documents to a wide variety of literary sources it weaves them all into a compelling narrative In this fashion Shahar is uniquely able to bring together social historical and mythological elements providing a demythologized account of martial Chinese traditions such as Shaolin Boxing This is sinology at its best Bernard Faure Columbia University The book clearly belongs in a new group of books challenging conventional understandings of Buddhism and violence Meir Shahar documents with meticulous accuracy and mellifluous prose the fighting monks of Shaolin monastery in China who appear first in the Tang dynasty 618 907 and continue to the present Scholars of Buddhism and Chinese history will learn much from the author's scrupulous analysis of the historical record particularly the texts on stone steles at the monastery that documents the monastery's traditions of fighting Anyone interested in martial arts or Bruce Lee films will find it fascinating to learn about the actual history of the monastery's fighting techniques I found the book a powerful and compelling read Valerie Hansen Yale University Meir Shahar's book will assure that the martial arts of Shaolin take a prominent place in the history of Chinese Buddhism Shahar has mastered a prodigious amount of secondary scholarship pored over a wealth of primary documents and brought a critical rigor to the study of these materials that is unprecedented in any language Throughout his analysis is cogent and clear The result is a delightful tour of one of the most enigmatic and compelling stories of Chinese religion the emergence and development of martial arts at Shaolin Si Entertaining as the book is it delivers as well a meditation on the sources of Chinese religion and how fiction and scripture myth and history combine to produce novel traditions The Shaolin Monastery will appeal not only to scholars of Chinese religion but to those interested in military history self cultivation martial arts and popular culture John Kieschnick University of Bristol The Shaolin Monastery charts for the first time in any language the history of the Shaolin Temple and the evolution of its world renowned martial arts In this meticulously researched and eminently readable study Meir Shahar considers the economic political and religious factors that led Shaolin monks to disregard the Buddhist prohibition against violence and instead create fighting techniques that by the twenty first century have spread throughout the world He examines the monks relations with successive Chinese regimes beginning with the assistance they lent to the seventh century Emperor Li Shimin and culminating more than a millennium later with their complex relations with Qing rulers who suspected them of rebellion He reveals the intimate connection between monastic violence and the veneration of the violent divinities of Buddhism and analyzes the Shaolin association of martial discipline and the search for spiritual enlightenment Shahar's exploration of the evolution of Shaolin fighting techniques serves as a prism through which to consider martial art history in general He correlates the emergence of the famous bare handed techniques of Taiji Quan Xingyi Quan and Shaolin Quan in the sixteenth and seventeenth centuries to the social political and religious trends of that age He then goes on to argue that these techniques were created not only for fighting but also for religious and therapeutic purposes Thus his work fills an important gap in the understanding of Chinese religion and medicine as well as the martial arts The Shaolin Monastery is the most exhaustive study to date on

the topic and the most systematic introduction to the history and the religious context of the Chinese martial arts tradition It will engage those interested in Chinese religion and history and martial arts illuminating for specialists martial artists and general readers alike the history and nature of a martial tradition that continues to grow in popularity in its native land and abroad *In the Shadows of the Dao* Thomas Michael,2015-09-25 Thomas Michael s study of the early history of the Daodejing reveals that the work is grounded in a unique tradition of early Daoism one unrelated to other early Chinese schools of thought and practice The text is associated with a tradition of hermits committed to yangsheng a particular practice of physical cultivation involving techniques of breath circulation in combination with specific bodily movements leading to a physical union with the Dao Michael explores the ways in which the text systematically anchored these techniques to a Dao centered worldview Including a new translation of the Daodejing *In the Shadows of the Dao* opens new approaches to understanding the early history of one of the world s great religious texts and great religious traditions
