Intrinsic Motivation in the Classroom James P. Raffini, 1996 Contains strategies for enhancing student autonomy competence belonging and relatedness student self esteem and student involvement and enjoyment in learning **Bad Students, Not Bad Schools** Robert Weissberg, 2019-01-22 Americans are increasingly alarmed over our nation's educational deficiencies Though anxieties about schooling are unending especially with public institutions these problems are more complex than institutional failure Expenditures for education have exploded and far exceed inflation and the rising costs of health care but academic achievement remains flat Many students are unable to graduate from high school let alone obtain a college degree And if they do make it to college they are often forced into remedial courses Why despite this fiscal extravagance are educational disappointments so widespread In *Bad Students Not Bad Schools* Robert Weissberg argues that the answer is something everybody knows to be true but is afraid to say in public America's educational woes too often reflect the demographic mix of students Schools today are filled with millions of youngsters too many of whom struggle with the English language or simply have mediocre intellectual ability Their lackluster performances are probably impervious to the current reform prescriptions regardless of the remedy's ideological derivation Making matters worse retention of students in school is embraced as a philosophy even if it impedes the learning of other students Weissberg argues that most of America's educational woes would vanish if indifferent troublesome students were permitted to leave when they had absorbed as much as they could learn they would quickly be replaced by learning hungry students including many new immigrants from other countries American education survives since we import highly intelligent technically skillful foreigners just as we import oil but this may not last forever When educational establishments get serious about world class mathematics and science and permit serious students to learn problems will dissolve Rewarding the smartest not spending fortunes in a futile quest to uplift the bottom should become official policy This book is a bracing reminder of the risks of political manipulation of education and argues that the measure of policy should be academic achievement **Student Engagement Techniques** Elizabeth F. Barkley, 2009-10-06 Keeping students involved motivated and actively learning is

challenging educators across the country yet good advice on how to accomplish this has not been readily available Student Engagement Techniques is a comprehensive resource that offers college teachers a dynamic model for engaging students and includes over one hundred tips strategies and techniques that have been proven to help teachers from a wide variety of disciplines and institutions motivate and connect with their students The ready to use format shows how to apply each of the book s techniques in the classroom and includes purpose preparation procedures examples online implementation variations and extensions observations and advice and key resources Given the current and welcome surge of interest in improving student learning and success this guide is a timely and important tool sharply focused on practical strategies that can really matter Kay McClenney director Center for Community College Student Engagement Community College Leadership Program the University of Texas at Austin This book is a must for every new faculty orientation program it not only emphasizes the importance of concentrating on what students learn but provides clear steps to prepare and execute an engagement technique Faculty looking for ideas to heighten student engagement in their courses will find useful techniques that can be adopted adapted extended or modified Bob Smallwood cocreator of CLASSE Classroom Survey of Student Engagement and assistant to the provost for assessment Office of Institutional Effectiveness University of Alabama Elizabeth Barkley s encyclopedia of active learning techniques here called SETs combines both a solid discussion of the research on learning that supports the concept of engagement and real life examples of these approaches to teaching in action James Rhem executive editor The National Teaching Learning Forum

Teach Students How to Learn Saundra Yancy McGuire, 2023-07-03 Co published with NISOD Miriam a freshman Calculus student at Louisiana State University made 37.5% on her first exam but 83% and 93% on the next two Matt a first year General Chemistry student at the University of Utah scored 65% and 55% on his first two exams and 95% on his third These are representative of thousands of students who decisively improved their grades by acting on the advice described in this book What is preventing your students from performing according to expectations Saundra McGuire offers a simple but profound answer If you teach students how to learn and give them simple straightforward strategies to use they can significantly increase their learning and performance For over a decade Saundra McGuire has been acclaimed for her presentations and workshops on metacognition and student learning because the tools and strategies she shares have enabled faculty to facilitate dramatic improvements in student learning and success This book encapsulates the model and ideas she has developed in the past fifteen years ideas that are being adopted by an increasing number of faculty with considerable effect The methods she proposes do not require restructuring courses or an inordinate amount of time to teach They can often be accomplished in a single session transforming students from memorizers and regurgitators to students who begin to think critically and take responsibility for their own learning Saundra McGuire takes the reader sequentially through the ideas and strategies that students need to understand and implement First she demonstrates how introducing students to metacognition and Bloom s Taxonomy reveals to them the importance of

understanding how they learn and provides the lens through which they can view learning activities and measure their intellectual growth Next she presents a specific study system that can quickly empower students to maximize their learning Then she addresses the importance of dealing with emotion attitudes and motivation by suggesting ways to change students mindsets about ability and by providing a range of strategies to boost motivation and learning finally she offers guidance to faculty on partnering with campus learning centers She pays particular attention to academically unprepared students noting that the strategies she offers for this particular population are equally beneficial for all students While stressing that there are many ways to teach effectively and that readers can be flexible in picking and choosing among the strategies she presents Sandra McGuire offers the reader a step by step process for delivering the key messages of the book to students in as little as 50 minutes Free online supplements provide three slide sets and a sample video lecture This book is written primarily for faculty but will be equally useful for TAs tutors and learning center professionals For readers with no background in education or cognitive psychology the book avoids jargon and esoteric theory

Jackson,2013-10 Why do so many adults today struggle trying to fit in when it comes to their careers and relationships Why do so many of us think we do not measure up Measure up to what and according to whose expectations Could these feelings stem from childhood Could parents inadvertently be instilling these thoughts in our children due to some unwritten rule of what is normal or traditional Jesus life portrays an excellent example of accepting oneself and others as unique children of God created for a purpose This book will encourage parents of

IMPROVING SCHOOLS FOR AFRICAN AMERICAN STUDENTS Sheryl J. Denbo, Lynson Moore Beaulieu, 2002-01-01

Improving Schools for African American Students is designed to provide educational leaders with a better understanding of how to recognize the diversity of strengths that Black students bring with them to school and how to use these strengths to improve achievement. The articles contained in this book discuss generic education issues such as policy reform, the importance of high quality teaching, and the improvement of schools from the perspective of the academic achievement of African American students. Part I explores institutional racism in the context of America's public schools and provides suggestions for educational leaders to eliminate harmful policies and practices within educational institutions and settings. Part II discusses the kinds of institutional and instructional changes that are needed to support successful schooling of African American children and youth. Part III focuses on the challenges presented to African American students by the current high stakes testing environment that surrounds standards assessment and accountability. A review of the literature on schools that have succeeded in improving achievement for African American students at the elementary, middle, and high school levels, with districts moving towards narrowing the achievement gap, is included. This text examines a wide variety of policies, programs, practices, and research that will provide valuable insight. The emphasis throughout the book is on the ability of educators to successfully restructure their schools, offer high quality teaching and learning standards for African American students, and to make the kinds of changes that will result in high achievement for all students.
