Cohen, Elena Hoffenberg, Morgan Morales, Avner Ofrath, Thomas Varkonyi, Anastasiia Strakhova, 2025-05-06 PaRDeS Journal of the Association for Jewish Studies in Germany 30 Biographical studies have always been central to the field of history but the relevance of biographical research seems to have increased in recent years calling for a deeper analytical study and a critical re evaluation of the newly developing biographical turn Especially in an increasingly digitized world including in academia life stories seem to offer new perspectives through which personal narratives cultural phenomena or literary works can be examined understood and presented Furthermore these sources raise new questions about the interests and perspectives of the author's the reliability and subjectivity of the individual as well as the constructiveness and authenticity of associated texts and sources While these questions might be universal they are inherent in Jewish history and culture The worldwide spread of digitization offers answers to some of these questions but also leads to new demands and difficulties in the study of biographies Therefore in the digital age biographical research is a complex but promising method for expanding knowledge about phenomena such as Jewish forced migration the Holocaust the development of diasporas exiles and transnational networks but also questions of acculturation representation remembrance and the formation of memory

Personal Agency at the Swedish Age of Greatness 1560-1720 Petri

Karonen, Marko Hakanen, 2017-12-08 Internationally the case of early modern Sweden is noteworthy because the state building process transformed a locally dispersed and sparsely populated area into a strongly centralized absolute monarchy and European empire at the beginning of the 17th century This anthology provides fresh insights into the state building process in Sweden During this transitional period many far reaching administrative reforms were carried out and the Swedish state developed into a prime example of the early modern powerstate The contributors approach Sweden's rise to greatness from the point of view of personal agency In early modern studies agency has long remained in the shadow of the study of structures and institutions This novel approach enables us to expose the difficulties setbacks and false steps that the administration had to deal with State building was a more diversified and personalized process than has previously been assumed Numerous individuals were also crucially important actors in the process and that development itself was not straightforward progression at the macro level but was intertwined with lower level actors Each chapter in this volume employs partially different methods depending on the source material and subject This means that both qualitative and quantitative material is combined different ways of making sense of it i.e. research traditions are brought together and a multi method design is used in analyzing source material One of the central methods is the systematic use of previous biographical research We want to give the individuals and their actions under discussion a background that reflects the contemporary structures of individual life cycles With the existing biographical research it is possible to create a comprehensive set of data that provides the general outlines of individual lives or the career tracks of various estates or social groups and even to construct collective biographies of certain groups

Interpretive Social Research Gabriele Rosenthal, 2018 This volume is a clear introduction to methods of data collection and analysis in the social sciences with a special focus on interpretive methods based on a logic of discovering hypotheses and grounded theories The chief methods presented are participant observation open interviews and biographical case reconstruction The special advantages of interpretive methods as against other qualitative methods are revealed by comparing them to content analysis Empirical examples show how the methods presented can be implemented in practice and concrete problems connected with conducting empirical research are discussed By presenting individual case studies the author shows how to apply the principle of openness when collecting empirical data whether through interviews or observations and she offers rules for analysis based on the principles of reconstruction and sequentiality

The Biographical Treasury; a Dictionary of Universal

Biography Samuel Maunder,1882 **Biography and Turning Points in Europe and America** Karla B. Hackstaff,Feiwei Kupferberg,Catherine Négroni,2012 This sociological collection advances the argument that the concept of a turning point expands our understanding of life experiences from a descriptive to a deeper and more abstract level of analysis It addresses the conceptual issue of what distinguishes turning points from life transitions in general and raises crucial questions about the application of turning points as a biographical research method Biography and turning points in Europe and America is all the more distinctive and significant due to its broad empirical database The anthology includes authors from ten different countries providing a number of contexts for thinking about how turning points relate to constructions of meaning shaped by globalization and by cultural and structural meanings unique to each country The book will be useful across a wide range of social sciences and particularly valuable for researchers needing a stronger theoretical base for biographical work
