Women in World History Bonnie G. Smith,2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe Historians have investigated womens daily lives in virtually every region and have researched the leadership roles women have filled across time and region They have found and

demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes The Encyclopedia contains over 1 250 signed articles arranged in an A Z format for ease of use The entries cover six main areas biographies geography and history comparative culture and society including adoption abortion performing arts organizations and movements such as the Egyptian Uprising and the Paris Commune womens and gender studies and topics in world history that include slave trade globalization and disease With its rich and insightful entries by leading scholars and experts this reference work is sure to be a valued go to resource for scholars college and high school students and general readers alike

Global Objects Edward S. Cooke,2022-09-13 A bold reorientation of art history that bridges the divide between fine art and material culture through an examination of objects and their uses Art history is often viewed through cultural or national lenses that define some works as fine art while relegating others to the category of craft Global Objects points the way to an interconnected history of art examining a broad array of functional aesthetic objects that transcend geographic and temporal boundaries and challenging preconceived ideas about what is and is not art Avoiding traditional binaries such as East versus West and fine art versus decorative art Edward Cooke looks at the production consumption and circulation of objects made from clay fiber wood and nonferrous base metals Carefully considering the materials and process of making and connecting process to product and people he demonstrates how objects act on those who look at use and acquire them He reveals how objects retain aspects of their local fabrication while absorbing additional meanings in subtle and unexpected ways as they move through space and time In emphasizing multiple centers of art production amid constantly changing contexts Cooke moves

beyond regional histories driven by geography nation state time period or medium Beautifully illustrated Global Objects traces the social lives of objects from creation to purchase and from use to experienced meaning charting exciting new directions in art history **Surface Design Journal** ,1989 *Contemporary Tie and Dye Textiles of Indonesia* Kim Jane Saunders,1997 Hand spun and hand woven textiles have always been an integral part of the cultures of South East Asia This book maps contemporary areas of production and markets and documents a cross section of current practices and examples of tie and dye weaving in Indonesia providing a fascinating introduction to the diversity of the textiles of each of the main islands as well as useful guidance on their identification and classification **American Menswear from the Civil War to the Twenty-First Century, Second Edition** Daniel Delis Hill,2024-01-20 In a glance at American menswear over the past 150 years change has been sometimes glacial in its evolution sometimes regressive and nostalgic and other times abrupt and revolutionary In this study of American menswear from the Civil War to the twenty first century that evolution is chronicled and documented with more than 700 illustrations In addition to the main categories of suits sportswear and outerwear each era also includes a detailed examination of sleepwear underwear swimwear hats neckwear footwear and accessories Further Daniel Delis Hill examines not only American men s dress and the structures of the menswear industry but also the historical and socioeconomic drivers that affected men s style particularly the shifting conventions and iconoclasm of American ideas and ideals of masculinity Silk Jacques Anquetil,Pascale Ballesteros,1995 From start to finish this book is a visual delight In 300 remarkably clear and vivid color photographs the glories of this regal fabric are displayed by examples of its use in fashions and furnishings The main focus of the book is silk fabrics from periods preceding the 14th century to the present in France but actual gowns and textiles from France s museums and archives are shown as well Whereas Phillipa Scott s *The Book of Silk* LJ 1 94 gave a general history of silk from its origins in Asia textiles historian Anquetil concentrates on Europe especially the silk manufacturing centers of Tours and Lyon There is so little if any duplication between the two books that collections specializing in textiles fashion or design really must have both If more general collections can afford only one volume then Anquetil s more deluxe *Silk* is highly recommended From Library Journal *Bibliography of Art and Architecture in the Islamic World (2 vols.)* Susan Sinclair,2012-04-03 Following the tradition and style of the acclaimed *Index Islamicus* the editors have created this new *Bibliography of Art and Architecture in the Islamic World* The editors have surveyed and annotated a wide range of books and articles from collected volumes and journals published in all European languages except Turkish between 1906 and 2011 This comprehensive bibliography is an indispensable tool for everyone involved in the study of material culture in Muslim societies **Nigerian Traditional Crafts for Self-reliance** Archaeological Association of Nigeria.
