Traditionalism Mark Sedgwick, 2023 Traditionalism is a shadowy philosophy that has influenced much of the twentieth century and beyond. It is a worldview that rejects modernity and instead turns to mystical truth, perennialism, and tradition as its guide. Mark Sedgwick, one of the world's leading scholars of Traditionalism, presents a major new intellectual history pulling back the curtain on the foundations of Traditionalist philosophy and its major proponents. Traditionalism provides an expansive guide to this important school of thought, one that is little known and even less understood, and shows how pervasive these ideas have become.

For more than 40 years, Titus Burckhardt worked to document and preserve the artistic and architectural heritage of Fez in particular and Morocco in general. These newly translated lectures, delivered while Burckhardt was living and working in Fez, explore how the historic city can be preserved without turning it from a living organism into a dead museum city and how it can be adapted and updated using the values that gave birth to the city and its way of life. Aided by photographs and sketches made during the course of his lifetime, Burckhardt conveys what it means to be a living Islamic city.

The Topkapi Scroll Gülru Necipoğlu, 1996-03-01 Since precious few architectural drawings and no theoretical treatises on architecture remain from the premodern Islamic world, the Timurid pattern scroll in the collection of the Topkapi Palace Museum Library is an exceedingly rich and valuable source of information. In the course of her in-depth analysis of this scroll, dating from the late fifteenth or early sixteenth century, Gülru Necipoğlu throws new light on the conceptualization, recording, and transmission of architectural design in the Islamic world between the tenth and sixteenth centuries. Her text has particularly far-reaching implications for recent discussions on vision, subjectivity, and the semiotics of abstract representation. She also compares the

Islamic understanding of geometry with that found in medieval Western art making this book particularly valuable for all historians and critics of architecture The scroll with its 114 individual geometric patterns for wall surfaces and vaulting is reproduced entirely in color in this elegant large format volume An extensive catalogue includes illustrations showing the underlying geometries in the form of incised dead drawings from which the individual patterns are generated An essay by Mohammad al Asad discusses the geometry of the muqarnas and demonstrates by means of CAD drawings how one of the scroll s patterns could be used co design a three dimensional vault
