Fuhring, Donald J. La Rocca, Anne Varick Lauder, Christof Metzger, Femke Speelberg, Ad Stijnman, Pierre Terjanian, Julia  
Zaunbauer, 2019-10-21 The Renaissance of Etching is a groundbreaking study of the origins of the etched print Initially used  
as a method for decorating armor etching was reimagined as a printmaking technique at the end of the fifteenth century in  
Germany and spread rapidly across Europe Unlike engraving and woodcut which required great skill and years of training  
the comparative ease of etching allowed a wide variety of artists to exploit the expanding market for prints The early  
pioneers of the medium include some of the greatest artists of the Renaissance such as Albrecht Dürer Parmigianino and  
Pieter Bruegel the Elder who paved the way for future printmakers like Rembrandt Goya and many others in their wake  
Remarkably contemporary artists still use etching in much the same way as their predecessors did five hundred years ago

Richly illustrated and including a wealth of new information The Renaissance of Etching explores how artists in Germany the Netherlands Italy and France developed the new medium of etching and how it became one of the most versatile and enduring forms of printmaking p p1 margin 0 0px 0 0px 0 0px font 14 0px Verdana

The Generalship of Muhammad Russ Rodgers,2012-03-18 His campaigns military thought and insurgent strategy There are many biographies of the Prophet and they tend to fall into three categories pious works that emphasize the virtues of the early Islamic community general works for non Muslim or non specialist readers and source critical works that grapple with historiographical problems inherent in early Islamic history In The Generalship of Muhammad Russ Rodgers charts a new

path by merging original sources with the latest in military theory to examine Muhammad's military strengths and weaknesses. Incorporating military, political, and economic analyses, Rodgers focuses on Muhammad's use of insurgency warfare in seventh-century Arabia to gain control of key cities such as Medina. Seeking to understand the operational aspects of these world-changing battles, he provides battlefield maps and explores the supply and logistic problems that would have plagued any military leader at the time. Rodgers explains how Muhammad organized his forces and gradually built his movement against sporadic resistance from his foes. He draws from the hadith literature to shed new light on the nature of the campaigns. He examines the Prophet's intelligence network and the employment of what would today be called special operations forces. And he considers the possibility that Muhammad received outside support to build and maintain his movement as a means to interdict trade routes between the Byzantine Empire and the Sasanid Persians.

**The History of Art in Wei, Jin, Southern and Northern Dynasties** Li Shi, The book is the volume of The History of Art in Wei, Jin, Southern and Northern Dynasties among a series of books of Deep into China Histories. The earliest known written records of the history of China date from as early as 1250 BC from the Shang dynasty c. 1600–1046 BC and the Bamboo Annals 296 BC describe a Xia dynasty c. 2070–1600 BC before the Shang but no writing is known from the period. The Shang ruled in the Yellow River valley which is commonly held to be the cradle of Chinese civilization. However, Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River. These Yellow River and Yangtze civilizations arose millennia before the Shang. With thousands of years of continuous history, China is one of the world's oldest civilizations and is regarded as one of the cradles of civilization. The Zhou dynasty 1046–256 BC supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature, and philosophy first developed during those troubled times. In 221 BC, Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death and was supplanted by the longer-lived Han dynasty 206 BC–220 AD. Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men well-versed in calligraphy, history, literature, and philosophy were carefully selected through difficult government examinations. China's last dynasty was the Qing 1644–1912, which was replaced by the Republic of China in 1912 and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace and periods of war and failed statehood, the most recent being the Chinese Civil War 1927–1949. China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese.
