Granzer,2016-05-12 *Actors and the Art of Performance Under Exposure* combines the author's two main biographical paths her professional commitment to the fields of both theatre and philosophy The art of acting on stage is analysed here not only from the theoretical perspective of a spectator but also from the perspective of the actor The author draws on her experience as both a theatre actor and a university professor whose teachings in the art of acting rely heavily on her own experience and also on her philosophical knowledge The book is unique not only in terms of its content but also in terms of its style Written in a multiplicity of voices the text oscillates between philosophical reasoning and narrative forms of writing including micro narratives fables parables and inter alia by Carroll Hoffmann and Kleist Hence the book claims that a trans disciplinary dialogue between the art of acting and the art of philosophical thinking calls for an aesthetical research that questions and begins to seek alternatives to traditionally established and ingrained formats of philosophy **Stella Adler** Howard
