Writings on Indian Anthropology and Anthropologists Subir Biswas, Barun Mukhopadhyay and Rajat Kanti Das, 2023-01-01 For the purpose of celebrating 100 years of teaching anthropology in India the Council of the Indian Anthropological Society undertook a programme of organizing a series of Special Lectures in the cherished memory of a selected group of distinguished anthropologists of India who immensely contributed to the growth of Indian anthropology in three of its sub disciplines over the last 10 decades Thus in all 14 special lectures were organized by the Society in collaboration with 14 different institutions engaged in either teaching and or research in Anthropology However we have received 11 articles written by senior anthropological scholars for publication in this book The distinguished anthropologists whose life and academic contributions are portrayed in this book are B K Roy Burman B N Saraswati U Deka P K Bhowmik L P Vidyarthi P K Ganguly G Sarana D P Mukherjee B N Banerjee D K Bhattacharya and A Basu It is expected that this rich collection of papers should be of much help to all serious students of anthropology providing them with enough motivating spirit to work towards the advancement of anthropology Popularizing Anthropology Jeremy McClancy, Christian McDonough, 2002-11-01 Anthropology written for a popular audience is the most neglected branch of the discipline In the 1980s postmodernist anthropologists began to explore the literary and reflective aspects of their work Popularizing Anthropology advances that trend by looking at a key but previously marginalized genre of anthropology The contributors who are well known anthropologists explore such themes as why so many anthropologists are women how the Japanese have reacted to Ruth Benedict why Margaret Mead became so successful how the French media promote Levi Strauss and Louis Dumont Why Bruce Chatwin tells us more about Aborigines than many anthropologists in Australia how personal accounts of fieldwork have evolved since the 1950s how to write a personal account of fieldwork Popularizing Anthropology unearths a submerged tradition within anthropology and reveals that from the beginning anthropologists have looked beyond the boundaries of the academy for their listeners It aims to establish the popularization of the discipline as an illuminating topic of investigation in its own right arguing that it is not an irrelevant appendage to the main body of the subject but has always been an integral part of it *Biosocial Worlds* Jens Seeberg, Andreas Roepstorff, Lotte Meinert, 2020-09-29 Biosocial Worlds presents state of the art contributions to anthropological reflections on the porous boundaries between human and non human life biosocial worlds Based on changing understandings of biology and the social it explores what it means to be human in these worlds Growing separation of scientific disciplines for more than a century has maintained a separation of the natural and the social that has created a space for projections between the two Such projections carry a directional causality and so constitute powerful means to establish discursive authority While arguing against the separation of the

biological and the social in the study of human and non human life it remains important to unfold the consequences of their discursive separation Based on examples from Botswana Denmark Mexico the Netherlands Uganda the UK and USA the volume explores what has been created in the space between the social and the natural with a view to rethink the biosocial Health topics in the book include diabetes trauma cancer HIV tuberculosis prevention of neonatal disease and wider issues of epigenetics Many of the chapters engage with constructions of health and disease in a wide range of environments and engage with analysis of the concept of environment Anthropological reflection and ethnographic case studies explore how health and environment are entangled in ways that move their relation beyond interdependence to one of inseparability The subtitle of this volume captures these insights through the concept of health environment seeking to move the engagement of anthropology and biology beyond deterministic projections Ibss: Anthropology: 1975 International Committee for Social Scien,1978-08-24 First published in 1978 Routledge is an imprint of Taylor Francis an informa company Encyclopedia of Social and Cultural Anthropology Dr Alan Barnard,Jonathan Spencer,2002-09-11 This is the only encyclopedia of social and cultural anthropology to cover fully the many important areas of overlap between anthropology and related disciplines This work also covers key terms ideas and people thus eliminating the need to refer to other books for specific definitions or biographies Special features include over 230 substantial entries on every major idea individual and sub discipline of social and cultural anthropology over 100 international contributors a glossary of more than 600 key terms and ideas The Routledge Dictionary of Anthropologists Gerald Gaillard,2004-06-01 This detailed and comprehensive guide provides biographical information on the most influential and significant figures in world anthropology from the birth of the discipline in the nineteenth century to the present day Each of the fifteen chapters focuses on a national tradition or school of thought outlining its central features and placing the anthropologists within their intellectual contexts Fully indexed and cross referenced The Routledge Dictionary of Anthropologists will prove indispensable for students of anthropology

Philosophy of Anthropology and Sociology,2011-08-12 This volume concerns philosophical issues that arise from the practice of anthropology and sociology The essays cover a wide range of issues including traditional questions in the philosophy of social science as well as those specific to these disciplines Authors attend to the historical development of the current debates and set the stage for future work Comprehensive survey of philosophical issues in anthropology and sociology Historical discussion of important debates Applications to current research in anthropology and sociology

Ellis, David F. Bjorklund, 2005-01-01 Applying an evolutionary framework to advance the understanding of child development this volume brings together leading figures to contribute chapters in their areas of expertise Researcher and student friendly chapters adhere to a common format **The Mathematics of Darwin's Legacy** Fabio A. C. Chalub, José Francisco Rodrigues, 2011-06-24 The book presents a general overview of mathematical models in the context of evolution It covers a wide range of topics such as population genetics population dynamics speciation adaptive dynamics game theory kin selection and stochastic processes Written by leading scientists working at the interface between evolutionary biology and mathematics the book is the outcome of a conference commemorating Charles Darwin's 200th birthday and the 150th anniversary of the first publication of his book On the origin of species Its chapters vary in format between general introductory and state of the art research texts in biomathematics in this way addressing both students and researchers in mathematics biology and related fields Mathematicians looking for new problems as well as biologists looking for rigorous description of population dynamics will find this book fundamental **Social and Cultural Anthropology in Perspective** Ioan M. Lewis, 2017-09-29 Social

anthropology is in the classic definition dedicated to the study of distant civilizations in their traditional and contemporary forms But there is a larger aspiration the comparative study of all human societies in the light of those challengingly unfamiliar beliefs and customs that expose our own ethnocentric limitations and put us in our place within the wider gamut of the world s civilizations Thematically guided by social setting and cultural expression of identity Social and Cultural Anthropology in Perspective is a dynamic and highly acclaimed introduction to the field of social anthropology which also examines its links with cultural anthropology A challenging new introduction critically surveys the latest trends pointing to weaknesses as well as strengths Presented in a clear lively and entertaining fashion this volume offers a comprehensive and up to date guide to social anthropology for use by teachers and students Skillfully weaving together theory and ethnographic data author Ioan M Lewis advocates an eclectic approach to anthropology He combines the strengths of British structural functionalism with the leading ideas of Marx Freud and Levi Strauss while utilizing the methods of historians political scientists and psychologists One of Lewis particular concerns is to reveal how insights from traditional cultures illuminate what we take for granted in contemporary industrial and post industrial society He also shows how in the pluralist world in which we live those who study other cultures ultimately learn about themselves Social anthropology is thus shown to be as relevant today as it has been in the past
