Biology Angelo Marinucci, 2023-09-27 This book proposes the foundation of the relational approach to biology rejecting the
deterministic and reductionist approach of molecular biology Although biology has made enormous progress in the last
seventy years onto genesis is still conceived as a revelation of information DNA Recovering the geometric tradition relational
biology conceives scientific and epistemological tools cause probability space etc of science in a new way If probabilistic
biology and organicism still proposes a biology based on physics with a fundamental invariant relational biology is based on
variation its fundamental invariant is variation one of the most important elements of life This is an indispensable book for
academics who consider biology from a new theoretical approach in particular for those working in the domains of cancer

Oxnard, Leonard Freedman, 1998-01-22 This volume takes its subtitle from the theme of the ASHB meeting for 1996 Human
Adaptability Future Trends and Lessons from the Past The first paper is the annual conference lecture Human Evolution
Today Which Way Next delivered by Professor Maciej Hennenberg the newly appointed Wood Jones Professor at the
University of Adelaide This is followed by the transcripts of two papers resulting from a debate on Species and Human
Evolution also from the meeting The first is Species Concept in Palaeoanthropology by Colin Groves and the second The
Problem of Species in Hominid Evolution by Maciej Hennenberg There are also a series of individual papers Two of these are
shorter integrative pieces Philosophical Problems in Palaeoanthropology by Darren Curnoe and A Biological Basis for
Generative Learning in Science by Lynette Schavieren and Mark Cosgrove These are followed in turn by two proffered
papers on specific problems Patterns of Morphological Discrimination in the Human Talus a Consideration of the Case for

Negative Function by Robert Kidd and Charles Oxnard and The Specific Status of a new Siwalik Sivapithecine Specimen by David Cameron Rajeev Patnaik and Michelle Stevens The final contribution is one of the longer integrative papers which has characterised each of the prior volumes The Interface of Function Genes Development and Evolution Insights from Primate Morphometrics by Charles Oxnard , **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), *Perspectives on Human Sexuality* Anne Bolin,Patricia Whelehan,1999-01-01 Presents the first book length examination of both the biological and cultural factors in human sexuality Patterns of Human Growth Barry Bogin,2020-11-19 Discusses the biocultural and evolutionary factors that direct growth and intrinsic and extrinsic factors affecting individual development **Climate Change Resilience Across Societal Contexts** Tracey Skillington,Annalisa Setti,2025-10-13 This volume sets out to address current gaps in research thinking on how material and non material factors work in tandem to inhibit effective sustainable development transitions across differing world settings It will showcase a body of research that accounts for the experiences of cohorts residing in various world regions and provide the reader with a series of conceptual tools with which to understand major factors currently shaping responses to climate change In that it responds directly to calls by various international agencies for research communities to provide more detailed evidence of how climate change not only adds to existing societal burdens but also creates newer ones and critically reconsider strategies for realizing UN Sustainable Development Goals in ways that bring SDG 10 on inequalities and SDG 13 on climate action in particular together more strategically With a heavy emphasis on the need for communities to abandon many established socio cultural practices and adjust comprehensively to a series of new climate imperatives social environmental economic etc little attention is paid to the potential risks these changes pose to the health and wellbeing of vulnerable cohorts As these risks may constitute considerable barriers to long term resilience building and effective climate actions the difficulties encountered by different communities need to be better understood and accounted for in climate change research This volume sets out to examine these issues and consider more equitable approaches to climate change resilience building
