Ordering Colours in 18th and Early 19th Century Europe Tanja C. Kleinwächter, Sarah Lowengard, Friedrich Steinle, 2023-10-04 This book describes the international effort to give order to colours and thus facilitate communication about it two topics deemed essential to a modernising world that were also recognizably complex Expert essays will enhance readers understanding of the struggle to coordinate nature with art at a time when approaches to both were undergoing rapid change Ordering Colours shows how such seemingly trivial concerns as identifying the basic colours and disseminating appropriate colour diagrams had to meet philosophical scientific and professional needs across Europe Contributors detail the many schemes for colour systematization and their real world applications questions of concern to both academic and manufacturing focused investigators throughout the long 18th century They bring together original research and new thinking about landmark early modern studies to address important developments as well as neglected historical contributions of European arts sciences and economies This collection is an important addition to the libraries of all who are interested in public culture and manufacturing developments in the early modern period and is aimed at historians of art technology philosophy and physics

Civilisation and Nineteenth-century Art College Art Association (U.S.). Annual Conference, 2016 Over the course of the long nineteenth century Civilisation was the subject of some of the most prominent public mural paintings and sculptures in Europe and the United States especially those that speculated on the direction of history It also underpinned Western depictions of non Western societies and evaluations of social progress and artistic excellence The essays in this volume explore the ways in which the idea of Civilisation acted as a lens through which Europeans and Americans represented themselves and others how this concept reshaped understandings of historical and artistic development and also how it changed and was put to new uses as the century progressed This collection will prove invaluable to students and academics in both history and art history

The Oxford History of Western Art Martin Kemp, 2000 The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis Another key feature of the narrative is the re definition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major religious and secular functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their

own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union India Africa and Afro Caribbean Australia and Canada Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students

Ancient Art and its Commerce in Early Twentieth-Century Europe Guido Petruccioli, 2022-12-29 John Marshall 1862-1928 was an antiquities expert hired by the Metropolitan Museum of New York An attentive observer of the antiquities trade Marshall's archive photographs and annotations on more than 1000 objects shines light on the secretive world of art dealing and how objects arrived at the largest museums of Europe and North America
