Entrepreneurship + Innovation in Egypt Nagla Rizk, Hassan M. E. Azzazy, 2016. Entrepreneurship and innovation have emerged globally as significant drivers for inclusive economic growth, contributing to both job and wealth creation. Especially since Egypt's 2011 revolution, the need has become pressing for novel models that capitalize on the country's human resources. Half of the Egyptian population is less than 25 years old, and almost one quarter is between 18 and 29 years old. More than any other time, an entrepreneurial spirit and innovative mindset need to be fostered and encouraged to best rebuild the country's economy on solid and sustainable foundations. This important book sheds new light on the promise of entrepreneurship and innovation in restructuring Egypt and their potential for promoting economic development. It probes the relationship between innovation and economic growth, providing linkages between academic research and applied industry needs. It also looks at how creativity and innovation can be embedded in the educational system, the challenges facing the entrepreneurial ecosystem, and considers ways to enhance social entrepreneurship. Covering a lot of ground, the authors propose answers and solutions, as well as laying the groundwork for further research and deliberations in this field in general and in Egypt at this juncture of the country's development in particular.

Creativity in Theatre Suzanne Burgoyne, 2018-09-14. People who don't know theatre may think the only creative artist in the field is the playwright, with actors, directors, and designers mere interpreters of the dramatist's vision. Historically, however, creative mastery and power have passed through different hands. Sometimes the playwright did the staging. In other periods, leading actors demanded plays be changed to fatten their roles. The late 19th and 20th centuries saw the rise of the director, in which director and playwright struggled for creative dominance. But no matter where the balance of power rested, good theatre artists of all kinds have created powerful experiences for their audience. The purpose of this volume is to bridge the interdisciplinary abyss between the study of creativity in theatre, drama, and in other fields. Sharing theories, research findings, and pedagogical practices, the authors and I hope to stimulate discussion among creativity and theatre scholars, teachers, as well as multidisciplinary research. Theatre educators know from experience that performance classes enhance student creativity. This volume is the first to bring together perspectives from multiple disciplines on how drama pedagogy

facilitates learning creativity Drawing on current findings in cognitive science as well as drama teachers lived experience the contributors analyze how acting techniques train the imagination allow students to explore alternate identities and discover the confidence to take risks The goal is to stimulate further multidisciplinary investigation of theatre education and creativity with the intention of benefitting both fields **Organic Homiletic** Richard Hee-Chun Park,2006 Organic form theory of Romanticism helps writers artists and preachers free themselves from potentially limiting norms and rules of form Organic Homiletic Samuel T Coleridge Henry G Davis and the New Homiletic will inspire preachers to express their individual voices and create their own authentic forms by offering preachers innovative methods to creatively imitate blend and mix a wide variety of sermon forms The book is a motivator for preachers to intuitively discover sermon content in the rhetorical context of a given preaching situation and to develop that content utilizing organic form in the process of sermon preparation Organic Homiletic is a must read for seminarians experienced preachers creative writers and artists all those who seek to be fresh authentic creative liberated and organic Creativity and the Standards John Dacey,Wendy Conklin,2013-01-01 Build students creativity while implementing standards based instruction This resource helps teachers learn how to merge teaching the standards and creative thinking strategies in order to help students solve problems think effectively and be innovative This unique resource includes classroom management ideas lesson examples and assessment information
