

## EVOLUTIONARY PERSPECTIVE

*-seeks to identify behavior in today's humans that is the result of our genetic inheritance from our ancestors.*

\* grew out of the work of Charles Darwin who argued in *The Origin of the Species* that a process of natural selection creates traits in a species that are adaptive to their environment

\* argues that our genetic inheritance determines not only such physical traits as skin and eye color, but certain personality traits and social behaviors

**Evolutionary Perspectives on Human Sexual Psychology and Behavior** Viviana A. Weekes-Shackelford, Todd K. Shackelford, 2014-07-08 This volume in the Springer Series in Evolutionary Psychology presents a state of the art view of the topic of sexuality and sexual behavior drawing on theoretical constructs and research of noted individuals in the field Comprehensive and multi disciplinary this book seeks to provide a broad overview without sacrificing the complexity of a multi faceted approach The book is framed by introductory and closing sections that provide a context for the range of ideas contained within Ample space is provided in designated sections that focus on key areas of sexuality from both male and female perspectives and that include information from primate studies This volume can serve as a graduate text in sexual behavior in evolutionary terms and as a guide for further research

**Evolutionary Perspectives on Human Development** Robert G. Burgess, Kevin MacDonald, 2005 This new edition of Evolutionary Perspectives on Human Development is obligatory reading for anyone interested in the integration of evolutionary theory into developmental psychology It provides a valuable corrective to recent narrow approaches which argue that the human mind is constructed exclusively of domain specific mechanisms and which deemphasize the importance of human psychological and behavioral plasticity Anyone who reads this book will come away with a richer understanding of our shared human nature Bill Irons Northwestern University In this volume Burgess and MacDonald have brought together a distinguished group of psychologists and anthropologists to investigate how given our evolutionary heritage genetic make up and salient environment behavior cognition and emotion unfold from the human organism They make clear that both evolutionary functional and proximate behavioral perspectives are essential to understanding the human mind and its products Many of these essays should be required reading for sociobiologists evolutionary psychologists and evolutionary anthropologists and their ilk Jeffrey Kurland Penn State It s clear that evolutionary biology has a tremendous amount to offer when it comes to our understanding of human development and yet many experts in developmental psychology have remained impervious to these insights At last this may change Burgess and MacDonald have compiled a rich array of theory and data much of it contributed by the leading lights of evolutionary psychology or if you prefer sociobiology A very valuable collection and one that might help define a new and important field David P Barash University of Washington Evolutionary Perspectives on Human Development Second Edition considers the role of evolutionary theory in the field of developmental psychology to

examine key topics of individual human development This unique book fills an important gap in the literature applying evolutionary models to human development by focusing on central development issues The book emphasizes both domain general evolved psychological mechanisms and domain specific processes The text also integrates behavior genetic research with evolutionary and developmental principles In this contributed volume editors Robert L Burgess and Kevin MacDonald have brought together a distinguished group of social and behavioral scientists employing multiple levels of analysis drawn from a variety of academic disciplines This diverse group of contributors illustrates the enormous power of evolutionary theory by elucidating human behavior and its development and the various ways it is manifested in different environments Evolutionary Perspectives on Human Development applies evolutionary theory to such topics as parent child relationships the maltreatment of children psychopathology cooperation and competition among siblings and the acquisition of vital resources in different cultural settings from an evolutionary point of view Key Features Comprehensive coverage of the impact of evolutionary theory on human development provides students with the most thorough foundation available in this area Contributions by leading scholars and researchers expose readers to the exciting research and developments that have been occurring in the field An introductory chapter written by the volume editors provides an accessible overview of the book Evolutionary Perspectives on Human Development provides state of the art groundwork in evolutionary theory as viewed by leading thinkers in the field It is an excellent supplementary textbook for advanced undergraduate and graduate courses in evolutionary and developmental psychology

#### **From Biology to Psychology in Jungian and Evolutionary Theory**

Stefano Carta,2025-05-21 This groundbreaking book repositions C G Jung s legacy and the field of analytical psychology within the panorama of contemporary knowledge in biology psychology and anthropology on the grounds of the role of affects and emotion as the foundation of all psychic activity Within this new volume Stefano Carta aims to provide a new up to date way of understanding Jung s work and to show the effect to which his central positions can be better understood in relation to topics such as the nature of the psyche of the Self of the collective unconscious and of archetypal theory From an evolutionary and biological perspective this book describes with extensive substantiations and an original discussion the transformation of the biological processes into psychological ones Additionally the book aims to identify current tendencies which view analytical psychology in increasingly reductionistic ways and reaffirm the dynamism of Jung s paradigm Spanning two volumes which are also accessible as standalone books and with international appeal and original and interdisciplinary in scope they will be of great interest to Jungian scholars and analysts as well as students and those on Jungian oriented training courses

**The Oxford Handbook of Evolutionary Perspectives on Violence, Homicide, and War** Todd K. Shackelford,Viviana A. Weekes-Shackelford,2012-08-23 This volume synthesizes the theoretical and empirical work of leading scholars in the evolutionary sciences to produce an extensive and authoritative review of this literature

*Evolutionary Perspectives on Social Psychology* Virgil Zeigler-Hill,Lisa L. M. Welling,Todd K. Shackelford,2015-05-06

This wide ranging collection demonstrates the continuing impact of evolutionary thinking on social psychology research. This perspective is explored in the larger context of social psychology which is divisible into several major areas including social cognition, the self, attitudes and attitude change, interpersonal processes, mating and relationships, violence and aggression, health and psychological adjustment and individual differences. Within these domains, chapters offer evolutionary insights into salient topics such as social identity, prosocial behavior, conformity, feminism, cyberpsychology and war. Together, these authors make a rigorous argument for the further integration of the two diverse and sometimes conflicting disciplines. Among the topics covered: How social psychology can be more cognitive without being less social; How the self-esteem system functions to resolve important interpersonal dilemmas; Shared interests of social psychology and cultural evolution; The evolution of stereotypes; An adaptive socio-ecological perspective on social competition and bullying; Evolutionary game theory and personality; Evolutionary Perspectives on Social Psychology has much to offer students and faculty in both fields as well as evolutionary scientists outside of psychology. This volume can be used as a primary text in graduate courses and as a supplementary text in various upper level undergraduate courses.

*Evolutionary Perspectives on Environmental Problems* Dustin J. Penn, Iver Myrnes, The twenty first century presents an increasing number of environmental problems including toxic pollution, global warming, destruction of tropical forests, extinction of biological diversity and depletion of natural resources. These environmental problems are generally due to human behavior, namely over consumption of resources and overpopulation. Designing effective policies to address these problems requires a deep understanding of human behavior as well as ecology. This in turn requires considerations of human nature and the evolutionary design of the human mind. Evolutionary research on human behavior has profound implications for the environmental sciences. The aim of this collection is to bring together a variety of chapters that show how and why.

Part 1 Human Nature and Resource Conservation addresses environmental problems from different evolutionary perspectives. Part 2 The Ecological Noble Savage Hypothesis examines the notion that our environmental problems are due to Western culture and that our ancestors and people in indigenous societies lived in harmony with nature until the corrupting influences of Western culture. Part 3 The Tragedy of the Commons explores the conservation of common pool or open access natural resources such as fisheries, forests, grazing lands, freshwater and clean air. Part 4 The Evolution of Discounting and Conspicuous Consumption looks at the problem of explaining why people are so ecologically short sighted and why people in developed countries consume so many resources. Part 5 Overpopulation and Fertility Declines addresses the evolution of human reproductive decisions. Part 6 Biophilia aims to explain why people cherish nature as well as destroy it. The goal of this volume is to introduce environmental thinkers to evolutionary perspectives on human behavior and the new interdisciplinary sciences of evolutionary psychology and behavioral ecology. This reader aims to help bridge the artificial division between the biological and social sciences and provide a synthesis between evolutionary sciences of human behavior and environmental sciences. Dustin J. Penn is director.
