The Handbook of Evolutionary Psychology David M. Buss, 2005-07-15 The foundations of practice and the most recent discoveries in the intriguing new field of evolutionary psychology Why is the mind designed the way it is How does input from the environment interact with the mind to produce behavior By taking aim at such questions the science of evolutionary psychology has emerged as a vibrant new discipline producing groundbreaking insights In The Handbook of Evolutionary Psychology leading contributors discuss the foundations of the field as well as recent discoveries currently shaping this burgeoning area of psychology Guided by an editorial board made up of such luminaries as Leda Cosmides John Tooby Don Symons Steve Pinker Martin Daly Margo Wilson and Helena Cronin the text's chapters delve into a comprehensive range of topics covering the full range of the discipline Foundations of evolutionary psychology Survival Mating Parenting and kinship Group living Interfaces with traditional disciplines of evolutionary psychology And interfaces across disciplines In addition to an in depth survey of the theory and practice of evolutionary psychology the text also features an enlightening discussion of this discipline in the context of the law medicine and culture An Afterword by Richard Dawkins provides some final thoughts from the renowned writer and exponent of evolutionary theory Designed to set the standard for handbooks in the field The Handbook of Evolutionary Psychology is an indispensable reference tool for every evolutionary psychologist and student

The Evolution of Sexuality Todd K. Shackelford, Randal D. Hansen, 2014-09-12 Attraction mating reproduction it is a given that as a species human beings are concerned with sex And whether the study compares sexual behaviors of men and women or considers the proportions between nature and nurture most roads lead back to our distant ancestors and or our fellow animals The Evolution of Sexuality collects stimulating new empirical findings and theoretical concepts regarding both familiar themes and emerging areas of interest Following earlier titles in this series an interdisciplinary panel of contributors examines topics specific to the whys of male and female sex related behavior here ranging from biological bases for male same sex attraction to the seemingly elusive purpose of the female orgasm This vantage point between biology and psychology gives readers profound insights not just into human differences and similarities but also why they continue to matter despite our vast understanding of culture and socialization And intriguing dispatches from the humanities review sexual themes in classic works of literature and explore the role of parent offspring conflict in the English Revolution of the seventeenth century Among the topics covered Sexual conflict and evolutionary psychology toward a unified framework Assortative mating caste and class The functional design and phylogeny of female sexuality Is oral sex a form of mate retention behavior Two behavioral hypotheses for the evolution of male homosexuality in humans Sperm competition and the evolution of human sexuality The Evolution of Sexuality will attract evolutionary scientists across a variety of disciplines Faculty graduate and undergraduate students and researchers interested in sexuality

will find it a springboard for discussion debate and further study **The Eco-Self in Early Modern English Literature**

Elizabeth Gruber,2025-10-01 The Eco Self in Early Modern English Literature tracks an important shift in early modern conceptions of selfhood arguing that the period hosted the birth of a new subset of the human the eco self which melds a deeply introspective turn with an abiding sense of humans embedment in the world A confluence of cultural factors produced the relevant changes Of paramount significance was the rapid spread of literacy in England and across Europe reading transformed the relationship between self and world retooled moral reasoning and even altered human anatomy This book pursues the salutary possibilities including the ecological benefits of this redesigned self by advancing fresh readings of texts by William Shakespeare Christopher Marlowe John Webster and Margaret Cavendish The eco self offers certain refinements to ecological theory by renewing appreciation for the rational deliberative functions that distinguish humans from other species *Oxford Handbook of Evolutionary Psychology* Robin Ian MacDonald Dunbar,Louise Barrett,2007 The Oxford

Handbook of Evolutionary Psychology is the definitive comprehensive and authoritative text on this burgeoning field With contributions from over fifty experts in the field the range and depth of coverage is unequalled It will be an essential resource for students and researchers in psychology *Shakespeare's Botanical Imagination* Susan C. Staub,2025-10-01 Writing on the cusp of modern botany and during the heyday of English herbals and garden manuals Shakespeare references at least 180 plants in his works and makes countless allusions to horticultural and botanical practices Shakespeare s Botanical Imagination moves plants to the foreground of analysis and brings together some of the rich and innovative ways that scholars are expanding the discussion of plants and botany in Shakespeare s writings The essays gathered here all emphasize the interdependence and entanglement of plants with humans and human life whether culturally socially or materially and vividly illustrate the fundamental role plants play in human identity As they attend to the affinities and shared materiality between plants and humans in Shakespeare s works these essays complicate the comfortable Aristotelian hierarchy of human animal plant And as they do they often challenge the privileged position of humans in relation to non human life The Evolutionary Imagination in Late-Victorian Novels John Glendening,2016-03-16 Dominated by Darwinism

and the numerous guises it assumed evolutionary theory was a source of opportunities and difficulties for late Victorian novelists Texts produced by Wells Hardy Stoker and Conrad are exemplary in reflecting and participating in these challenges Not only do they contend with evolutionary complications John Glendening argues but the complexities and entanglements of evolutionary theory interacting with multiple cultural influences thoroughly permeate the narrative descriptive and thematic fabric of each All the books Glendening examines from *The Island of Doctor Moreau* and *Dracula* to *Heart of Darkness* address the interrelationship between order and chaos revealed and promoted by evolutionary thinking of the period Glendening s particular focus is on how Darwinism informs novels in relation to a late Victorian culture that encouraged authors to stress not objective truths illuminated by Darwinism but rather the contingencies uncertainties and confusions

generated by it and other forms of evolutionary theory *Reading Edith Wharton Through a Darwinian Lens* Judith P. Saunders, 2014-01-10 Beneath the polished surface of the genteel environments delineated in Wharton's fiction characters are competing fiercely for desirable mates questing for social status and resources and plotting ruthlessly to advance their relatives fortunes in life This book identifies these and other evolutionary issues central to her fiction demonstrating their significance in terms of character setting plot and theme Connections to existing Wharton criticism are made throughout the book so that readers can see how an evolutionary perspective enriches refutes or reconfigures insights derived from other critical approaches Music and Manipulation Steven Brown, Ulrik Volgsten, 2006 Since the beginning of human civilization music has been used as a device to control social behavior where it has operated as much to promote solidarity within groups as hostility between competing groups Music is an emotive manipulator that influences attitude motivation and behavior at many levels and in many contexts This volume is the first to address the social ramifications of music's behaviorally manipulative effects its morally questionable uses and control mechanisms and its economic and artistic regulation through commercialization thus highlighting not only music's diverse uses at the social level but also the ever fragile relationship between aesthetics and morality **The Origins of Music** Nils L. Wallin, Bjorn Merker, Steven Brown, 2001-07-27 The book can be viewed as representing the birth of evolutionary biomusicology What biological and cognitive forces have shaped humankind's musical behavior and the rich global repertoire of musical structures What is music for and why does every human culture have it What are the universal features of music and musical behavior across cultures In this groundbreaking book musicologists biologists anthropologists archaeologists psychologists neuroscientists ethologists and linguists come together for the first time to examine these and related issues The book can be viewed as representing the birth of evolutionary biomusicology the study of which will contribute greatly to our understanding of the evolutionary precursors of human music the evolution of the hominid vocal tract localization of brain function the structure of acoustic communication signals symbolic gesture emotional manipulation through sound self expression creativity the human affinity for the spiritual and the human attachment to music itself Contributors Simha Arom Derek Bickerton Steven Brown Ellen Dissanayake Dean Falk David W Frayer Walter Freeman Thomas Geissmann Marc D Hauser Michel Imberty Harry Jerison Drago Kunej Francois Bernard Mche Peter Marler Bjorn Merker Geoffrey Miller Jean Molino Bruno Nettle Chris Nicolay Katharine Payne Bruce Richman Peter J B Slater Peter Todd Sandra Trehub Ivan Turk Maria Ujhelyi Nils L Wallin Carol Whaling **Reading Human Nature** Joseph Carroll, 2011-03-01 As the founder and leading practitioner of literary Darwinism Joseph Carroll remains at the forefront of a major movement in literary studies Signaling key new developments in this approach *Reading Human Nature* contains trenchant theoretical essays innovative empirical research sweeping surveys of intellectual history and sophisticated interpretations of specific literary works including *The Picture of Dorian Gray* *Wuthering Heights* *The Mayor of Casterbridge* and *Hamlet* Evolutionists in the social sciences have succeeded in delineating basic motives but have

given far too little attention to the imagination Carroll makes a compelling case that literary Darwinism is not just another school or movement in literary theory It is the moving force in a fundamental paradigm change in the humanities a revolution Psychologists and anthropologists have provided massive evidence that human motives and emotions are rooted in human biology Since motives and emotions enter into all the products of a human imagination humanists now urgently need to assimilate a modern scientific understanding of human nature Integrating evolutionary social science with literary humanism Carroll offers a more complete and adequate understanding of human nature **Musical Aesthetics** Jonathan L.

Friedmann,2018-07-27 This book contains six chapters covering key areas of musical aesthetics including aesthetics of emotions aesthetics of listening aesthetics of performance aesthetics of composition aesthetics of nature and aesthetics of commerce Each chapter adopts an experiential approach to aesthetics in which perceptual and intuitive musical responses real time experiences are valued as a source of truth Unlike intellectual aesthetics which values conscious associations and meticulous artistic appraisals experiential aesthetics looks primarily at everyday subconscious appreciations The explorations here draw from the social sciences hard sciences philosophy literature theology musicology humanities and other fields that directly or indirectly contribute to an understanding of our attraction to music Presenting user friendly distillations of numerous theories concepts and functions this book will be of interest to both lay readers and expert practitioners

Evolutionary Aesthetics Eckart Voland,Karl Grammer,2013-04-17 Evolutionary Aesthetics is the attempt to understand the aesthetic judgement of human beings and their spontaneous distinction between beauty and ugliness as a biologically adapted ability to make important decisions in life The hypothesis is both in the area of natural beauty and in sexuality with regard to landscape preferences but also in the area of artificial beauty i e in art and design that beauty opens up fitness opportunities while ugliness holds fitness risks In this book this adaptive view of aesthetics is developed theoretically presented on the basis of numerous examples and its consequences for evolutionary anthropology are illuminated *Food*

Preferences and Taste Helen M. Macbeth,1997 An international team of contributors present cross disciplinary perspectives on food preferences and tastes showing the common themes of these fundamentals of human existence A comprehensive introduction outlines the themes and the links between them **Peak Experiences** Ian Marshall,2003 In Peak Experiences

Marshall sets out on a far more personal and far reaching journey to discover how our modern estrangement from the natural world has affected our mental well being **Life After Literature** Zoltán Kulcsár-Szabó,Tamás Lénárt,Attila Simon,Roland Végső,2020-04-24 This book offers innovative investigations of the concept of life in art and in theory It features essays that explore biopoetics and look at how insights from the natural sciences shape research within the humanities Since literature works of art and other cultural products decisively shape our ideas of what it means to be human the contributors to this volume examine the question of what literature literary and cultural criticism and philosophy contribute to the distinctions or non distinctions between human animal and vegetal existence Coverage combines different

methodological aspects and addresses a wide field of comparative literary studies The essays consider the question of language as a distinctive feature of human existence in a number of different contexts which range from Aristotle's works through several historical layers of the philosophical discourse on the origins of speech to modern anthropology and 20th century continental philosophy In addition the volume includes concrete case studies to the current post humanism debate and provides literary art historian and philosophical perspectives on animal studies The historical multiplicity of the various cultural representations of biological existence be that human animal vegetal or mixed might serve as a productive foundation for discussing the nature and forms of literature's critical contributions to our understanding of these fundamental categories This volume opens up this subject to students and scholars of literature art philosophy ethics and cultural studies and to anyone with a theoretical interest in the questions of life *Creative Technologies for*

Multidisciplinary Applications Connor, Andy M., 2016-03-29 Given that institutions of higher education have a predisposition to compartmentalize and delineate areas of study creative technology may seem oxymoronic On the contrary the very basis of western thought is found in the idea of transcendent knowledge The marriage of opposing disciplines therefore acts as a more holistic approach to education *Creative Technologies for Multidisciplinary Applications* acts as an inspiration to educators and researchers who wish to participate in the future of such multidisciplinary disciplines Because creative technology encompasses many applications with the realm of art gaming the humanities and digitization this book features a diverse collection of relevant research for the modern world It is a pivotal reference publication for educators students and researchers in fields related to sociology technology and the humanities *Aesthetics after Darwin* Winfried

Menninghaus, 2019-12-10 Darwin famously proposed that sexual competition and courtship is or at least was the driving force of art production not only in animals but also in humans The present book is the first to reveal that Darwin's hypothesis rather than amounting to a full blown antidote to the humanist tradition is actually strongly informed both by classical rhetoric and by English and German philosophical aesthetics thereby Darwin's theory far richer and more interesting for the understanding of poetry and song The book also discusses how the three most discussed hypothetical functions of the human arts competition for attention and loving acceptance social cooperation and self enhancement are not mutually exclusive but can well be conceived of as different aspects of the same processes of producing and responding to the arts Finally reviewing the current state of archeological findings the book advocates a new hypothesis on the multiple origins of the human arts posing that they arose as new variants of human behavior when three ancient and largely independent adaptations sensory and sexual selection driven biases regarding visual and auditory beauty play behavior and technology joined forces with and were transformed by the human capacities for symbolic cognition and language *Ecocritical Explorations in Literary and*

Cultural Studies Patrick D. Murphy, 2009-07-15 In *Ecocritical Explorations* Patrick D Murphy explores environmental literature and environmental cultural issues through both theoretical and applied criticism He engages with the concepts of

referentiality simplicity the nation state and virtual reality in the first section of the book and then goes on to interrogate these issues in contemporary environmental literature both American and international He concludes his argument with a discussion of the larger frames of family dynamics and un natural disasters such as hurricanes and global warming ending with a chapter on the integration of scholarship and pedagogy in the classroom with reference to his own teaching experiences Murphy s study provides a wide ranging discussion of contemporary literature and cultural phenomena through the lens of ecological literary criticism giving attention to both theoretical issues and applied critiques In particular he looks at popular literary genres such as mystery and science fiction as well as actual disasters and disaster scenarios Ecocritical Explorations in Literary and Cultural Studies is a timely contribution to ecological literary criticism and an insightful look into how we represent our relationship with the environment
