Biosciences 2000 Current Aspects And Prospects For The Next Millennium:

Biosciences 2000: Current Aspects And Prospects Into The Next Millenium Charles A Pasternak,1999-08-16 As the new millennium approaches it is appropriate to ask how far medicine and the life sciences have brought us and to wonder how specific fields will develop over the next decade or so This volume gathers together a number of leading scientists to give a bird s eye view of their field Much of the emphasis is on cancer microbial infections and immunology because these are some of the most rapidly advancing areas of research However the book is wide ranging and interdisciplinary and covers topics as diverse as reproductive health technology animal to human transplants drug resistance non invasive diagnosis by magnetic resonance novel membrane technology and carbon nanotubes The graduate student faced with a decision regarding his or her future topic of research could do worse than browse through this collection of articles by experts in the field

Evaluating A Pandemic Charles A Pasternak,2023-07-21 Written by an international group of experts and endorsed by leading scientists this multi author book answers two of today s most pressing questions the origin of the virus and the consequences of lockdown Aimed at the general reader as well as at researchers and medical doctors its span includes previously suppressed data on the origin of the virus the development of novel mRNA vaccines the case for a Swedish type of mild lockdown and analyses of social and political issues thrown up by the pandemic Evaluating a Pandemic is an incisive account of how civilisation grappled with the greatest world crisis since WWII Join Charles Pasternak and his authors as they sketch a future of health equity and hope

Androcentrism: The Ascendancy Of Man Charles A Pasternak,2021-10-04 Since time immemorial men have assumed superior innate qualities which have justified them in exerting power over the other sex right up to the twentieth century The last few years have seen the emergence of a new literary genre to show that despite this women have managed to become outstanding writers artists scientists explorers rulers and politicians Of such books none discusses a fundamental question is the supposed male superiority biological or has it arisen for some other reason over the course of time This is the issue that Androcentrism The Ascendancy of Man addresses The stronger physique of males may have given Palaeolithic man a feeling of superiority but the two sexes probably lived in fairly gender neutral or even matriarchal groups right up to the end of the

Neolithic Age Charles Pasternak argues that it was the emergence of hierarchies like chiefdom that largely sparked androcentrism It became established as villages grew into towns with the ownership of property as an important ingredient during the Bronze Age While the Mediaeval Period was a time of slight respite for women the Age of Enlightenment in Europe did not bolster this trend it reversed it Not until the latter half of the nineteenth century was androcentrism beginning to be seriously questioned but significant change happened only after World War I Today androcentrism has virtually disappeared from most parts of the world It was just a cultural blip albeit one that lasted over 5 000 years Related Link s
