Biology At Work:

The American Development of Biology Ronald Rainger, Keith R. Benson, Jane Maienschein, 2016-11-11 Selected as one of the Best Sci Tech Books of 1988 by Library Journal The essays in this volume represent original work to celebrate the centenary of the American Society of Zoologists They illustrate the impressive nature of historical scholarship that has subsequently focused on the development of biology in the United States **Greek Biology & Greek Medicine** Charles Singer, 2022-07-21 This little book is an attempt to compress into a few pages an account of the general evolution of Greek biological and medical knowledge The Greek people had many roots racial cultural and spiritual and from them all they inherited various powers and qualities and derived various ideas and traditions It is thus not surprising that our first systematic treatment of animals is in a practical medical work the On Regimen of the Hippocratic Collection This very peculiar treatise dates from the later part of the fifth century It is strongly under the influence of Heracleitus c 540 475 and contains many points of view which reappear in later philosophy All animals according to it are formed of fire and water nothing is born and nothing dies but there is a perpetual and eternal revolution of things so that change itself is the only reality Man's nature is but a parallel to that of the universal nature and the arts of man are but an imitation or reflex of the natural arts or again of the bodily functions The soul a mixture of water and fire consumes itself in infancy and old age and increases during adult life Here too we meet with that singular doctrine not without bearing on the course of later biological thought that in the foetus all parts are formed simultaneously On the proportion of fire and water in the body all depends sex temper temperament intellect Such speculative ideas separate this book from the sober method of the more typical Hippocratic medical works with which indeed it has little in common Biological Teaching in the Colleges of the United States John Pendleton Campbell, 1891 **Calendar** Bryn Mawr College, 1896 *Modern Biology* V.
