Matthews, 2019 *Secrets of Creativity* combines insights from an interdisciplinary group of experts to reveal the secrets of creativity that emerge from our everyday lives and from the minds of exceptional individuals and their discoveries. Neuroscientists describe the functioning of the brain in creative acts of scientific discovery or artistic production. Humanists describe the workings of the creative mind in the composition of literary works and in works of art and music. Creativity is explored with respect to forms of intelligence, modes of experience, emotions, memory, and the interplay between the brain's nonconscious and conscious system activities. [The Happiest Trails](#) John Brooker, 2017-02-09 John Brooker writes in his Introduction: "B westerns have always been part of my life. I decided to tour the US by Greyhound bus and try and track down some of my childhood heroes. From that and subsequent trips Brooker began to write books, magazine columns, and even a TV series *Movie Memories*. This book contains his interviews with the actors and other research on the B westerns. Fully illustrated." *The Mammoth Book of Best New Horror 13* Stephen Jones, 2012-03-01 Number 13 lucky for horror fans. This award-winning anthology series has now reached its thirteenth spectacular volume, and to mark the event Steve Jones has chosen only the very best short stories and novellas by today's finest exponents of the horror genre. Contributors to this volume include Gala Blau, Ramsey Campbell, Dennis Etchison, Charles Grant, Glen Hirshberg, Chico Kidd, Nancy Kilpatrick, Paul J McAuley, Conrad Williams. Also featuring the most comprehensive overview of the year, a fascinating necrology, and a list of useful contacts, this is the one book that all lovers of the supernatural and psychological terror will want on their shelves. *The History of the Science-fiction Magazine* Michael Ashley, 2000 This third volume in Mike Ashley's four-volume study of the science-fiction magazines focuses on the turbulent years of the 1970s when the United States emerged from the Vietnam War into an economic crisis. It saw the end of the Apollo moon programme and the start of the ecology movement. This proved to be one of the most complicated periods for the science-fiction magazines. Not only were they struggling to survive within the economic climate, they also had to cope with the death of the father of modern science-fiction, John W. Campbell Jr, while facing new and potentially threatening opposition. The market for science-fiction diversified as never before with the growth in new anthologies, the emergence of semi-professional magazines, the explosion of science-fiction in college, the start of role-playing, gaming magazines, underground and adult comics, and with the success of Star Wars media magazines. This volume explores how the traditional science-fiction magazines coped with this, from the death of Campbell to the start of the major popular science magazine *Omni* and the first dreams of the Internet. [Literary Fictions of the Contemporary Art System](#) Carlos Garrido Castellano, 2022-07-29 The main objective of this book is to explain how contemporary literatures in Spanish and Portuguese are dealing with artistic creativity when artmaking is no longer a specialised field of cultural production but rather an expanded field of socioeconomic interaction, personal and creative self-definition, and collective imagination. The project positions the contemporary art novel as the most suitable place to understand how the economisation of cultural labour is affecting writers.
