argument Hegel Schopenhauer logic the philosophy of religion the philosophy of art socialism metaphysics and the principle of sufficient reason *Miracles and Wonders in the Middle Ages and Early Modern Period* Albrecht Classen, 2025-10-20

Despite the assumption that we live today in a rather rationalist and mechanized world there remain many aspects that neither medicine nor physics can fully explain The Catholic Church continues to pronounce individuals as saints because scientifically confirmed miracles are associated with them If we want to gain a solid understanding of the pre modern history of mentality emotions and everyday culture it proves to be highly revealing to examine what miracles and wonders had meant at that time both in the theological and medical field in the visual arts and literature As a matter of fact people both in the East and in the West have consistently flocked to pilgrimage sites all over the world in the hope that a miracle might happen and solve issues for them The contributors to this volume based on a symposium at the University of Arizona May 2024 approach this critically important topic from many different perspectives taking us from the early Middle Ages to the early modern age examining hagiographical medical literary and alchemical texts discussing both miracles and wonders as relevant themes in the public discourses Both the passage through Inferno and Purgatorio as the crucial pathway toward Paradiso and the experience of women s miraculous conception are identified as deeply impactful for the pre modern world and this both in Christian and Muslim cultures Studying miracles and wonders through a kaleidoscope of different materials and concepts makes it possible to gain a closer understanding of people s mindsets power structures and the debate between medicine and religion These topics were also greatly important in other cultures as several papers on Arabic medieval literature indicate Further pursuing this global issue we recognize easily that the separation line between the Middle Ages and the early modern period is only a modern construct and often not that helpful because the discourse on miracles and wonders has continued and influences even us today **The Palgrave Handbook of Islam in Africa** Fallou Ngom, Mustapha H. Kurfi, Toyin Falola, 2020-09-26 This handbook generates new insights that enrich our understanding of the history of Islam in Africa and the diverse experiences and expressions of the faith on the continent The chapters in the volume cover key themes that reflect the preoccupations and realities of many African Muslims They provide readers access to a comprehensive treatment of the past and current traditions of Muslims in Africa offering insights on different forms of Islamization that have taken place in several regions local responses to Islamization Islam in colonial and post colonial Africa and the varied forms of Jih d movements that have occurred on the continent The handbook provides updated knowledge on various social cultural linguistic political artistic educational and intellectual aspects of the encounter between Islam and African societies reflected in the lived experiences of African Muslims and the corpus of African Islamic texts **A Literary History of Medicine** Emilie Savage-Smith, Simon Swain, Geert Jan van Gelder, 2024-03-25 An online Open Access version of this work is also available from Brill A Literary History of Medicine by the Syrian physician Ibn Ab U aybi ah d 1270 is the earliest comprehensive history of medicine It contains biographies of over 432 physicians ranging from the ancient Greeks to

the author's contemporaries describing their training and practice often as court physicians and listing their medical works all this interlaced with poems and anecdotes These volumes present the first complete and annotated translation along with a new edition of the Arabic text showing the stages in which the author composed the work Introductory essays provide important background The reader will find on these pages an Islamic society that worked closely with Christians and Jews deeply committed to advancing knowledge and applying it to health and wellbeing
