*The Art of Medieval Technology* Richard W. Unger, 2004 **AVISTA studies in the history of medieval technology, science and art** Science and Art Association Villard de Honnecourt for the Interdisciplinary Study of Medieval Technology, 2002 *The Art, Science, and Technology of Medieval Travel* Robert Odell Bork, Andrea Kann, 2008 This sixth volume in the AVISTA series considers medieval travel from a variety of interdisciplinary perspectives placing the physical practice of transportation in the larger context of medieval thought about the world and its meaning The papers included cover vehicle design and logistical management the practicalities of how travellers oriented themselves and the symbolism of the landscapes and maps created in the Middle Ages **The Worlds of Villard de Honnecourt: The Portfolio, Medieval Technology, and Gothic Monuments**, 2022-12-12 This book charts the past present and future of studies on medieval technology art and craft practices Inspired by Villard s enigmatic portfolio of artistic and engineering drawings this collection explores the multiple facets of medieval building represented in this manuscript Paris Biblioth que nationale de France MS Fr 19093 The book s eighteen essays and two introductions showcase traditional and emergent methods for the study of medieval craft demonstrating how these diverse approaches collectively amplify our understanding about how medieval people built engineered and represented their world Contributions range from the analysis of words and images in Villard s portfolio to the close analysis of masonry technological marvels and gothic architecture pointing the way toward new avenues for future scholarship to explore Contributors are Mickey Abel Carl F Barnes Jr Robert Bork George Brooks Michael T Davis Amy Gillette Erik Gustafson Maile S Hutterer John James William Sayers Ellen Shortell Alice Isabella Sullivan Richard Alfred Sundt Sarah Thompson Steven A Walton Maggie M Williams Kathleen Wilson Ruffo and Nancy Wu

**Medieval Religion and Technology** Lynn Townsend White, 1978-01-01 Essays fra 1940 1975 med udgangspunkt i middelalderens teknologiske frembringelser og videnskabsm nd *Villard's Legacy* Marie-Thérèse Zenner, 2017-05-15 Villard s Legacy is in memory of the celebrated iconoclastic historian Jean Gimpel and represents a fundamental contribution to the new AVISTA series with Ashgate Publishing AVISTA was the brainchild of Gimpel a genius at making the right people meet to advance knowledge through a confluence of ideas drawn equally from the practical and scholarly domains Sixteen papers and a tribute to Gimpel underscore this confluence of technology science and art within medieval culture Appropriately six papers offer new interpretations on aspects of Villard de Honnecourt s portfolio which Gimpel rightly recognized and promoted as a unique and precious record of pre modern technology and culture This thirteenth century manuscript is now known to a wider public as the earliest testimony left by a master builder in Gothic Europe Of particular significance for the first time in eight centuries a Compagnon du Devoir initiated in the same oral tradition as Villard opens the door to interpreting these remarkable drawings Three papers address previously ignored aspects in the construction of French and English Gothic churches from the engineering of aerodynamic spires to the elastic materials of vault webbing to

the social conventions of formal design Three other contributors treat essential elements of a broader technological culture such as the horse harness and the minting of coins as well as the applicability of medieval technology to the modern world in particular third world countries a project pioneered by Gimpel Four papers conclude the volume by treating the sciences of measure and their cultural expression in medieval Europe embracing both the concepts of space and time geometry as a mathematical discipline and the graphic expression of scientific data These interdisciplinary studies are comprehensive in chronological and geographic range extending from the 8th to 15th centuries from Ireland across Europe Medieval Religion and Technology Lynn White, 2024-06-14 This collection of nineteen essays their previous publication dates scattered over a long career is designed to indicate the velocity and variety of the inventiveness visible in medieval engineering and also to explore the relation of technology to the values of western medieval culture During the Middle Ages values and the motivations springing from them even those underlying many activities that to us today seem purely secular were often expressed in religious presuppositions Hence this book's title The conceptual unity of the collection is brought forth in the author's Introduction The Study of Medieval Technology 1924 1974 Personal Reflections This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1978 and reissued as a paperback in 1986 Medieval Science, Technology, and Medicine Thomas F. Glick, Steven Livesey, Faith Wallis, 2014-01-27 Medieval Science Technology and Medicine details the whole scope of scientific knowledge in the medieval period in more than 300 A to Z entries This resource discusses the research application of knowledge cultural and technology exchanges experimentation and achievements in the many disciplines related to science and technology Coverage includes inventions discoveries concepts places and fields of study regions and significant contributors to various fields of science There are also entries on South Central and East Asian science This reference work provides an examination of medieval scientific tradition as well as an appreciation for the relationship between medieval science and the traditions it supplanted and those that replaced it For a full list of entries contributors and more visit the Routledge Encyclopedias of the Middle Ages website Science and Technology in the Middle Ages Joanne Findon, Marsha Groves, 2005 Long referred to as the Dark Ages the Middle Ages was actually a period of great scientific and technological advancement In agriculture the inventions of the heavy plow horseshoes and harnesses made farming easier Children will enjoy following the advancements in medicine military weapons astronomy and astrology up until 1500 *The Bronze Object in the Middle Ages* Ittai Weinryb, 2016-04-18 This is a path breaking contribution to the study of medieval metalwork and to the broader re evaluation of medieval art Technology Eric Schatzberg, 2018-11-12 In modern life technology is everywhere Yet as a concept technology is a mess In popular discourse technology is little more than the latest digital innovations Scholars do little better

offering up competing definitions that include everything from steelmaking to singing In *Technology Critical History of a Concept* Eric Schatzberg explains why technology is so difficult to define by examining its three thousand year history one shaped by persistent tensions between scholars and technical practitioners Since the time of the ancient Greeks scholars have tended to hold technicians in low esteem defining technical practices as mere means toward ends defined by others Technicians in contrast have repeatedly pushed back against this characterization insisting on the dignity creativity and cultural worth of their work The tension between scholars and technicians continued from Aristotle through Francis Bacon and into the nineteenth century It was only in the twentieth century that modern meanings of technology arose technology as the industrial arts technology as applied science and technology as technique Schatzberg traces these three meanings to the present day when discourse about technology has become pervasive but confusion among the three principal meanings of technology remains common He shows that only through a humanistic concept of technology can we understand the complex human choices embedded in our modern world

Craft Theory and Contemporary Architecture Grant Alford, 2025-05-28

This book offers a comprehensive exploration of craft theory in relation to contemporary architecture Craft is an old and familiar idea but the line between craft and art or craft and mere manufacturing for example is notoriously hard to describe In architecture a similarly blurred line between the design process on the one hand and the physical making of buildings on the other lies at the center of various debates about what it means to do architecture The growth and development of craft theory in recent years suggest new insights into these architectural debates but situating the meaning of craft within architecture within today's technological landscape is a complex problem Alford responds to this challenge by collecting various narratives from craft theory and other fields and discerning among them new lenses through which to view contemporary architectural practice Episodes from this expanded view of craft in architecture go beyond predictable accounts of Ruskin and Morris to envision new models of practice new ways of engaging other building professionals and new ways for architects to understand their own labor and the nature of how and what kinds of things they themselves craft Architecture is changing and within the ongoing story of craft explored in this book are new and surprising ways to understand design and construct the built environment Written for students and scholars this book challenges and extends the legacy of craft thinking in architecture

**Museum Studies in Art, Science, and Technology; V1** ,2010 **Reconciling Art and Technology** Subrata

Dasgupta,2024-05-14 This book examines two venerable cultures art and technology and uses the young interdiscipline of cognitive history combined with case studies of both ancient and modern artifacts to explore and unveil some of the bridges by which this reconciliation of two seemingly distant and oppositional cultures can be effected Art and technology are commonly regarded as oppositional While both are concerned with made things artifacts and both have their origins in pre literate antiquity the primary purposes they are intended for are quite distinct the artifacts of technology serve utilitarian purposes while those of art serve affective needs This opposition between art and technology notably argued by such scholars as Lewis Mumford and George Kubler is challenged in this book For when we consider art and technology as creative phenomena then many significant interesting and often subtle commonalities emerge whereby a reconciliation a unity of these two great cultures seems possible This book utilizes case studies of both ancient and modern artifacts ranging from the Nataraja sculpture of ancient India a great astronomical clock of ancient China and Japanese Samurai swordmaking through Gothic cathedrals and Renaissance paintings of Europe to English Elizabethan machinery to the French Impressionists to modernist concrete structures and paintings in both East and West This book will be of interest to students and professional scholars interested in the histories of art and technology cultural history and creativity studies

**Metropolitan Museum Studies in Art, Science, and Technology** Silvia Centeno,Nora Kennedy,M. T. Wypyski,Marijn Manuels,Deborah Schorsch,Richard E. Stone,Zhixin Sun,2014-07-01 This second volume of Studies in Art Science and Technology unites studies by scientists curators and conservators all of which are published here for the first time Essays and technical notes address a variety of themes such as connections between technology and aesthetics aging processes of artworks attribution and dating issues and conservation theory Specific examples from throughout art history add context and help promote deeper understanding A wide range of objects are discussed in the texts including medieval sculptures Baroque musical instruments Egyptian stone works photographs enamels and paintings The refined analyses of these works will prove relevant and enlightening to an interdisciplinary professional audience **The Portfolio of Villard de**

**Honnecourt** Carl F. Barnes Jr.,2017-03-02 This new facsimile edition of the Portfolio of the 13th century Picard artist Villard de Honnecourt is the first ever to be published in color The thirty three leaves are reproduced at actual size from high quality color transparencies to ensure the best possible color reproduction of the drawings One can now see variations in inks and quill strokes traces of preliminary drawings and corrections made by the artist This study is also the first to give a thorough

description of the condition of the leaves analysis of each drawing in the portfolio individually and new transcriptions and literal and free translations of the inscriptions The opening chapter covers the history and physical condition of the portfolio including reassigning hands to text found on the leaves The author analyses the tools and inks used Villard s drawing technique and style and evaluates Villard as an artist draftsman Chapter II the body of the book is devoted to detailed analyses of the leaves one by one and their drawings and inscriptions These analyses are of interest to those concerned with medieval technology and theology as well as to those interested in medieval art and architecture Chapter III is a new biography of Villard that challenges the many wild speculations of the last century and a half about Villard separating obvious fiction from possible fact Barnes analyzes in detail Villard s drawings of different Gothic buildings and makes a case for Villard having been a lay representative of the cathedral chapter at Cambrai one of the buildings Villard drew An extensive bibliography of Villard studies and a glossary of Villard s technical and artistic terms complete this important new study

**The Water Supply System of Siena, Italy** Michael P. Kucher, 2020-10-28 The book reviews scholarly literature and archival sources including maps and diagrams to better situate Siena s achievement in urban history and broadens our understanding of medieval technology and urban life

*Diagramming Devotion* Jeffrey F. Hamburger, 2020-09-21 During the European Middle Ages diagrams provided a critical tool of analysis in cosmological and theological debates In addition to drawing relationships among diverse areas of human knowledge and experience diagrams themselves generated such knowledge in the first place In *Diagramming Devotion* Jeffrey F. Hamburger examines two monumental works that are diagrammatic to their core a famous set of picture poems of unrivaled complexity by the Carolingian monk Hrabanus Maurus devoted to the praise of the cross and a virtually unknown commentary on Hrabanus s work composed almost five hundred years later by the Dominican friar Berthold of Nuremberg Berthold s profusely illustrated elaboration of Hrabanus translated his predecessor s poems into a series of almost one hundred diagrams By examining Berthold of Nuremberg s transformation of a Carolingian classic Hamburger brings modern and medieval visual culture into dialogue traces important changes in medieval visual culture and introduces new ways of thinking about diagrams as an enduring visual and conceptual model
