the human figure that had long been standard In the decades around 1900 artists working in different countries and across different media began to present human figures in strictly frontal lateral and dorsal postures The effect both archaic and modern broke with the centuries old tradition of rendering bodies in torsion with poses designed to simulate the human being s physical volume and capacity for autonomous thought and movement This formal departure destabilized prevailing visual codes for signifying the existence of the inner life of the human subject Exploring major works by Georges Seurat Gustav Klimt and the dancer and choreographer Vaslav Nijinsky replete with new archival discoveries Modern Art and the Remaking of Human Disposition combines intensive formal analysis with inquiries into the history of psychology and evolutionary biology In doing so it shows how modern understandings of human consciousness and the relation of mind to body were materialized in art through a new vocabulary of postures and poses Soldier Heroes Graham

Wetta,Martin Novelli,2016-12-08 Last Stands from the Alamo to Benghazi examines how filmmakers teach Americans about the country s military past Examining twenty three representative war films and locating them in their cultural and military landscape the authors argue that Hollywood s view of American military history has evolved in two phases The first phase extending from the very beginnings of filmmaking to the Korean War projected an essential patriotic triumphalism The second phase from the Korean and Vietnam Wars to the present reflects a retreat from consensus and reflexive patriotism In

describing these phases the authors address recurring themes such as the experience of war and combat the image of the American war hero race gender national myths and more With helpful film commentaries that extend the discussion through popular movie narratives this book is essential for anyone interested in American military and film history Addiction and Art Patricia B.
