Created Equal Ap Edition 2nd Edition:

Autism - A Holistic View, 2nd Edition Regina Mignano, 2008-09-12 Much of the recent research in autism comes from a quantitative researcher's viewpoint. However, this book's mission is to look at the whole picture in order to capture the meaning of Autism and its effects on the family. The book is written primarily for social work professionals in the field of autism and developmental disabilities. Students, individuals affected with Autism Spectrum Disorders and their families alike, and anyone who has a special interest in the ASD field. In order to capture the impact of autism, the author utilizes her own personal and professional experience in identifying the different aspects that make up the culture of autism: its history, the biological and environmental aspects, past and present governmental and educational policies, the social impact of autism, and its impact on the family unit.

Konstruowanie historii Anna Peck, Stosunek do własnej historii i roli dziejowej człowieka do sposobu jej postrzegania przez innych. Zjawisko kreowania wizji i interpretacji historycznych stanowi nieodczyny element procesu edukacyjnego. Percepcja oraz sposoby prezentacji polskiej historii i kultury w amerykańskich podręcznikach szkolnych i akademickich w zakresie przedmiotów w historii powszechnej, historii europejskiej oraz historii cywilizacji zachodniej były w XX i na początku XXI wieku kształtowane pod wpływem zmieniających się sytuacji społecznej i politycznej oraz dominujących tendencji naukowych. W koncepcjach filozoficznych i intelektualnych rozwijanych w Europie Zachodniej i Stanach Zjednoczonych od czasów oświecenia do końca okresu zimnej wojny najczęściej wykluczono narody oraz państwa Europy rodowej i Wschodniej z kręgu dominujących w świecie cywilizacji zachodniej. W konsekwencji Polska, jej historia i kultura były traktowane marginalnie. Autorka analizuje nie tylko zawartość podręcznika, lecz także przyczyny dla których cięgle jeszcze trudno znaleźć informacje na temat udziału Polaków w drugiej wojnie światowej, Katynia czy powstania warszawskiego.

Resources in Education, 1987

Co-use of medicines in surgery, 2nd edition Songwen Tan, Weiguo Li, Chuanpin Chen, 2025-03-03 Download the ebooks for this Research Topic Volume I A PDF EPUB Volume I B PDF EPUB Co-use of medicines in surgery is important for a successful operation. There are several kinds of drugs used for preoperative, intraoperative, and postoperative treatment. For instance, the co-use of sterilization, anti-inflammation, and hemostasis drugs is necessary for most surgical operations. Moreover, the sedative drugs used preoperatively can alleviate patients' concerns. The anti-allergic drugs and hormone drugs can prevent allergies caused by some medications used during surgery. The drugs inhibiting glandular secretion can reduce the secretion of sputum, which keeps patients' respiratory tract unobstructed and reduces the risk of aspiration. Before and after surgery, the use of anti-cancer, visceral, and many other medicines play a key role in disease treatment. Current disease treatment is based on medicine and surgery. In many hospitals, however, the drug department is not directly involved in surgical operation. Although the doctors have sufficient knowledge in medicines, it is suggested to pay more attention to the interaction and balance between medicine and surgery. With the development of new drugs, there are growing needs of co-use of medicines for preoperative, intraoperative, and postoperative treatment. Therefore,

this Research Topic would attract surgical studies with specificities in using medicines and advanced healthcare techniques monitoring biochemical indicators and concentrations relative to pharmacokinetics understanding and balancing the interaction between medicine and surgery The outcome of the Research Topic may contribute to the improvement of surgical protocols from a pharmaceutical perspective The aim of the current Research Topic is to cover promising recent and novel research trends in co use of medicines in surgery Areas to be covered in this Research Topic may include but are not limited to Model informed medicine and surgery Medicines for preoperative intraoperative and postoperative treatment Advanced healthcare techniques Pharmacokinetics biochemical indicators and concentrations Balance of medicine and surgery from perspective of pharmacists and nurses Improved surgical protocols Sterilization anti inflammation and hemostasis drugs Sedative and anti allergic and secretion inhibiting drugs Visceral drugs for disease treatment Clinical practice and case report
