aliveness of an image or object is essential for it to function as a work of art The book further delves into the unity of African art forms where sculpture dance music and visual objects are all intertwined creating a holistic aesthetic experience Famous examples such as the Basinjom mask of Cameroon illustrate how art maintains its vitality even in stillness requiring ceremonial practices to anchor its powerful presence The author explores how these performances and objects combine not only to enhance the visual brilliance of the art but also to create metaphors for ethical and spiritual existence This seamless integration of the arts provides a rich framework for understanding the icons of African culture attitudes of the body like standing sitting and balancing which transcend time evoking themes of stability flexibility and balance Through this lens the book offers a journey into the timeless poetic world of African danced art where physical movement and artistic expression unite to reveal deeper truths about life and spirit This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1974 **Art in Motion:**

L. Polkowski, 2024-08-31 First fully illustrated presentation of a large but generally little known assemblage of petroglyphic rock art from the Western Desert of Egypt Rock art in Dakhleh was produced for perhaps as long as 10 millennia resulting in the formation of hundreds of sites displaying thousands of images In some places petroglyphs form a true melting pot of iconographic creations elsewhere only isolated depictions appear on rock surfaces Various rock art traditions from prehistoric through pharaonic Graeco Roman and mediaeval have all added to a tremendous variety of petroglyphs their formal traits and subject matter This book is the first ever monograph on Dakhleh Oasis rock art providing both an

introduction to the versatile topic as well as an overview of the current state of research It is designed as a collection of essays that deal with specific aspects of the research The reader is offered here not only old and new documentation much of it previously unpublished but also a great deal of innovative interpretation All chapters although devoted to different case studies revolve around an all encompassing concept of landscape of motion It is argued here that rock art regardless of its date of origin was and is always involved in certain dynamic contexts In Dakhleh the majority of petroglyphs especially during historical periods were produced in spatial contexts of paths and routes and thus by people on the move It is argued here that various kinds of movement were often a significant factor contributing to the meaning and function of the images The intention of this book is to explore and unveil such contexts which may prove somewhat elusive if we focus our analyses exclusively on the representational aspects of rock art Such a type of integration of rock art landscape and motion is the major aim of this work and has hopefully been achieved by merging perspectives and concepts derived from Egyptology Anthropology and other social sciences
