**Ethics in Small and Medium Sized Enterprises** Laura Spence, Mollie Painter-Morland, 2010-10-01 This book is the first of its kind a global overview of extant research on ethics in small and medium sized enterprises While vast amounts of corporate money government policy and media time are directed at the social and ethical activities of large corporations small businesses don t generally attract the spotlight This is wildly inappropriate however since upward of 90% of private businesses are small or medium sized This book goes some way to helping us understand the social and ethical contribution of this majority organizational form The first section of the book is a global round up of research on ethics in small and medium sized enterprises from major regions of the world In the second section smaller scale research projects from a variety of countries present both empirical and theoretical advances in the area Anyone with an interest in ethics and small and medium sized enterprises should find this an inspiring book which paves the way for future research

**Ethical Probe on Mixed Martial Arts Enthusiasts in the USA**

Andy Martrich, 2018-03-14 *Ethical Probe on Mixed Martial Arts Enthusiasts in the USA* is an ethicist's account of the development of mixed martial arts MMA as it relates to its prophets and proselytizers i.e. enthusiasts who serve as testament to the sport's corrupt disposition. Profiles on six enthusiasts reveal bizarre and in some cases nefarious activities that extend from proto MMA fads such as the ninja craze of the 1980s. *Ontological Fundamentals for Ethical Management* Dominik Heil, 2011-07-06 The book develops a philosophical foundation to the field of management education using the work of Martin Heidegger as a guiding philosophy. It asks the questions: what is a corporation and what is corporate management? These two questions are foundational for management thought in general and management ethics in particular. Most other academic fields are in some way defined and guided by a philosophical discourse. This philosophical discourse is largely missing in the field of management thought and education. Without this foundation, it can never be clear what actually belongs into a certain academic discipline and what does not. It also therefore lacks a sound and well-articulated ontological foundation critical for developing approaches to ethical management. This book seeks to fill this gap and consequently represents an interdisciplinary effort between the academic field of management, business administration and philosophy, which is vital for business ethics. Intended as required reading for an elective on philosophy of management that is offered annually at the Wits Business School, University of the Witwatersrand, Johannesburg. The structure of the course will be largely based on the structure of the book. **Socially Engaged Art and Ethics** Anthony Schrag, 2025-07-18 Bringing together artists, curators, activists, academics, managers and educators from around the world, this unique anthology examines the notion of ethics within socially engaged art. The volume aims to deepen conversations around what good or right activities could be in this developing and expanding practice, and readers are invited to consider the contextual nature of socially engaged art, its politics, infrastructures and values. Supported by case studies from the United Kingdom, the United States, China, Cuba, South Africa and Norway, as well as discussions relating to education, cultural policy and activism, this volume provides a much needed critical analysis in the making, curating, commissioning and managing of socially engaged art. This collection is an ideal text for interdisciplinary courses that place visual arts, including design or performance, within social and political contexts, but also for students and scholars of art, art history and visual studies more generally. *African Art and Agency in the Workshop* Sidney Littlefield Kasfir, Till Förster, 2013 The role of the workshop in the creation of African art is the subject of this revelatory book. In the group setting of the workshop, innovation and imitation collide; artists share ideas and techniques and creative expression flourishes. *African Art and Agency in the Workshop* examines the variety of workshops from those which are politically driven or tourist-oriented to those based on historical patronage or allied to current artistic trends. Fifteen lively essays explore the impact of the workshop on the production of artists such as Zimbabwean stone sculptors, master potters from Cameroon, wood carvers from Nigeria and others from across the continent. **Science and the Structure of Ethics** Abraham Edel, Initially prepared as part of the Foundations of the Unity of Science volumes under

the auspices of the International Encyclopedia of Unified Science Science and the Structure of Ethics soon took on a life of its own Well positioned in the naturalistic tradition of ethical theory extending from John Dewey at the start and Richard Rorty at the conclusion of the century Abraham Edel s volume offers a remarkable synthesis of the ways in which ethical statements can be examined and the nature of ethical concerns Edel reveals a singular capacity to move beyond oracular controversies of the good and the right in favor of a comparative analytic and functional account of how ethical perspectives and practices affect the content of moral discourse In Edel s work the structure of ethical behavior is defined by biological psychological social and historical functions Hence a scientific account of ethics is possible since moral norms are themselves products of an experiential field open to verification procedures common to all other walks of human life In reviewing the impact of Edel s work in general and this volume in particular Irving Louis Horowitz notes that Edel s naturalistic emphasis fits neatly with a view of ethics as something grounded in human experience rather than mandated from divine assumption It is hard for me to imagine a turning back from the hard lessons of the century any more in ethical theory than in empirical research as such We owe a central place in our century s intellectual capital to Edel s examination of ethical doctrines in the light of changing circumstances This is a work certain to enlist the interest of ethicists sociologists of knowledge as well as those concerned with issues in the philosophy of science and religion alike International Entrepreneurship in the Arts
