*Cities' Identity Through Architecture and Arts* Yasser Mahgoub, Nicola Cavalagli, Antonella Versaci, Hocine Bougdah, Marta Serra-Permanyer, 2020-11-28 This book covers a broad range of topics relating to architecture and urban design such as the conservation of cities culture and identity through design and planning processes various ideologies and approaches to achieving more sustainable cities while retaining their identities and strategies to help cities advertise themselves on the global market Every city has its own unique identity which is revealed through its physical and visual form It is seen through the eyes of its inhabitants and visitors and is where their collective memories are shaped In turn these factors affect tourism education culture economic prosperity in addition to other aspects making a city's identity one of its main assets Cities identities are constructed and developed over time and are constantly evolving physically culturally and sociologically This book explains how architecture and the arts can embody the historical cultural and economic characteristics of the city It also demonstrates how cities memories play a vital role in preserving their physical and nonphysical heritage Furthermore it examines the transformation of cities and urban cultures and investigates the various new approaches developed in contemporary arts and architecture Given its scope the book is a valuable resource for a variety of readers including students educators researchers and practitioners in the fields of city planning urban design architecture and the arts One Place after Another Miwon Kwon, 2004-02-27 A critical history of site specific art since the late 1960s Site specific art emerged in the late 1960s in reaction to the growing commodification of art and the prevailing ideals of art's autonomy and universality Throughout the 1970s and 1980s as site specific art intersected with land art process art performance art conceptual art installation art institutional critique community based art and public art its creators insisted on the inseparability of the work and its context In recent years however the presumption of unrepeatability and immobility encapsulated in Richard Serra's famous dictum to remove the work is to destroy the work is being challenged by new models of site specificity and changes in institutional and market forces One Place after Another offers a critical history of site specific art since the late 1960s and a theoretical framework for examining the rhetoric of aesthetic

vanguardism and political progressivism associated with its many permutations Informed by urban theory postmodernist criticism in art and architecture and debates concerning identity politics and the public sphere the book addresses the siting of art as more than an artistic problem It examines site specificity as a complex cipher of the unstable relationship between location and identity in the era of late capitalism The book addresses the work of among others John Ahearn Mark Dion Andrea Fraser Donald Judd Renee Green Suzanne Lacy Inigo Manglano Ovalle Richard Serra Mierle Laderman Ukeles and Fred Wilson

**Cinema Expanded** Jonathan Walley, 2020 Expanded cinema avant garde moving image works that claim new territory for the cinematic beyond the bounds of familiar filmmaking practices and the traditional theatrical exhibition space First emerging in the 1960s amidst seismic shifts in the arts multi screen films live cinematic performance light art kinetic art video and computer generated imagery all placed under expanded cinema s umbrella re emerged at the dawn of the 2000s opening a vast new horizon of possibility for the moving image and perhaps even heralding the end of cinema as we know it Cinema Expanded Avant Garde Film in the Age of Intermedia offers a bold new account of its subject breaking from previous studies and from larger trends in film and art scholarship Author Jonathan Walley argues that expanded cinema s apparent departure from the traditions and forms of cinema as we know it actually radically asserts cinema s nature and artistic autonomy Walley also resituates expanded cinema within the context of avant garde film history linking it to a mode of filmmaking that has historically investigated and challenged the nature and limits of cinematic form As an outgrowth of this tradition expanded cinema offered a means for filmmakers within the avant garde regardless of their differing styles formal concerns and politics to stake out cinema s unique aesthetic terrain its ontology its independence its identity In addition to reconsidering the better known expanded cinema works of the 1960s and 70s by artists like Andy Warhol Robert Whitman and Nam June Paik Cinema Expanded also provides the first scholarly accounts of scores of lesser known works across more than 50 years Making new arguments about avant garde cinema in general and its complex meditations on the nature of cinema it urgently addresses current and crucial debates about the fate of the moving image amidst a digital age of near constant technological change
