Art Of The Impossible Politics As Morality In Practice:

The Art of the Impossible Václav Havel, 1997 There is no shortage of politicians who make a habit of shooting from the hip but it is much rarer to find one who speaks from the heart Václav Havel knows no other way to speak or to write Both as a dissident and as a playwright it was his sworn purpose for many years to combat evil with nothing but truth As president of Czechoslovakia and now of the Czech Republic he has clung to that habit refusing to turn over either his conscience or his voice to political handlers and professional speechwriters Instead he assumes the additional burden for him it is a distinct pleasure of composing all of his oratory Audiences from New York to New Delhi Oslo to Tokyo have been the luckier for his decision This volume consists of thirty five of these essays written between the years 1990 and 1996 that manage to be both profoundly personal and profoundly political Havel writes of totalitarianism its miseries and the nonetheless difficult emergence from it He describes how his country and the other postcommunist countries are learning democracy from scratch and are encountering obstacles from inside and out He marvels at the single technology driven civilization that envelops the globe and the challenges this presents to multicultural realities He invokes the duty of every person alive to prevent hatred and fear from derailing history ever again He acknowledges the advantage it is for doing a good job as president to know that I do not belong in the position and that I can at any moment and justifiably be removed from it And he reminds us that contrary to all appearances common sense moderation responsibility good taste feeling instinct and conscience are not alien to politics but are the very key to its long term success *Political Action in Václav Havel's Thought* Delia Popescu, 2012-01-01 *Political Action in Václav Havel's Thought* The Responsibility of Resistance by Delia Popescu explores the Czech dissident's theory of individual opposition resistance to oppression and individual responsibility The book contributes to our understanding of both the extreme circumstances of oppression and to the subversive uses of oppression in modern liberal democracy **The Politics of Truth and Other Untimely Essays** Ellis Sandoz, 1999 This volume explores the historical and theoretical underpinnings of personal liberty and free government and provides an analysis of the crisis of civic consciousness endangering both Politics of Fear, Practices of Hope Stefan Skrimshire, 2011-11-03 *Politics of Fear Practices of Hope* is about the relationship between two hugely influential ideas in political life fear and hope How are cultures of resistance nurtured within an environment of paranoia and social paralysis Stefan Skrimshire argues that grassroots responses to a politics of fear coincide with an explosion of interest in the quasi religious themes of apocalypse eschatology and utopia in cultural life Where visions of a better future are replaced by the acceptance of a fearful present a state of war with no end this is an important examination of the beliefs that underpin our capacity to hope **Václav Havel's Meanings** David S. Danaher, Kieran Williams, 2024-01-01 No one in Czech politics or culture could match the international stature of Václav Havel at the time of his death in 2011 In the years since his passing his legacy has only grown as developments in the Czech Republic and elsewhere around the world continue to show the importance of his work and

writing against a range of political and social ills from autocratic brutality to messianic populism This book looks squarely at the heart of Havel's legacy the rich corpus of texts he left behind It analyzes the meanings of key concepts in Havel's core vocabulary truth power civil society home appeal indifference hotspot theatre prison and responsibility Where do these concepts appear in Havel's oeuvre What part do they play in his larger intellectual project How might we understand Havel's focus on these concepts as a centerpiece of his contribution to contemporary thought How does Havel's particular perspective on the meaning of these concepts speak to us in the here and now The ten contributors use a variety of methodological tools to examine the meaning of these concepts drawing on a diversity of disciplines political science and political philosophy historical and cultural analysis discourse textual analysis and linguistic corpus analysis

The Politics of Actually Existing Unsustainability John Barry, 2012-02-23 At the level of developing a progressive and critical theoretical understanding of unsustainability it argues for the importance of integrating vulnerability which has been largely neglected by both mainstream western political theory and analyses of the current global ecological crisis It suggests that valuable insights into the causes of and alternatives to unsustainability can be found in a critical embracing of human vulnerability and dependency as both constitutive and ineliminable aspects of what it means to be human Rather than seeing invulnerability as the appropriate response the book defends resilience and the ability to cope with rather than solve vulnerability as more productive

company profitability and long term success An Ethic for Health Promotion David R. Buchanan, 2000-01-20 What are the goals of health promotion and the most appropriate means of achieving them The prevailing view is that these goals are to prolong life and reduce mortality rates Since the leading causes of morbidity and mortality are now largely attributable to lifestyle behaviors smoking diet exercise etc the means of achieving reductions in heart disease cancer strokes diabetes and other chronic conditions are to identify more effective techniques for changing people's behavior Virtually all health promotion research is currently directed towards accomplishing this objective But at what cost As researchers strive for more effective ways to change people's behavior what are the implications for individual autonomy integrity and responsibility Buchanan sets out to explain why a science of health promotion is neither imminent or estimable He argues that health promotion is inescapably a moral and political endeavor and that goals more befitting the realization of human well being are to promote self knowledge individual autonomy integrity and responsibility through putting into practice more democratic processes of self direction and mutual support in civil society Teaching Literacy for Love and Wisdom Jeffrey D.
