The Biology of Doom Ed Regis, Edward Regis, 2000-10 From anthrax to botulism from smallpox to Ebola the threat of biological destruction is rapidly overtaking our collective fear of atomic weaponry This riveting narrative traces America's own covert biological weapons program from its origins in World War II to its abrupt cancellation in 1969 In light of America's increasing surveillance and condemnation of foreign biological weapons programs this exposé of America's own dangerous Cold War secret is both fascinating and shocking The project at its peak employed 5 000 people and tested pathogens on 2 000 live human volunteers conducted open air tests on American soil sprayed our cities with bacterial aerosols and stockpiled millions of bacterial bombs for instant deployment Yet surprisingly almost nothing has been published about this project until now This is the first book to expose the true story of America's secret program to create biological weapons of mass destruction

The Biology of Doom Ed Regis, 1999-11-15 The first book to expose the true story of America's secret program to create biological weapons of mass destruction From anthrax to botulism from smallpox to Ebola the threat of biological destruction is rapidly overtaking our collective fear of atomic weaponry In an era when a lone fanatic could wipe out an entire population with the contents of a small vial the specter of germ warfare has moved into a prominent position in the public's mind This riveting narrative traces America's own covert biological weapons program from its origins in World War II to its abrupt cancellation in 1969 This project at its peak employed 5 000 people tested pathogens on 2 000 live human volunteers and conducted open air tests on American soil The U S government appropriated research from Japanese experiments on Chinese civilians thus benefiting from one of the twentieth century's greatest atrocities sprayed its own cities with bacterial aerosols and stockpiled millions of bacterial bombs for instant deployment Yet surprisingly almost nothing has been published about this project until now In light of America's increasing surveillance and condemnation of foreign biological weapons programs this exposé of America's own dangerous Cold War secret is both fascinating and shocking

South Africa's Weapons of Mass Destruction Helen E. Purkitt, Stephen F. Burgess, 2005-05-11 South Africa's Weapons of Mass Destruction offers an in depth view of the secret development and voluntary disarmament of South Africa's nuclear biological and chemical weapons program Project Coast Helen E Purkitt and Stephen F Burgess explore how systems used for nuclear biological and chemical weapons in South Africa were acquired and established beyond the gaze of international and domestic political actors On the basis of archival evidence from Project Coast and their own extensive interviews with military and political officials Purkitt and Burgess consider what motivates countries to acquire and build such powerful weaponry and examine when and how decisions are made to dismantle a military arsenal voluntarily Questions such as how to destroy weapons safely and keep them from reappearing on international markets are considered along with comparative strategies for successful disarmament in other nation states **The Biological Weapons Taboo** Michelle

Bentley, 2023-09-19 The non use of biological weapons has been described as the great mystery of biological warfare The Biological Weapons Taboo solves that mystery by analysing the bioweapons taboo in the first comprehensive study of the concept Bentley explains precisely why bioweapons are perceived as repulsive and how this sentiment is consequently expressed in the form of political behaviours including the refusal to engage in biological aggression Drawing on extensive

archival evidence this volume looks back on United States foreign policy decision making particularly in relation to the Geneva Protocol and the Biological Weapons Convention to demonstrate how and why the taboo has comprised a decisive factor in shaping both biowarfare strategy and political rhetoric and why the taboo needs to be recognised as a necessary consideration in the study of bioweapons In analysing a taboo the volume also takes the debate on international norms forward by questioning and challenging the wider analytic comprehension of taboo itself Rejecting current definitions of the concept as inadequate Bentley proposes a new and original model of understanding based on the normative characteristics of disgust stigmatization and fetishization

Living Weapons Gregory D. Koblentz, 2011-05-16 Biological weapons are widely feared yet rarely used Biological weapons were the first weapon prohibited by an international treaty yet the proliferation of these weapons increased after they were banned in 1972 Biological weapons are frequently called the poor man's atomic bomb yet they cannot provide the same deterrent capability as nuclear weapons One of my goals in this book is to explain the underlying principles of these apparent paradoxes from Living Weapons Biological weapons are the least well understood of the so called weapons of mass destruction Unlike nuclear and chemical weapons biological weapons are composed of or derived from living organisms In Living Weapons Gregory D Koblentz provides a comprehensive analysis of the unique challenges that biological weapons pose for international security At a time when the United States enjoys overwhelming conventional military superiority biological weapons have emerged as an attractive means for less powerful states and terrorist groups to wage asymmetric warfare Koblentz also warns that advances in the life sciences have the potential to heighten the lethality and variety of biological weapons The considerable overlap between the equipment materials and knowledge required to develop biological weapons conduct civilian biomedical research and develop biological defenses creates a multiuse dilemma that limits the effectiveness of verification hinders civilian oversight and complicates threat assessments Living Weapons draws on the American Soviet Russian South African and Iraqi biological weapons programs to enhance our understanding of the special challenges posed by these weapons for arms control deterrence civilian military relations and intelligence Koblentz also examines the aspirations of terrorist groups to develop these weapons and the obstacles they have faced Biological weapons Koblentz argues will continue to threaten international security until defenses against such weapons are improved governments can reliably detect biological weapon activities the proliferation of materials and expertise is limited and

international norms against the possession and use of biological weapons are strengthened *Pathogens for War* Donald H. Avery, 2013-04-28 *Pathogens for War* explores how Canada and its allies have attempted to deal with the threat of germ warfare one of the most fearful weapons of mass destruction since the Second World War In addressing this subject distinguished historian Donald Avery investigates the relationship between bioweapons poison gas and nuclear devices as well as the connection between bioattacks and natural disease pandemics Avery emphasizes the crucially important activities of Canadian biodefence scientists beginning with Nobel Laureate Frederick Banting at both the national level and through cooperative projects within the framework of an elaborate alliance system Delving into history through a rich collection of declassified documents *Pathogens for War* also devotes several chapters to the contemporary challenges of bioterrorism and disease pandemics from both national and international perspectives As such readers will not only learn about Canada's secret involvement with biological warfare but will also gain new insights into current debates about the peril of bioweapons one of today's greatest threats to world peace

Science, Secrecy, and the Smithsonian Edward Regis, 2023-01-17 In the fall of 1962 at the height of the Cold War officers representing the three main military services the Army the Navy and the Air Force arrived at the Smithsonian Institution in Washington The officers were from the Desert Test Center a new military installation in Fort Douglas Utah The chapter describes how these officers outlined a biological survey of various Pacific islands that they wanted to be undertaken They were not forthcoming with their motives in wanting the survey but Smithsonian officials volunteered to perform the survey using their own scientists and others to be hired as needed

Architecture Post Mortem Donald Kunze, David Bertolini, Simone Brott, 2016-04-15 Architecture Post Mortem surveys architecture's encounter with death, decline and ruination following late capitalism. As the world moves closer to an economic abyss that many perceive to be the death of capital, contraction and crisis are no longer mere phases of normal market fluctuations but rather the irruption of the unconscious of ideology itself. Post mortem is that historical moment wherein architecture's symbolic contract with capital is put on stage, naked to all. Architecture is not irrelevant to fiscal and political contagion as is commonly believed; it is the victim and penetrating analytical agent of the current crisis. As the very apparatus for modernity's guilt and unfulfilled drives, modernity's debt, architecture is that ideological element that functions as a master signifier of its own destruction, ordering all other signifiers and modes of signification beneath it. It is under these conditions that architecture theory has retreated to an Alamo of history, a final desert outpost where history has been asked to transcend itself. For architecture's hoped-for utopia always involves an apocalypse. This timely collection of essays reformulates architecture's relation to modernity via the operational death drive: architecture is but a passage between life and death. This collection includes essays by Kazi K Ashraf, David Bertolini, Simone Brott, Peggy Deamer, Didem Ekici, Paul Emmons, Donald Kunze, Todd McGowan, Gevork Hartoonian, Nadir Lahiji, Erika Naginski, and Dennis Maher. *Viral Pandemics* Rae-Ellen Kavey, Allison Kavey, 2024-10-01 This new edition of *Viral Pandemics* illuminates how the increasing emergence of novel viruses has combined with intensifying global interconnectedness to create an escalating spiral of viral disease. It includes an introduction to the key characteristics of viral pathogens that make them so dangerous, followed by a comprehensive survey of epidemic viral disease from 1900 to the present. Now featuring new chapters on COVID-19 and mpox, the book uses an historical narrative to follow the path of each virus from its original detection to its emergence as an explosive pandemic. This allows readers to appreciate the biologic potential of the virus, the dynamics of epidemic disease spread, and the contemporaneous abilities of medicine and science to contend with the pathogen. In parallel, the book discusses those elements of connectedness that enable a localized disease outbreak to become a global pandemic, allowing readers to appreciate the increasingly critical role that human activity plays in global disease. In the last two chapters, the authors take a different approach. A Look Back critically evaluates the response to COVID-19 against the history of the emergence of public health in response to several other modern global pandemics and identifies some lessons we can still learn to improve our response to future pandemics. A Way Forward integrates the biologic and environmental factors that emerged as critical in the analysis of all the pandemics in the book and then uses this composite picture to propose ways to interrupt the escalating cycle of viral pandemic disease. Written in a straightforward and accessible style, this book is ideal reading for students of public health and its history, the history of medicine and medical anthropology, as well as general readers keen to understand how viral pandemics have shaped and continue to shape millions of lives. **Weapons of War: Environmental Impact**, 2013-08-15 The Indian Air Force from a humble beginning in 1932 with 4 Wapiti aircraft, six Indian

officers and 22 hawaii sepoys have traversed a long journey of eighty one years and crossed noteworthy milestones to become the fourth largest air force in the world While facing several limitations challenges IAF have met all the national defence requirements and made several strategic contributions With growing economic interests and national aspirations expanding interests well beyond our territorial boundaries and prevailing internal security challenges India s national defence requirements are also increasing The first Gulf War was a monumental turning point in the war time employment of aerospace power Ever since significance of aerospace power in war crisis and peace time has been gaining ascendancy Kosovo and Libya are the two pertinent examples of the allies virtually relying on aerospace power without committing any soldiers on the ground Scrutiny of the emerging global and national trends suggests that employment of the aerospace assets as well as nation s expectation from the IAF will continue to rise Alongside there is an unplanned fall in flying platforms weapon systems and pilot strength of the IAF This study is an attempt to analyse the history of the IAF in war as well as other than war operations to appreciate the emerging trends in geopolitics aerospace technology and doctrine and to identify the likely challenges IAF would be facing in the next two decades and beyond Road map for transformation of the national security framework indigenous aerospace industry and the IAF has also been suggested Should I Fight? Barry W. Bussey,2010-12-31 Since its organization in 1863 the Seventh day Adventist Church has been counter cultural In its Christian witness to modern society it has advocated keeping the seventh day Sabbath vegetarianism abstinence from tobacco and alcohol and refusal of its members to bear arms But the stance on the refusal to bear arms has seen a metamorphous in modern times Today more Seventh day Adventist young people have voluntarily joined the military than in any previous generation of the Church s history This volume is a compliation of essays that were presented at a conference called to discuss the Adventist Church s position on concientious objection The presenters considered the history of the Church s stand and the changing views These discussions were not limited to American context but considered other countries including South Africa and Canada **Dark Actors** Robert Lewis,2013-07-04 One July afternoon in 2003 in a quiet part of Oxfordshire a scientist went out for a walk and never came back Dr David Kelly had been all over the news in the preceding days as an investigator on the team which went into Iraq to check whether they had weapons of mass destruction he had been accused of anonymously briefing a BBC reporter that the government s case for the Iraq War had been deliberately falsified When the news came through that his body had been found in woods near his country home for the briefest of moments a stunned Britain held its breath and wondered if this was what it had come to Our intelligence services were already collaborating in the torture of British citizens for reasons of national security Had they committed murder too Tony Blair himself was for once without answer At a press conference in Japan a reporter stood up and asked him if he had blood on his hands The Prime Minister stood there blinking behind his mask until he walked shocked from the podium But Britain kept calm and carried on Normal service was resumed and the world began spinning again David Kelly we were told had

committed suicide for personal reasons that had nothing to do with Downing Street or the Iraq War But not all could believe that For those that couldn't they too lost a part of themselves that afternoon Conspiracy theorists eccentrics obsessives lunatics paranoids fantasists zealots they had been awarded all these sobriquets and more Yet it was easy enough to see lurking behind the cracks and gaps in the government's account the hulk of a great and deliberate dishonesty Simply to read about what transpired in Longworth Oxfordshire on the 17th July 2003 made it impossible to believe otherwise **CBRN Protection** Andre Richardt, Birgit Hülseweh, Bernd Niemeyer, Frank Sabath, 2013-03-01 Originating in the armed forces of the early 20th century weapons based on chemical biological or nuclear agents have become an everpresent threat that has not vanished after the end of the cold war Since the technology to produce these agents is nowadays available to many countries and organizations including those with terrorist aims civil authorities across the world need to prepare against incidents involving these agents and train their personnel accordingly As an introductory text on NBC CBRN weapons and agents this book leads the reader from the scientific basics to the current threats and strategies to prepare against them After an introductory part on the history of NBC CBRN weapons and their international control the three classes of nuclear radiological biological and chemical weapons are introduced focusing on agents and delivery vehicles Current methods for the rapid detection of NBC CBRN agents are introduced and the principles of physical protection of humans and structures are explained The final parts addresses more general issues of risk management preparedness and response management as the set of tools that authorities and civil services will be needed in a future CBRN scenario as well as the likely future scenarios that authorities and civil services will be faced with in the coming years This book is a must have for Health Officers Public Health Agencies and Military Authorities
