R. Bruce Elder

Art In Theory 1900 199:

DADA, Surrealism, and the Cinematic Effect R. Bruce Elder, 2015-10-15 This book deals with the early intellectual reception of the cinema and the manner in which art theorists philosophers cultural theorists and especially artists of the first decades of the twentieth century responded to its advent While the idea persists that early writers on film were troubled by the cinema's lowly form this work proposes that there was another largely unrecognized strain in the reception of it Far from anxious about film's provenance in popular entertainment some writers and artists proclaimed that the cinema was the most important art for the moderns as it exemplified the vibrancy of contemporary life This view of the cinema was especially common among those whose commitments were to advanced artistic practices Their notions about how to recast the art media or the forms forged from those media's materials and the urgency of doing so formed the principal part of the conceptual core of the artistic programs advanced by the vanguard art movements of the first half of the twentieth century This book a companion to the author's previous *Harmony Dissent* examines the Dada and Surrealist movements as responses to the advent of the cinema

Multimedia Modernism Julian Murphet, 2009-04-30 Multimedia Modernism explores the complex effects of a new media environment on avant garde literary production in the early twentieth century During this period the likes of Gertrude Stein Ezra Pound and Louis Zukofsky wrote works which in one way or another attest to the immense effect that photography cinematography mechanical print technology and visual advertising had on the established arts Re-reading modernism's technological origins through the lens of media theory this innovative study proposes a serious new methodological approach to modernism in general Examining a wide range of literature that includes Gertrude Stein's contributions to *Camera Work* Louis Zukofsky's groundbreaking poem *A* and Wyndham Lewis's celebrated *Blast* this book embeds literary revolution within media evolution to show that literary criticism and media history have a lot to learn from each other

Avant-Gardes and Partisans Reviewed Fred Orton, Griselda Pollock, 1996 By addressing key issues in visual culture and the politics of representation this book provides a reference and an analysis of the work of Orton and Pollock internationally acknowledged as the leading exponents of the social history of art

Malevich and Film Margarita Tupitsyn, Kazimir Severinovich Malevich, Viktor Tupitsyn, 2002-01-01 The book begins with a re-evaluation of Malevich's most famous painting *Black Square* a work whose meaning and function was in constant flux Through *Black Square* Malevich began to cross the bridge from the painting medium to mechanically generated production ultimately

influencing the post revolutionary phase of his Suprematism and leading to his abandonment of abstraction in the late 1920s

Federalizing the Muse Donna M. Binkiewicz,2004 The National Endowment for the Arts is often accused of embodying a liberal agenda within the American government This text assesses the leadership and goals of Presidents Kennedy through Carter as well as Congress and the National Council on Arts covering the players who created national arts policy

The Key Issues Concerning Contemporary Art Gary Willis,2010 This thesis argues that the contemporary artist s objective is the production of new social space and the institution of new cultural knowledge It does this by drawing an unexpected parallel between the social and political expectations facing the contemporary artist and the deepest philosophic conception of the artist s function It traces art s historical trajectory from 20th century modernism post modernism to post colonialism from a broad range of critical theoretical and curatorial perspectives

Art in Consumer Culture Grace McQuilten,2017-07-05 Written with beautiful clarity Art in Consumer Culture Mis Design asks the contemporary art world to be honest about the pervasive effects of commodification and the difficulty of staging critique The book examines the collusion of art and design in contemporary artistic practices in order to find avenues of critique in a commercially driven cultural landscape Grace McQuilten focuses on the work of Takashi Murakami Andrea Zittel Adam Kalkin and Vito Acconci four contemporary artists who claim to be working in the field of design rather than the traditional art world McQuilten argues that Zittel Acconci and Kalkin engage with design only to reactivate the critical practice of art in a more direct engagement with capital and conceives of and affirms a future for art outside of the art world as a parasite in the complex beast of late capitalism This

book is an important and timely provocation to a cynical and apathetic consumer culture and a call to arms for creative freedom and critical thought **Art in Theory** Charles Harrison,Paul Wood,1997 What Should Schools Teach? Alka Sehgal Cuthbert ,Alex Standis,2021-01-07 The design of school curriculums involves deep thought about the nature of knowledge and its value to learners and society It is a serious responsibility that raises a number of questions What is knowledge for What knowledge is important for children to learn How do we decide what knowledge matters in each school subject And how far should the knowledge we teach in school be related to academic disciplinary knowledge These and many other questions are taken up in What Should Schools Teach The blurring of distinctions between pedagogy and curriculum and between experience and knowledge has served up a confusing message for teachers about the part that each plays in the education of children Schools teach through subjects but there is little consensus about what constitutes a subject and what they are for This book aims to dispel confusion through a robust rationale for what schools should teach that offers key understanding to teachers of the relationship between knowledge what to teach and their own pedagogy how to teach and how both need to be informed by values of intellectual freedom and autonomy This second edition includes new chapters on Chemistry Drama Music and Religious Education and an updated chapter on Biology A revised introduction reflects on emerging discourse around decolonizing the curriculum and on the relationship between the knowledge that children encounter at school and in their homes **The Artless Jew** Kalman P. Bland,2001-07-02 Conventional wisdom holds that Judaism is indifferent or even suspiciously hostile to the visual arts due to the Second Commandment s prohibition on creating graven images the dictates of monotheism and historical happenstance This intellectual history of medieval and modern Jewish attitudes toward art and representation overturns the modern assumption of Jewish iconophobia that denies to Jewish culture a visual dimension Kalman Bland synthesizes evidence from medieval Jewish philosophy mysticism poetry biblical commentaries travelogues and law concluding that premodern Jewish intellectuals held a positive liberal understanding of the Second Commandment and did in fact articulate a certain Jewish aesthetic He draws on this insight to consider modern ideas of Jewish art revealing how they are inextricably linked to diverse notions about modern Jewish identity that are themselves entwined with arguments over Zionism integration and anti-Semitism Through its use of the past to illuminate the present and its analysis of how the present informs our readings of the past this book establishes a new assessment of Jewish aesthetic theory rooted in historical analysis Authoritative and original in its identification of authentic Jewish traditions of painting sculpture and architecture this volume will ripple the waters of several disciplines including Jewish studies art history medieval and modern history and philosophy **The Typographic Medium** Kate Brideau,2021-10-12 An innovative examination of typography as a medium of communication rather than part of print or digital media Typography is everywhere and yet widely unnoticed When we read type we fail to see type In this book Kate Brideau considers typography not as part of print media or digital media but as a medium of communication itself able to

transcend the life and death of particular technologies Examining the contradiction between typographic form often overlooked and function often overpowering Brideau argues that typography is made up not of letters but of shapes and that shape is existentially and technologically central to the typographic medium After considering what constitutes typographic form Brideau turns to typographic function and how it relates to form Examining typography's role in both the neurological and psychological aspects of reading she argues that typography's functions exceed reading typographic forms communicate but that communication is not limited to the content they carry To understand to what extent the design and operations of the typographic medium affect the way we perceive information Brideau warns we must understand the medium's own operational logic embodied in the full diversity of typographic forms Brideau discusses a range of topics from intellectual property protection for typefaces to Renaissance and Enlightenment ideal letterforms and draws on a wide variety of theoretical work including phenomenological ideas about comprehension German media archaeology and the media and communication theories of Vil m Flusser and others Hand drawn illustrations of typographic forms accompany the text

The Icon and the Square Maria Taroutina, 2018-11-26 In *The Icon and the Square* Maria Taroutina examines how the traditional interests of institutions such as the crown the church and the Imperial Academy of Arts temporarily aligned with the radical leftist and revolutionary avant garde at the turn of the twentieth century through a shared interest in the Byzantine past offering a counternarrative to prevailing notions of Russian modernism Focusing on the works of four different artists Mikhail Vrubel Vasily Kandinsky Kazimir Malevich and Vladimir Tatlin Taroutina shows how engagement with medieval pictorial traditions drove each artist to transform his own practice pushing beyond the established boundaries of his respective artistic and intellectual milieu She also contextualizes and complements her study of the work of these artists with an examination of the activities of a number of important cultural associations and institutions over the course of several decades As a result *The Icon and the Square* gives a more complete picture of Russian modernism one that attends to the dialogue between generations of artists curators collectors critics and theorists *The Icon and the Square* retrieves a neglected but vital history that was deliberately suppressed by the atheist Soviet regime and subsequently ignored in favor of the secular formalism of mainstream modernist criticism Taroutina's timely study which coincides with the centennial reassessments of Russian and Soviet modernism is sure to invigorate conversation among scholars of art history modernism and Russian culture
