**Biofilms in Medicine, Industry and Environmental Biotechnology** Piet Lens,V. O'Flaherty,A. P. Moran,P. Stoodley,T. Mahony,2003-04-30

Biofilms are of great practical importance for beneficial technologies such as water and wastewater treatment and bioremediation of groundwater and soil In other settings biofilms cause severe problems for example in 65% of bacterial infections currently treated by clinicians particularly those associated with prosthetics and implants accelerated corrosion in industrial systems oil souring and biofouling Until recently the structure and function of biofilms could only be inferred from gross measures of biomass and metabolic activity This limitation meant that investigators involved in biofilm research and application had only a crude understanding of the microbial ecology physical structure and chemical characteristics of biofilms Consequently opportunities for the exploitation and control of biofilms were very limited The past decade has witnessed the development of several new techniques to elucidate the structure and function of biofilms Examples include the use of molecular probes that identify different microbes in complex communities as well as their metabolic functions the use of microsensors that show concentration gradients of key nutrients and chemicals the use of confocal laser scanning microscopy to describe the physical structure of biofilms and the development of a new generation of mathematical models that allow for the prediction of biofilm structure and function However much progress remains to be made in efforts to understand control and exploit biofilms This timely book will introduce its readers to the structure and function of biofilms at a fundamental level as determined during the past decade of research including Extracellular polymers as the biofilm matrix Biofilm phenotype differential gene expression interspecies signalling Biofilm ecology Biofilm monitoring Resistance of biofilms to antimicrobial agents and Biofilm abatement Biofilms in Medicine Industry and Environmental Technology offers a holistic and multi disciplinary description of the topic including biofilm formation and composition but also biofilm monitoring disinfection and control All these aspects are presented from three points of views medical industrial and environmental biotechnological in a compact easy to read format

*Operational and Environmental Consequences of Large Industrial Cooling Water Systems* Sanjeevi Rajagopal,Henk A. Jenner,Vayalam P. Venugopalan,2012-01-07 The use of water for industrial purposes is of foremost importance It is used as a coolant and industrial activities dealing with power generation steel and iron paper and pulp and oil require very large amounts of water The industry therefore resorts to large scale abstraction of water from

natural water bodies This water is often treated with chemicals to combat operational problems like biofouling and corrosion Such withdrawal and subsequent discharge of large amounts of water have the potential to impart significant impact on the recipient water body The organisms drawn along with the cooling water as well as those residing at the discharge zone are subjected to a combination of mechanical thermal and chemical stress on a continuous basis Advances in Heat Transfer,1998-06-09 Advances in Heat Transfer is designed to fill the information gap between regularly scheduled journals and university level textbooks by providing in depth review articles over a broader scope than is allowable in either journals or texts Microbiologically Influenced Corrosion Handbook S Borenstein,1994-01-01 MIC microbiologically influenced corrosion is the deterioration of metal by corrosion processes that occur either directly or indirectly as a result of the activity of living organisms This handbook explains the interdisciplinary nature of MIC the roles of microbiology metallurgy and electro chemistry are interrelated and complex The text also looks at welding heat treatment and other metallurgical and process variables relate to corrosion resistance special emphasis being placed on MIC Case histories are included and the means of detection diagnosis and monitoring are discussed Prevention mitigation and replacement of MIC are also examined

**Fouling Organisms of the Indian Ocean** Rachakonda Nagabhushanam,2020-08-13 Marine fouling organisms attach permanently to ship hulls and underwater parts of offshore structures All maritime nations spend millions even billions of dollars to get rid of them Believing that a pooling of knowledge of all aspects of the basic biology of fouling organisms and a re examination of control technology methods are steps needed for the solution of this problem the aim of the book is to highlight recent advances in fouling control technology and at the same time provide basic information on the biology of fouling organisms found in the Indian Ocean The book begins by presenting an overview of research done in India on the marine fouling organisms and wood borers of the Indian Ocean It then moves through chapters dealing with the secession of fouling communities chemical cues in larval settlement epibiosis methods of fouling prevention functional morphology and distribution of foulers in Indian waters **Biofilms - Science and Technology** L. Melo,T.R. Bott,M. Fletcher,B.

**Microbiologically**

**Influenced Corrosion** Reza Javaherdashti,2008-02-20 Microbiologically influenced corrosion MIC is one of the greatest mysteries of corrosion science and engineering This book introduces a new approach to the basics of MIC and explains how to recognise understand mitigate and or prevent this type of corrosion The material covered will benefit professional and consultant engineers in power generating oil and gas and marine and mining industries It will also benefit researchers in a variety of fields Influence of Distribution System Infrastructure on Bacterial Regrowth Jonathan Clement,Catherine

Spencer,A. Capuzzi,Anne Camper,Kristin van Andel,Anne Sandvig,2004-01-01 This study has shown that higher levels of carbon supported greater biofilm growth and planktonic populations on the materials that were tested although the effect was most pronounced on iron pipe Utilities with significant amounts of iron pipe in their distribution systems may be faced with the greatest regrowth potential For utilities that also distribute water that is high in natural carbon this problem may be compounded Therefore reducing the organic carbon in the finished water may be effective for any utility wishing to reduce regrowth problems in their distribution system Other alternatives for utilities wishing to reduce biofilms in the distribution system can include any or all of the following replacing or relining iron pipe in the system increasing disinfectant and implementing effective corrosion control Originally published by AwwaRF for its subscribers in 2003 **A Modern**
