**Networks** Michele Walters, Robert J. Scholes, 2016-11-25 Biodiversity observation systems are almost everywhere inadequate to meet local national and international treaty obligations As a result of alarmingly rapid declines in biodiversity in the modern era there is a strong worldwide desire to upgrade our monitoring systems but little clarity on what is actually needed and how it can be assembled from the elements which are already present This book intends to provide practical guidance to broadly defined biodiversity observation networks at all scales but predominantly the national scale and higher This is a practical how to book with substantial policy relevance It will mostly be used by technical specialists with a responsibility for biodiversity monitoring to establish and refine their systems It is written at a technical level but one that is not discipline bound it should be intelligible to anyone in the broad field with a tertiary education      *The British National Bibliography*
