychological change outside the
