Cracking the Code of Our Physical Universe Matthew M. Radmanesh, 2006-05-30 What sets this book apart is the fact that it is not just another science book describing scientific facts and phenomena It would surely be redundant since that task has been done many times over with much more elegant prose and brighter narrators In this book for the first time we have undertaken the task of breaking the code of any piece of matter or natural phenomena whether it is an atom a quantum occurrence a planet a galaxy or any other perceivable thing It covers any natural phenomena ever discovered or one that will be unravelled by the future pioneers in their respective fields This book provides the trail map of any and all things that man has discovered and shows how their codes were cracked The list of discoveries is endless but prominent amongst them are the discovery of fire electricity magnetism laws of motion the solar system and planets so on and so forth This book goes beyond just pure science since it fuses philosophy with science It actually makes science a subset of philosophy or more precisely applied philosophy Just like the light phenomenon which was made to be a subset of the field of electricity by James Clerk Maxwell revolutionizing our technical world so does this book by bringing a new era of incredible developments for

Codes and Evolution Marcello Barbieri, 2024-05-09 This text builds upon the over 1500 papers published in peer reviewed journals revealing that there are more than 200 biological codes in living systems The author claims this experimental fact is bound to change biology forever This book shows how this very discovery reveals that coding is a new mechanism of life just as the discovery of electromagnetism revealed the existence of a new physical force in the universe The existence of many biological codes furthermore Barbieri argues is one of those experimental facts that have extraordinary theoretical consequences It implies that coding is not only a mechanism that constantly operates in all living systems but also a mechanism of evolution more precisely a mechanism that gave origin to the absolute novelties of the history of life This amounts to saying that evolution took place by two distinct mechanisms by natural selection and by natural conventions two mechanisms that are fundamentally different because natural selection is the result of copying and deals with information whereas natural conventions are the result of coding and deal with meaning
